Spiral to the Stars Laura Harjo,2019-06-25 All communities are teeming with energy, spirit, and knowledge, and *Spiral to the Stars* taps into and activates this dynamism to discuss Indigenous community planning from a Mvskoke perspective. This book poses questions about what community is, how to reclaim community, and how to embark on the process of envisioning what and where the community can be. Geographer Laura Harjo demonstrates that Mvskoke communities have what they need to dream, imagine, speculate, and activate the wishes of ancestors, contemporary kin, and future relatives—all in a present temporality—which is Indigenous futurity. Organized around four methodologies—radical sovereignty, community knowledge, collective power, and emergence geographies—*Spiral to the Stars* provides a path that departs from traditional community-making strategies, which are often extensions of the settler state. Readers are provided a set of methodologies to build genuine community relationships, knowledge, power, and spaces for themselves. Communities don't have to wait on experts because this book helps them activate their own possibilities and expertise. A detailed final chapter provides participatory tools that can be used in workshop settings or one on one. This book offers a critical and concrete map for community making that leverages Indigenous way-finding tools. Mvskoke narratives thread throughout the text, vividly demonstrating that theories come from lived and felt experiences. This is a must-have book for community organizers, radical pedagogists, and anyone wishing to empower and advocate for their community.

Light of the Stars: Alien Worlds and the Fate of the Earth Adam Frank,2018-06-12 Winner of the 2019 Phi Beta Kappa Award for Science A valuable perspective on the most important problem of our time. —Adam Becker, NPR *Light of the Stars* tells the story of humanity's coming of age as we realize we might not be alone in this universe. Astrophysicist Adam Frank traces the question of alien life from the ancient Greeks to modern thinkers, and he demonstrates that recognizing the possibility of its existence might be the key to save us from climate change. With clarity and conviction, *Light of the Stars* asks the consequential question: What can the likely presence of life on other planets tell us about our own fate?

Stars James B. Kaler,1992 In this fascinating Journey to the farther reaches of space, astronomer James Kaler explores the nature of stars, describing their origins, varieties, distributions, compositions, and distinctive histories. He demonstrates that stars are the key to our comprehension of how the universe evolved--and that the birth, development, and death of stars is intimately associated with our own origins. From the earliest folklore to recent theories about dark matter, *Stars* chronicles the science of stellar astronomy, concluding with the evolution of high mass stars, whose

spectacular deaths generate supernovae, pulsars, neutron stars, and enigmatic black holes. Elegantly written and illustrated, *Stars* is a compelling portrait of the cosmos as a vast engine of regeneration where stars are born, live, and die.

The Trouble with Shooting Stars Meg Cannistra, 2019-08-20 "A story brimming with hope and sparkling with magic. Meg Cannistra's writing shines as bright as any shooting star." —Cassie Beasley, author of *Circus Mirandus* "Loving, imaginative, and gorgeously written, this book shines with magic and heart." —Anne Ursu, author of *The Lost Girl* Wonder meets Mary Poppins in this heartfelt debut novel about magic, healing, and the importance of family. Twelve-year-old Luna loves the nighttime more than anything else. It's when no one gives her "that look" about the half mask she has to wear while healing from a disfiguring car accident. It's also the perfect time to sit outside and draw what she sees. Like the boy and girl from the new family next door...zipping out of the window in a zeppelin and up to the stars. At first she thinks she's dreaming. But one night they catch her watching. Now Luna spends her nights on adventures with them, as they clean full moons, arrange constellations, and catch jars of stardust. She even gets to make a wish on a shooting star they catch. But Luna learns that no wish is strong enough to erase the past—as much as she may hope to.

Eyes Like Stars Lisa Mantchev, 2009-07-07 With an iron-willed girl hero whose magic is with words, and a universe that is also the ultimate theater, *Eyes Like Stars* is the most unusual fantasy I've read this year! I recommend it to anyone who loves drama, strong girls, and rowdy faery folk.-- Tamora Pierce.

What Do We Know about Stars and Galaxies? John Farndon, 2011 This volume describes the properties and facts about stars and galaxies.

The Formation of Stars Steven W. Stahler, Francesco Palla, 2008-07-11 This book is a comprehensive treatment of star formation, one of the most active fields of modern astronomy. The reader is guided through the subject in a logically compelling manner. Starting from a general description of stars and interstellar clouds, the authors delineate the earliest phases of stellar evolution. They discuss formation activity not only in the Milky Way, but also in other galaxies, both now and in the remote past. Theory and observation are thoroughly integrated, with the aid of numerous figures and images. In summary, this volume is an invaluable resource, both as a text for physics and astronomy graduate students, and as a reference for professional scientists.

The chilly welcome he receives from the ship's leader, the Teknor, is followed by overt hostility from the other inhabitants of the Tilsin. Only a woman named Orena reaches out to him. Tankar soon realizes that he was rescued for

Bright Burning Stars A.K. Small, 2019-05-21 "A compulsively readable story. I was breathless and battling tears up until the very last stunning turns onstage and beyond. A dazzling, heart-wrenching debut." —Nova Ren Suma, #1 New York Times bestselling author of *The Walls Around Us* Would you die for the Prize? Best friends Marine Duval and Kate Sanders have trained since childhood at the Paris Opera Ballet School, where they've forged an inseparable bond through shared stories of family tragedies and a powerful love for dance. When the body of a student is found in the dorms just before the start of their final year, Marine and Kate begin to ask themselves how far they would go for the ultimate prize: to be named the one girl who will join the Opera's prestigious corps de ballet. Would they cheat? Seduce the most talented boy in the school, dubbed the Demigod, hoping his magic will make them shine, too? Would they risk death for it? Neither girl is sure. But then Kate gets closer to the Demigod, even as Marine has begun to capture his heart. And as selection day draws near, the competition—for the Prize, for the Demigod—becomes fiercer, and Marine and Kate realize they have everything to lose, including each other. *Bright Burning Stars* is a stunning, propulsive story about girls at their physical and emotional extremes, the gutting power of first love, and what it means to fight for your dreams.
