There Are No Shortcuts Rafe Esquith,2004-05-11 Year after year, Rafe Esquith's fifth-grade students excel. They read passionately, far above their grade level; tackle algebra; and stage Shakespeare so professionally that they often wow the great Shakespearean actor himself, Sir Ian McKellen. Yet Esquith teaches at an L.A. innercity school known as the Jungle, where few of his students speak English at home, and many are from poor or troubled families. What's his winning recipe? A diet of intensive learning mixed with a lot of kindness and fun. His kids attend class from 6:30 A.M. until well after 4:00 P.M., right through most of their vacations. They take field trips to Europe and Yosemite. They play rock and roll. Mediocrity has no place in their classroom. And the results follow them for life, as they go on to colleges such as Harvard, Princeton, and Stanford. Possessed by a fierce idealism, Esquith works even harder than his students. As an outspoken maverick of public education (his heroes include Huck Finn and Atticus Finch), he admits to significant mistakes and heated fights with administrators and colleagues. We all--teachers, parents, citizens--have much to learn from his candor and uncompromising vision.

Short Cuts Raymond Carver,2015-05-25 The nine stories and one poem collected in this volume formed the basis for the astonishingly original film "Short Cuts" directed by Robert Altman. Collected altogether in this volume, these stories form a searing and indelible portrait of American innocence and loss. From the collections Will You Please Be Quiet, Please?, Where I'm Calling From, What We Talk About When We Talk About Love, and A New Path to the Waterfall; including an introduction by Robert Altman. With deadpan humor and enormous tenderness, this is the work of "one of the true contemporary masters" (The New York Review of Books).

Democracy without Shortcuts Cristina Lafont, 2019-12-12 This book articulates a participatory conception of deliberative democracy that takes the democratic ideal of self-government seriously. It aims to improve citizens' democratic control and vindicate the value of citizens' participation against conceptions that threaten to undermine it. The book critically analyzes deep pluralist, epistocratic, andlottocratic conceptions of democracy. Their defenders propose various institutional ''shortcuts'' to help solve problems of democratic governance such as overcoming disagreements, citizens' political ignorance, or poor-quality deliberation. However, all these shortcut proposals require citizens to blindly defer to actors over whose decisions they cannot exercise control. Implementing such proposals would therefore undermine democracy. Moreover, it seems naive to assume that a community can reach better outcomes 'faster' if it bypasses the beliefs and attitudes of its citizens. Unfortunately, there are no 'shortcuts' to make a community better than its members. The only road to better outcomes is the long, participatory road that is taken when citizens forge a collective will by changing one

another's hearts and minds. However difficult the process of justifying political decisions to one another may be, skipping it cannot get us any closer to the democratic ideal. Starting from this conviction, the book defends a conception of democracy 'without shortcuts'. This conception sheds new light on long-standing debates about the proper scope of public reason, the role of religion in politics, and the democratic legitimacy of judicial review. It also proposes new ways to unleash the democratic potential of institutional innovations such as deliberative minipublics.

Technological Shortcuts to Social Change Amitai Etzioni, Richard Remp, 1973-04-30 Evaluates a technological approach to social change which seeks to cure society's ills by dealing with its symptoms, rather than root causes. It examines four such technological shortcuts in terms of their relevance to specific social problems: methadone in controlling heroin addiction; antabuse in treating alcoholism; the breath analyzer in highway safety; and gun control in reducing crime. The authors seek solutions which do not require large amounts of new resources or planning, and will accelerate the pace of social change. They indicate that technological handling of such problems may be the answer.
