Fausto Martin De Sanctis

The Happy Hollisters and the Mystery in Skyscraper City Jerry West,1959 The Hollisters investigate a mysterious note found in an old book about the history of tunnels under New York City.

I Am Akhilesh Dr. Sheeba Khalid,2021-05-04 The purpose of this book is not to promote any political party but to throw light upon the fact that we need to bring new thought, to build our identity which comes from our country and its development. The only way to move from the category of developing countries to that of developed countries is when we replace this politics of religion with politics of development. "Progressive thoughts lead to the developed nation". A young leader, who got only 5 years and worked hard day and night for the development of our state, if he gets more chance to serve the state, it would lead to development and prosperity of both the state and its inhabitants to a larger extent. Almost everyone in our country can use a computer and smartphone, but only an expert can utilize them effectively, likewise, Akhilesh Ji being an educated person proved through his work and commitment that how effectively a state can be run.

Urban Revolution Now Christian Schmid,2016-12-05 When Henri Lefebvre published *The Urban Revolution* in 1970, he sketched a research itinerary on the emerging tendency towards planetary urbanization. Today, when this tendency has become reality, Lefebvre's ideas on everyday life, production of space, rhythmanalysis and the right to the city are indispensable for the understanding of urbanization processes at every scale of social practice. This volume is the first to develop Lefebvre's concepts in social research and architecture by focusing on urban conjunctures in Barcelona, Belgrade, Berlin, Budapest, Copenhagen, Dhaka, Hong Kong, London, New Orleans, Nowa Huta, Paris, Toronto, São Paulo, Sarajevo, as well as in Mexico and Switzerland. With contributions by historians and theorists of architecture and urbanism, geographers, sociologists, political and cultural scientists, *Urban Revolution Now* reveals the multiplicity of processes of urbanization and the variety of their patterns and actors around the globe.

International Money Laundering Through Real Estate and Agribusiness Fausto Martin De Sanctis,2017-02-13 This book examines two types of transnational money laundering: the use of offshores and wire transfers to "invest" in real estate; and agribusiness, a nebulous activity that is difficult to regulate. The author also examines current international mechanisms to combat money-laundering; whether these efforts have been successful or unsuccessful; and whether multilateral instruments are an effective tool in the war against international organized crime. As national borders have opened and trade barriers have fallen, transnational crime has grown at unprecedented levels. The current situation, better revealed by the so-called "Panama Papers," is a result of a lack of local cooperation in the investigations, prosecution, and/or extradition of criminals. Governments profit from ill-gotten wealth hosting international criminal enterprises in their own territories, thus providing a fertile ground for illicit practices, closing their eyes to the nexus among false or inappropriate identification, fraudulent records, corruption, and money laundering. If these types of transnational money-laundering are allowed to remain

as they are currently treated, the shift in the financial paradigm, from centralized and regulated to decentralized and “unregulated,” would allow for the continuation of some of the most dangerous criminal activity. In this timely book, the author presents arguments that by “following the money,” capital movements involved in transnational money laundering through real estate and agribusiness can be examined, revealed, and understood.

Consumer Culture, Branding and Identity in the New Russia Graham H.J. Roberts, 2016-04-14 As shopping has been transformed from a chore into a major source of hedonistic pleasure, a specifically Russian consumer culture has begun to emerge that is unlike any other. This book examines the many different facets of consumption in today’s Russia, including retailing, advertising and social networking. Throughout, emphasis is placed on the inherently visual - not to say spectacular - nature both of consumption generally, and of Russian consumer culture in particular. Particular attention is paid to the ways in which brands, both Russian and foreign, construct categories of identity in order to claim legitimacy for themselves. What emerges is a fascinating picture of how consumer culture is being reinvented in Russia today, in a society which has one, nostalgic eye turned towards the past, and the other, utopian eye, set firmly on the future. Borrowing concepts from both marketing and cultural studies, the approach throughout is interdisciplinary, and will be of considerable interest, to researchers, students and practitioners wishing to gain invaluable insights into one of the most lucrative, and exciting, of today’s emerging markets.

MANAGING SEVA (SELFLESS SERVICE) IN TIMES OF GREAT CHANGE Rahul M. Jindal, MD, Ph.D, 2015-11-13 The first part of the book gives practical aspects of performing seva in the USA, India and Guyana, South America. I give case histories from my own experience and how I navigated the turbulent waters to deliver what we set out to accomplish. I hope that our team’s work will motivate others to understand the difficulties and find solutions to fulfilling the goal of seva. At the end, we could not achieve anything without the help of dedicated team members many of whom gave up their vacations and willingly gave their money and energy to make a difference. The second part of the book examined 5 case studies of our work dealing with kidney and corneal transplants in Guyana, blood and bone marrow drives in the USA under the auspices of the Hindu Mandir Executive Committee, distance learning in the UK and the Global Energy Parliament, Kerala, India. The third part of the book gives cautionary lessons in managing seva projects across the world. The fourth part of the book gives theoretical aspects of seva, which include social networks in management of complex missionary projects, the use of social networking technology in the promotion and scaling up of complex global health initiatives, the growing phenomenon of “voluntourism” and Distance Learning. Our case histories represent a variety of situations across continents. Having initiated and carried these projects from scratch to fruition has given us an insight into the many issues others may face when they initiate their own projects. We experienced frustration at many points in the trajectory of our projects; however, we persevered and perhaps achieved modest success. We should confess that we thought of abandoning and giving up at multiple stages of our projects, however, we were reminded of the beneficiaries and continued against many odds and obstacles. Some of these could have been prevented but others were inevitable.

visitor to Manhattan experiences the awe of gazing up at the soaring stone, steel, and glass towers of Wall Street or Midtown, and wonders how those structures came to be built. *Manhattan Skyscrapers* answers the question by presenting the 75 most significant tall buildings that make up the city's famous skyline. From Louis Sullivan's Bayard-Condict Building of 1898 on Bleeker Street to the Conde Nast tower currently rising above Times Square, *Manhattan Skyscrapers* lavishly presents over a hundred years of New York's most interesting and important tall buildings. Author Eric P. Nash profiles familiar skyscrapers such as the Woolworth Building, the Empire State Building, the Chrysler Building, the World Trade Towers, the AT&T (now Sony) Building, and the Seagram Building, while also championing several often-overlooked yet significant structures, such as the McGraw-Hill, the Metropolitan Life Insurance, and the Fred F. French Buildings. Nash's writing strikes an elegant balance between history, architectural evaluation, and intelligent guidebook. For each building, Nash identifies the building style, gives the overall profile and image of the building, and discusses its construction; also included are quotes from the buildings' architects and the architectural critics of the time. Each skyscraper is illustrated with full-page color photographs by noted photographer Norman McGrath as well as architectural drawings and plans, archival images of the original interiors, postcards, and other ephemera. *Manhattan Skyscrapers* is essential reading-or an ideal gift-for anyone interested in the buildings that make New York the ultimate skyscraper city.

Building the Skyline Jason M. Barr, 2016-05-12 The Manhattan skyline is one of the great wonders of the modern world. But how and why did it form? Much has been written about the city's architecture and its general history, but little work has explored the economic forces that created the skyline. In *Building the Skyline*, Jason Barr chronicles the economic history of the Manhattan skyline. In the process, he debunks some widely held misconceptions about the city's history. Starting with Manhattan's natural and geological history, Barr moves on to how these formations influenced early land use and the development of neighborhoods, including the dense tenement neighborhoods of Five Points and the Lower East Side, and how these early decisions eventually impacted the location of skyscrapers built during the Skyscraper Revolution at the end of the 19th century. Barr then explores the economic history of skyscrapers and the skyline, investigating the reasons for their heights, frequencies, locations, and shapes. He discusses why skyscrapers emerged downtown and why they appeared three miles to the north in midtown-but not in between the two areas. Contrary to popular belief, this was not due to the depths of Manhattan's bedrock, nor the presence of Grand Central Station. Rather, midtown's emergence was a response to the economic and demographic forces that were taking place north of 14th Street after the Civil War. *Building the Skyline* also presents the first rigorous investigation of the causes of the building boom during the Roaring Twenties. Contrary to conventional wisdom, the boom was largely a rational response to the economic growth of the nation and city. The last chapter investigates the value of Manhattan Island and the relationship between skyscrapers and land prices. Finally, an Epilogue offers policy recommendations for a resilient and robust future skyline.

How the Homo sapiens blundered Rohit Kale, 2019-01-11 Is Human extinction or even extinction of life upon us? Is global warming going to lead to Dooms Day? What will the "Dooms Day" be like? And how far is it from today? Can Humans make it till the next Century? Are you responsible for it? And am I? Is our children's future secure? Is "CO2 emissions" from vehicles the only mistake of ours? Are there other mistakes? More serious ones? What will it be like if all the predictions of scientists come true? Is our government doing anything? Is it enough? Can we do anything about it? Why are we not doing it if we can? Are we seeing just the tail of this elephant and neglecting the rest of it? Is scientific community completely right when advising "complete decarbonisation?" Is it going to work? Answer to these and many more questions lies in this book. The author believes that time has come for us "Homo sapiens" to realize how majority of our choices are wrong and are contributing to "CO2 rise". And it is time to take responsibility of the consequences of all our wrong choices and correct them. Not only our choices, we should be interested in choices of every other Homo sapiens walking on the planet. We have very little time left to act. If not done, we are pushing our children's future into uncertainty. We cannot correct them if we don't know which choices are the right ones. This book aims to answer all the above questions in a universally understandable language so that every "Homo sapiens" understands it, becomes "Green-aware" and is capable of making the right choices.
