Designing Fashion's Future Alice Payne,2020-12-10 How do fashion designers design? How does design function within the industry? How can design practices open up sustainable pathways for fashion's future? Designing Fashion's Future responds to these questions to offer a fresh understanding of design practices within the sprawling, shifting fashion system. Fashion design is typically viewed as the rarefied practice of elite professionals, or else as a single stage within the apparel value chain. Alice Payne shows how design needn't be reduced to a set of decisions by a designer or design team, but can instead be examined as a process, object, or agent that shapes fashion's material and symbolic worlds. Designing Fashion's Future draws on more than 50 interviews with industry professionals based in Australia, Asia, North America, Europe, and the United Kingdom. These diverse perspectives from multinational retailers, independent and experimental contexts ground the discussion in contemporary industry practices.

Unraveling and Reweaving Sacred Canon in Africana Womanhood Rosetta E. Ross,Rose Mary Amenga-Etego,2015-12-15 Unraveling and Reweaving Sacred Canon in Africana Womanhood, a pioneering collection of essays by continental and diasporan African women, emerges from conversations about black female wellbeing and religious ideas in oral, written, and embodied forms. Through essays that affirm words and practices that enhance women’s lives, contributors challenge traditional conceptions of sacred texts to untangle beneficial statements and uses of religious ideas from harmful patterns of employing religion and religious texts to diminish, disempower, and subjugate women and girls.

Vocative Constructions in the Language of Shakespeare Beatrix Busse,2006-11-08 This study investigates the functions, meanings, and varieties of forms of address in Shakespeare's dramatic work. New categories of Shakespearean vocatives are developed and the grammar of vocatives is investigated in, above, and below the clause, following morpho-syntactic, semantic, lexicographical, pragmatic, social and contextual criteria. Going beyond the conventional paradigm of power and solidarity and with recourse to Shakespearean drama as both text and performance, the study sees vocatives as foregrounded experiential, interpersonal and textual markers. Shakespeare's vocatives construe, both quantitatively and qualitatively, habitus and identity. They illustrate relationships or messages. They reflect Early Modern, Shakespearean, and intra- or inter-textual contexts. Theoretically and methodologically, the study is interdisciplinary. It draws on approaches from (historical) pragmatics, stylistics, Hallidayean grammar, corpus linguistics, cognitive linguistics, socio-historical linguistics, sociology, and theatre semiotics. This study contributes, thus, not only to Shakespeare studies, but also to literary linguistics and literary criticism.

The Internet of Women - Accelerating Culture Change Nada Anid,Monique J. Morrow,Laurie Cantileno,2022-09-01 Female scientists, technologists, engineers, and mathematicians worldwide are making historic contributions to their fields. The modern workforce is closer to gender-equal than it has ever been, and many efforts are in place to support further progress. The Internet of Women provides an exciting look at personal narratives and case studies of female leaders and cultural shifts around the globe that illustrate this promising trend. From the United Nations' emphasis on girls and technology education in the SDGs (Sustainable Development Goals) to the increased female labor force in Zambia, a policy change that was inspired by the MDGs (UN Millennial Development Goals), The Internet of Women captures stunning examples of progress from around the world and men working hand in hand with women advocating for cultural change. Scholars and practitioners lament the lack of women leading and working in leading organizations in the technology industry. Gender equality and female participation in the tech field is critical to both developing and developed economies; nevertheless, this gap remains a global phenomenon. The lack of female leadership is particularly extreme at the highest echelons of leading technology organizations. Few publicly traded tech companies have female CEOs - in fact, most nations have zero female leadership in the tech industry. This gap does indicate a slow pace of progress for gender equality in tech employment. Women's pay still lags nearly a decade behind, according to the World Economic Forum, meaning that women's on average pay today is the equivalent to that of similarly qualified and similarly employed men in 2006. Without significant progress, the current rate of change will not lead to parity for 118 years, according to the World Economic Forum (WEF). However there's significant work being done to shift this tide. Take for instance Michelle Lee, the first female Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (USPTO), reflects on her childhood Girl Scout badge in sewing and cooking and how that memory inspired to create an IP badge that exposes young women to the process of invention. Social entrepreneur, investor, and Malala Fund co-founder Shiza Shahid shares her efforts beginning from mentoring young women in Pakistan to her current work directing more investment to women innovators around the globe. And Elizabeth Isele, a senior fellow in Social Innovation at Babson College, shares her research on women and ageism saying we need to retire the word retirement. The book is divided into six parts, each with unique areas of focus:• Millennials Leading: Exploring Challenges and Opportunities Facing the Next Generation of Women in Technology• Men and Women Empowering One Another• Bold Leadership: Women Changing the Culture of Investment and Entrepreneurship• Educating for the 21st Century• Breaking the Glass Ceiling: A Generation of Women Forging into Technology Leadership• Emerging Fields of TechnologyThe Internet of Women gathers examples about the increasingly inclusive and progressive gender culture in technology from over 30 countries. Stories range from an entrepreneur in Dubai partnering with private and public sector entities to accelerate blockchain technology to a young British woman moving to Silicon Valley to launch an artificial intelligence platform and incubator. The book is intended for corporations, academic institutions, the private sector, government agencies, gender experts, and the general public, and its key benefit is to let the reader understand a path towards implementing diversity overall globally. It also showcases the strategies, tools, and tactical execution on how create cultural change in all parts of the world.

ReFocus: The Films of Amy Heckerling Frances Smith,2016-02-19 Refocus: The Films of Amy Heckerling is the first book-length study of the work of Amy Heckerling, the phenomenally popular director and screenwriter of *Clueless* and *Fast Times at Ridgemont High*. As such, the book constitutes a significant intervention in Film Studies, prompting a reconsideration of the importance of Heckerling both in the development of Teen cinema, and as a figure in Hollywood comedy. As part of the Refocus series, the volume brings together outstanding original essays examining Heckerling's work from a variety of perspectives, including film, television and cultural

studies and is destined to be used widely in undergraduate teaching.

The Sabaite Heritage in the Orthodox Church from the Fifth Century to the Present Joseph Patrich,2001 St. Sabas (439-532 CE), was one of the principal leaders of Palestinian monasticism, that had flourished in the sixth century in the desert of Jerusalem. As an abbot he was the first in Palestine to formulate a monastic rule in writing, and his activity as an ecclesiastical leader bore upon the life of the entire Christian community in the Holy land. He and his monks were active in the theological disputes that affected the fate of the Christian Church of Palestine, and shaped it as a stronghold of Orthodoxy. But his activity has transcended his place and time. His largest monastery - the Great Laura (Mar saba), functioned from the sixth to the ninth century as the intellectual centre of the See of Jerusalem. The most distinguished among its authors were Cyril of Scythopolis, Leontius of Byzantium, John Moschus and Sophronius, Antiochus Monachos, John of Damascus, Cosmas the Hymnographer, Leontius of Damascus and Stephen Mansur. Their treatises on dogma, and prayer, shaped Orthodox theology, liturgy and hymnography in Palestine and beyond. This literary activity in Greek was complemented by scribal activity of copying and translating of Greek manuscripts into Arabic and Georgian. There was also original composition in Arabic by Theodore Abu Qurrah and others. Monastic life in Mar Saba, that continued under Muslim rule with only short intermissions, preserved the Sabaite tradition, and contributed to its reputation, parallel to that of Jerusalem. Sabaite monks were renown as paragons of monasticism and dogma, who had inspired monastic and ecclesiastical reformers in later centuries throughout the Orthodox world. Its fame spread far and wide, from Rome and North Africa in the west, to Serbia, Russia and Georgia in the east, affecting Christian dogma and liturgy therein. The thirty-one studies included in this volume, each written by an expert in his field, present the various facets of the Sabaite heritage in the Orthodox Church, from the sixth century to the present.

Who Wrote the Dead Sea Scrolls? Norman Golb,2013-02-01 Dr. Norman Golb's classic study on the origin of the Dead Sea Scrolls is now available online. Since their earliest discovery in 1947, the Scrolls have been the object of fascination and extreme controversy. Challenging traditional dogma, Golb has been the leading proponent of the view that the Scrolls cannot be the work of a small, desert-dwelling fringe sect, as various earlier scholars had claimed, but are in all likelihood the remains of libraries of various Jewish groups, smuggled out of Jerusalem and hidden in desert caves during the Roman siege of 70 A. D. Contributing to the enduring debate sparked by the book's original publication in 1995, this digital edition contains additional material reporting on new developments that have led a series of major Israeli and European archaeologists to support Golb's basic conclusions. In its second half, the book offers a detailed analysis of the workings of the scholarly monopoly that controlled the Scrolls for many years, and discusses Golb's role in the struggle to make the texts available to the public. Pleading for an end to academic politics and a commitment to the search for truth in scrolls scholarship, *Who Wrote the Dead Sea Scrolls?* sets a new standard for studies in intertestamental history This book is 'must reading'.... It demonstrates how a particular interpretation of an ancient site and particular readings of ancient documents became a straitjacket for subsequent discussion of what is arguably the most widely publicized set of discoveries in the history of biblical archaeology.... Dr. Gregory T. Armstrong, 'Church History' Golb gives us much more than just a fresh and convincing interpretation of the origin and significance of the Qumran Scrolls. His book is also... a fascinating case-study of how an idee fixe, for which there is no real historical justification, has for over 40 years dominated an elite coterie of scholars controlling the Scrolls.... Daniel O'Hara, 'New Humanist'
