Designing Distributed Systems Brendan Burns, 2018-02-20

Without established design patterns to guide them, developers have had to build distributed systems from scratch, and most of these systems are very unique indeed. Today, the increasing use of containers has paved the way for core distributed system patterns and reusable containerized components. This practical guide presents a collection of repeatable, generic patterns to help make the development of reliable distributed systems far more approachable and efficient. Author Brendan Burns—Director of Engineering at Microsoft Azure—demonstrates how you can adapt existing software design patterns for designing and building reliable distributed applications. Systems engineers and application developers will learn how these long-established patterns provide a common language and framework for dramatically increasing the quality of your system. Understand how patterns and reusable components enable the rapid development of reliable distributed systems Use the side-car, adapter, and ambassador patterns to split your application into a group of containers on a single machine Explore loosely coupled multi-node distributed patterns for replication, scaling, and communication between the components Learn distributed system patterns for large-scale batch data processing covering work-queues, event-based processing, and coordinated workflows

Harry's ABC of Mixing Cocktails Harry MacElhone, 2017-04-25

2017 Reprint of Undated Edition from the 1920's. Featuring the vintage mixtures that were created there, such as the White Lady, the Sidecar, and the Blue Lagoon, this compact edition includes over 300 drink suggestions. Publisher's Note: This Edition reprints only the actual recipes from the Dean and Son Edition of circa 1920. Preliminary material, advertising, illustrations and information regarding the operation of a bar are not included. Only the 300 plus recipes are reprinted in their entirety. Our Ridiculous World (Trip) Reece Gilkes, Matt

Bishop, 2020-08-04 This fast-paced, often-humorous travel book tells the truly ridiculous story of how two British friends, Matt Bishop and Reece Gilkes, became the first people to circumnavigate the globe on a scooter with a sidecar. Their world-record-breaking 34,000-mile-long journey took them through thirty-five countries and across five continents. With no experience of mechanics, overlanding, or even riding motorbikes, the pair took their Honda scooter and barn-built sidecar through some of the world's toughest environments, including a scorching Sahara Desert and the frozen wilds of a Siberian winter. This heartwarming story will restore your faith in humanity as strangers all over the world save the pair from the life-threatening and downright idiotic situations in which they find themselves. At the same time, the book lifts the curtain on the issue of modern slavery, which still plagues every country on earth. Matt and Reece meet survivors of modern slavery and organisations fighting it all over the world, and the hard-hitting stories they share will leave you questioning your role in the issue and asking how you can help. Reading this refreshing book is easy-time just slips by-but that's the only easy thing about the whole affair. So my advice is: Think of something you'd love to do that's really quite ridiculously impossible. Then read the book. Then go and do it. I must say, it really takes me back . . . - Ted Simon, author of Jupiter's Travels The many threads

of this gripping adventure unfold as a powerful, at times opinionated, heart-tweaking, fast-flowing journey of surprises. Woven into the stories are top tips, quirky facts about the lands traversed, and a wonderfully self-deprecating sense of humour. This story is proof that a positive attitude, determination, respect towards others, and wide-open minds can change the world. Adventurists are going to love the challenges and, at times, readers are going to have to put this book down so they can really think about the images attached to the words they have just read.

- Sam Manicom, author of *Into Africa*. A powerfully-written tale about travelling with purpose. But what a daft machine to use! - Paddy Tyson, *Overland Magazine*

Sidecar Amy Lane, 2012-06-29 The year is 1987. The boys wear pink Izod shirts, the girls wear big hair, everyone has a stash

box, and AIDS is just an ugly rumor rumbling like a thunderstorm from the cities. A teenage runaway wanders the side of the road, a heartbeat away from despair, and is rescued by a long-haired angel on a Harley. But that's just the beginning of their story. Josiah Daniels wanted peace and quiet and a simple life, and he had it until he rescued Casey from hunger, cold, and exhaustion. Then Joe's life is anything but simple as he and his new charge navigate a world that is changing more rapidly than the people in it. Joe wants to raise Casey to a happy and productive adulthood, and he does. But even as an adult, Casey can't conceive of a happy life without Joe. The trouble is getting Joe to accept that the boy he nurtured is suddenly the man who wants him. Their relationship can either die or change with the world around them. As they make a home, negotiate the new rules of growing up, and swerve around the pitfalls of modern life, Casey learns that adulthood is more than sex, Joe learns that there is no compromise in happy ever after, and they're both forced to realize that the one thing a man shouldn't be is alone.
