Whether you are thinking of launching a company or are currently working to grow, fund, and scale your startup, 21 Secrets of Successful Startups provides a playbook to build your startup and achieve success.

Regulatory Hacking Evan Burfield,J.D. Harrison,2018-06-19 Named by Inc. magazine as one of the 10 Best Business Books of 2018 Every startup wants to change the world. But the ones that truly make an impact know something the others don't: how to make government and regulation work for them. As startups use technology to shape the way we live, work, and learn, they're taking on challenges in sectors like healthcare, infrastructure, and education, where failure is far more consequential than a humorous chat with Siri or the wrong package on your doorstep. These startups inevitably have to face governments responsible for protecting citizens through regulation. Love it or hate it, we're entering the next era of the digital revolution: the Regulatory Era. The big winners in this era--in terms of both impact and financial return--will need skills they won't teach you in business school or most startup incubators: how to scale a business in an industry deeply intertwined with government. Here, for the first time, is the playbook on how to win the regulatory era. Regulatory hacking doesn't mean cutting through red tape; it's really about finding a creative, strategic approach to navigating complex markets. Evan Burfield is the cofounder of 1776, a Washington, DC-based venture capital firm and incubator specializing in regulated industries. Burfield has coached startups on how to understand, adapt to, and influence government regulation. Now, in Regulatory Hacking, he draws on that expertise and real startup success stories to show you how to do the same. For instance, you'll learn how... * AirBnB rallied a grassroots movement to vote No on San Francisco's Prop F, which would have restricted its business in the city. * HopSkipDrive overcame safety concerns about its kids' ridesharing service by working with state government to build trust into its platform. * 23andMe survived the FDA's order to stop selling its genetic testing kits by building trusted relationships with scientists who could influence the federal regulatory community. Through fascinating case studies and interviews with startup founders, Burfield shows you how to build a compelling narrative for your startup, use it to build a grassroots movement to impact regulation, and develop influence to overcome entrenched relationships between incumbents and governments. These are just some of the tools in the book that you'll need to win the next frontier of innovation.

The Startup Playbook David Kidder,2012 Outlines the managerial decisions and leadership goals that guide a startup business to success, and provides tips and advice from the founders of such companies as Spanx, Zipcar, Flickr, Honest Tea, and LinkedIn.

The Startup Playbook Rajat Bhargava,Will Herman,2020-07-08 Get the real guidance you need to create and build your first startup company from founders who have been there many times before. The first run printing of The Startup Playbook SOLD OUT! So, we revised, expanded, and improved this second edition, including a new foreword by Brad Feld, author of Venture Deals. We still give our personal, how-to guide for building your startup from the ground up. You'll find a collection of the major lessons and shortcuts we've learned that will shift the odds in your favor. We're sharing our tips, secrets, and advice in a frank, founder-to-founder discussion with you. We make no bones about our bias. We're on your side, the founder's side. While venture capitalists, investors, and accelerators/incubators can add great value in the startup ecosystem, this book isn't about their points of view. We'll tell you where our interests as founders diverge from those on the other side of the table—investors, bankers, advisors, board members, and others—and what to do when that happens. The Startup Playbook is not a recipe, it's not a template, it's not a list of tasks to do. It's our insider's guide to starting a company and running it successfully in those critical early months. Between us, we've started over a dozen high-tech software companies and raised over $500 million in investment capital. We've acquired over thirty-five companies, had three of our startups go public, sold six of them, and we made billions of dollars for shareholders. We've also invested in over eighty startups, advised and mentored over two hundred companies and actively worked with venture capitalists (VCs), incubators, and accelerators to help launch many other new startups. We've had plenty of failures, too. And we've probably learned more from those than from the successes. We share those lessons as well. The Startup Playbook is full of our advice, guidance, do's, and don'ts from our years of experience as founders many times. We want to share our hard-earned knowledge with you to make success easier for you to achieve. This book is extraordinarily fresh and exciting. In an accessible, straight talk fashion, this book is a manual, and an inspiration. The Startup Playbook is smart and avoids the 'I am so smart' over-writing endemic to the genre. Read this as it is presented. You'll be doing yourself a tremendous favor. —Amazon Reviewer

Design Thinking for Startups Jimmy Jain,2018-04-10 According to a study* There are 472 million entrepreneurs in the world and about 100 million startups open up annually of which 75 percent of venture- backed startups fail. Unicorn Tears Jamie Pride,2018-01-17 The real-world secrets to startup success Unicorn Tears is the smart entrepreneur's guide to startups. A full 92% of startups fail in the first three years — but failure is not inevitable. Most of these companies self-sabotage, unconsciously eliminating any chance at success before they even get started. It's not the economy, it's not politics, it's not external factors; failure comes from within. This book shows you how to be one of the unicorns — one of the 8% who make it. Be prepared to un-learn everything you thought you knew about startups, as author Jamie Pride busts the harmful myths that lead so many companies to failure. Drawing upon his history as a venture capitalist, he reveals what investors want to see and hear, and what final factor puts your venture firmly into the "yes" column. Pride understands what matters in startups, and what gets in the way; his Hollywood Method for start-up success gives you a proven formula based on the tried-and-true framework Hollywood uses to make movies that succeed around the globe. Case studies illustrate what success looks like on the ground, and brings a global perspective to successful entrepreneurship and the strategies that help your business grow. Learn the truth behind the eight myths of startups Adopt a proven formula for success based on Hollywood blockbusters Craft a winning pitch to bring investors — and capital — over to your side Gain real-world perspective on startups and future trends Everyone wants their business to succeed, but wanting means nothing without a solid plan and the means to implement it. Unicorn Tears helps you set yourself up for success, and gives you the tools to forge your path to the top.

The Art of Startups Edoardo Maggini,2020-04-03 Startups constantly face the challenge of how to make an impact given their initial small size and limited resources. Nine out of ten startups fail and more than fifty percent do not reach past the five-year mark. The few that do manage to survive can quickly find themselves swamped in the oversaturated market, unable to make any decent progress. So how can they establish themselves among their immediate competitors, let alone defeat larger, more established companies? Is the story of David and Goliath still relevant in the modern business world? "The Art of Startups" offers its readers unique and viable solutions to all the problems small startups face especially in their early stages. By the end of the book the reader will be able to apply effectively a new set of war strategies to break through into the market, to master new technologies and innovations, to negotiate fruitful alliances and, ultimately, to become a better leader.

The Launch Pad Randall Stross,2012-09-27 Number of teams that applied to Y Combinator's summer 2011 batch: 2,089 Teams interviewed: 170 Minutes per interview: 10 Teams accepted and funded: 64 Months to build a viable startup: 3 Possibilities: BOUNDLESS Investment firm Y Combinator is the most sought-after home for startups in Silicon Valley. Twice a year, it funds dozens of just-founded startups and provides three months of guidance from Paul Graham, YC's impresario, and his partners, also entrepreneurs and mostly YC alumni. The list of YC-funded success stories includes Dropbox (now valued at $5 billion) and Airbnb ($1.3 billion). Receiving an offer from YC creates the opportunity of a lifetime — it's like American Idol for budding entrepreneurs. Acclaimed journalist Randall Stross was granted unprecedented access to Y Combinator's summer 2011 batch of young companies, offering a unique inside tour of the world of software startups. Most of the founders were male programmers in their mid-twenties or younger. Over the course of the summer, they scrambled to heed Graham's seemingly simple advice: make something people want. We watch the founders work round-the-clock, developing and retooling products as diverse as a Web site that can teach anyone programming, to a Wikipedia-like site for rap lyrics, to software written by a pair of attorneys who seek to "make attorneys obsolete." Founders are guided by Graham's notoriously direct form of tough-love feedback. "Here, we don't fire you," he says. "The market fires you. If you're sucking, I'm not going to run along behind you, saying, 'You're sucking, you're sucking, c'mon, stop sucking.'" Some teams would even abandon their initial idea midsummer and scramble to begin anew. The program culminated in "Demo Day," when founders pitched their startup to several hundred top angel investors and venture capitalists. A lucky few attracted capital that gave their startup a valuation of multiple millions of dollars. Others went back to the drawing board. This is the definitive story of a seismic shift that's occurred in the business world, in which coding skill trumps employment experience, pairs of undergraduates confidently take on Goliaths, tiny startups working out of an apartment scale fast, and investors fall in love.

The Lean Startup Eric Ries,2011-09-13 Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on "validated learning," rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it's too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

Founders at Work Jessica Livingston,2007-04-30 Founders at Work recounts the early struggles for independence and acceptance of many of modern technology's giants, through personal interviews that are at times hilarious, at times painful, and always inspiring. As human-interest stories they will interest the same audience that enjoys reading about the Google founders in PEOPLE magazine. These stories are exceptionally interesting, because they're about the early stages, when the founders were younger and inexperienced. Most readers know startup founders only as confident millionaires. As novices trying to find their way by trial and error, they're more human, and easier for the reader to identify with.

Startup Boards Brad Feld,Mahendra Ramsinghani,2013-12-09 An essential guide to understanding the dynamics of a startup's board of directors Let's face it, as founders and entrepreneurs, you have a lot on your plate—getting to your minimum viable product, developing customer interaction, hiring team members, and managing the accounts/books. Sooner or later, you have a board of directors, three to five (or even seven) Type A personalities who seek your attention and at times will tell you what to do. While you might be hesitant to form a board, establishing an objective outside group is essential for startups, especially to keep you on track, call you out

when you flail, and in some cases, save you from yourself. In Startup Boards, Brad Feld—a Boulder, Colorado-based entrepreneur turned-venture capitalist—shares his experience in this area by talking about the importance of having the right board members on your team and how to manage them well. Along the way, he shares valuable insights on various aspects of the board, including how they can support you, help you understand your startup's milestones and get to them faster, and hold you accountable. Details the process of choosing board members, including interviewing many people, checking references, and remembering that there should be no fear in rejecting a wrong fit Explores the importance of running great meetings, mixing social time with business time, and much more Recommends being a board member yourself at some other organization so you see the other side of the equation Engaging and informative, Startup Boards is a practical guide to one of the most important pieces of the startup puzzle.

Startups that Work Joel Kurtzman,Glenn Rifkin,2005 Joel Kurtzman and a research team from PricewaterhouseCoopers spent four years studying 350 companies and interviewing hundreds of venture capitalists, CEOs, boards of directors, and angel investors. Their mission: to understand business startups organically, from the inside out, and to acquire the tools to literally map the success of any new business in any industry. Entrepreneurs, investors, and venture capitalists have always relied on their gut instincts in predicting which startups are here now/gone later or able to stand the test of time. But now they can rely on hard research that translates into practical and powerful advice.--BOOK JACKET.

Do More Faster Brad Feld,David B. Cohen,2010-10-19 Practical advice from some of today's top early stage investors and entrepreneurs TechStars is a mentorship-driven startup accelerator with operations in three U.S. cities. Once a year in each city, it funds about ten Internet startups with a small amount of capital and surrounds them with around fifty top Internet entrepreneurs and investors. Historically, about seventy-five percent of the companies that go through TechStars raise a meaningful amount of angel or venture capital. Do More Faster: TechStars Lessons to Accelerate Your Startup is a collection of advice that comes from individuals who have passed through, or are part of, this proven program. Each vignette is an exploration of information often heard during the TechStars program and provides practical insights into early stage entrepreneurship. Contains seven sections, each focusing on a major theme within the TechStars program, including idea and vision, fundraising, legal and structure, and work/life balance Created by two highly regarded experts in the world of early stage investing Essays in each section come from the experienced author team as well as TechStar mentors, entrepreneurs, and founders of companies While you'll ultimately have to make your own decisions about what's right for your business, Do More Faster: TechStars Lessons to Accelerate Your Startup can get your entrepreneurial endeavor headed in the right direction.

Super Founders Ali Tamaseb,2021-05-18 Super Founders uses a data-driven approach to understand what really differentiates billion-dollar startups from the rest—revealing that nearly everything we thought was true about them is false! Ali Tamaseb has spent thousands of hours manually amassing what may be the largest dataset ever collected on startups, comparing billion-dollar startups with those that failed to become one—30,000 data points on nearly every factor: number of competitors, market size, the founder's age, his or her university's ranking, quality of investors, fundraising time, and many, many more. And what he found looked far different than expected. Just to mention a few: Most unicorn founders had no industry experience; There's no disadvantage to being a solo founder or to being a non-technical CEO; Less than 15% went through any kind of accelerator program; Over half had strong competitors when starting--being first to market with an idea does not actually matter. You will also hear the stories of the early days of billion-dollar startups first-hand. The book includes exclusive interviews with the founders/investors of Zoom, Instacart, PayPal, Nest, Github, Flatiron Health, Kite Pharma, Facebook, Stripe, Airbnb, YouTube, LinkedIn, Lyft, DoorDash, Coinbase, and Square, venture capital investors like Elad Gil, Peter Thiel, Alfred Lin from Sequoia Capital and Keith Rabois of Founders Fund, as well as previously untold stories about the early days of ByteDance (TikTok), WhatsApp, Dropbox, Discord, DiDi, Flipkart, Instagram, Careem, Peloton, and SpaceX. Packed with counterintuitive insights and inside stories from people who have built massively successful companies, Super Founders is a paradigm-shifting and actionable guide for entrepreneurs, investors, and anyone interested in what makes a startup successful.

Navigating Your Way to Startup Success Harlan Beverly,2017-12-18 Startups, like sailing vessels, do not travel in straight lines. The wind and the waves of the real world move the ship, and your startup, in unpredictable ways. This book is designed to give you an analytical set of tools to help you navigate your startup or corporate innovation through the murky waters of real life. Every business has failures. No business succeeds without some change of plan. Navigating Your Way to Startup Success will show you how to create a startup designed to test its assumptions so those that are not worthy fail—often and fast. This book builds on modern startup management techniques like Agile and Lean to bring an analytical and quantitative framework to the most common startup failures. Navigating through those failures means finding your way to startup success. Harlan T Beverly, PhD holds a BS in Electrical and Computer Engineering, an MBA from UT Austin, and a PhD in Business from Oklahoma State University. Harlan teaches entrepreneurship at the University of Texas at Austin. He is also Assistant Director of the Jon Brumley Texas Venture Labs at UT Austin, the world's first university business accelerator. Harlan has successfully launched five hardware and 15 software products including the Killer NIC, 2007 Network Product of the Year (CPU Magazine). He has raised over $30 million in venture financing in the challenging intersection of entertainment and technology.

Managing Startups: Best Blog Posts Thomas Eisenmann,2013-05-01 If you want salient advice about your startup, you've hit the jackpot with this book. Harvard Business School Professor Tom Eisenmann annually compiles the best posts from many blogs on technology startup management, primarily for the benefit of his students. This book makes his latest collection available to the broader entrepreneur community. University Startups and Spin-Offs Manuel Stagars,2014-11-27 University Startups and Spin-Offs teaches university

students, researchers, and educators the most effective strategies and tactics for launching their own startups from academic platforms with the backing of school programs, public grants, incubators, seed accelerators, and private partnerships in all parts of the world. Serial entrepreneur Manuel Stagars advises students, faculty, and researchers how to test their ideas for marketability, how to develop commercial products out of research projects, and how to engage companies and investors with attractive value propositions. The author has seventeen years of experience as startup entrepreneur, founder of seven companies in the United States, Europe, and Japan, consultant to universities on commercializing their research programs, angel investor, and startup mentor. Stagars' advice is field-tested, battle-hardened, and supported with a wealth of instructive first-hand examples from his international experience. The author advises academic entrepreneurs to take matters into their own hands instead of relying on the initiative and support of universities and governments. He shows students and researchers how to fit lean startup methods to their existing university ecosystems, leveraging their strengths without getting bogged down in bureaucratic morass. Avoiding theory and jargon, the book focuses on real-world situations, practical steps, checklists, and case studies. University students and researchers will learn the skills they need to become startup entrepreneurs on an academic platform. The final part of University Startups and Spin-Offs addresses university administrators, educators, technology licensing officers, incubator managers, and government grant officers. It shows them with practical examples from the private and academic sectors how to integrate startups into the fabric of the university, develop a thriving entrepreneurial ecosystem for students and researchers, leverage latent network effects, build bridges between scientific research and industries seeking innovative solutions, enhance the public image of the university, and motivate the university's best and brightest to engage in startup enterprises that will deliver benefits to the university and the public as well as to themselves.

  Fundamentals of Software Startups Anh Nguyen-Duc,Jürgen Münch,Rafael Prikladnicki,Xiaofeng Wang,Pekka Abrahamsson,2020-02-28 This book discusses important topics for engineering and managing software startups, such as how technical and business aspects are related, which complications may arise and how they can be dealt with. It also addresses the use of scientific, engineering, and managerial approaches to successfully develop software products in startup companies. The book covers a wide range of software startup phenomena, and includes the knowledge, skills, and capabilities required for startup product development; team capacity and team roles; technical debt; minimal viable products; startup metrics; common pitfalls and patterns observed; as well as lessons learned from startups in Finland, Norway, Brazil, Russia and USA. All results are based on empirical findings, and the claims are backed by evidence and concrete observations, measurements and experiments from qualitative and quantitative research, as is common in empirical software engineering. The book helps entrepreneurs and practitioners to become aware of various phenomena, challenges, and practices that occur in real-world startups, and provides insights based on sound research methodologies presented in a simple and easy-to-read manner. It also allows students in business and engineering programs to learn about the important engineering concepts and technical building blocks of a software startup. It is also suitable for researchers at different levels in areas such as software and systems engineering, or information systems who are studying advanced topics related to software business.

  Startup CXO Matt Blumberg,2021-06-09 One of the greatest challenges for startup teams is scaling because usually there's not a blueprint to follow, people are learning their function as they go, and everyone is wearing multiple hats. There can be lots of trial and error, lots of missteps, and lots of valuable time and money squandered as companies scale. Matt Blumberg and his team understand the scaling challenges—they've been there, and it took them nearly 20 years to scale and achieve a successful exit. Along the way they learned what worked and what didn't work, and they share their lessons learned in Startup CXO. Unlike other business books, Startup CXO is designed to help each functional leader understand how their function scales, what to anticipate as they scale, and what things to avoid. Beyond providing function-specific advice, tools, and tactics, Startup CXO is a resource for each team member to learn about the other functions, understand other functional challenges, and get greater clarity on how to collaborate effectively with the other functional leads. CEOs, Board members, and investors have a book they can consult to pinpoint areas of weakness and learn how to turn those into strengths. Startup CXO has in-depth chapters covering the nine most common functions in startups: finance, people, marketing, sales, customers, business development, product, operations, and privacy. Each functional section has a CEO to CEO Advice summary from Blumberg on what great looks like for that CXO, signs your CXO isn't scaling, and how to engage with your CXO. Startup CXO also has a section on the future of executive work, fractional and interim roles. Written by leading practitioners in the newly emergent fractional executive world, each function is covered with useful tips on how to be a successful fractional executive as well as what to look for and how to manage fractional executives. Startup CXO is an amazing resource for CEOs but also for functional leaders and professionals at any stage of their career. —Scott Dorsey, Managing Partner, High Alpha
