The Big Book of Literacy Tasks, Grades K-8 Nancy Akhavan, 2018-01-22 The Comprehensive Handbook for Scaffolding Students' Literacy Growth Our readers and writers must do the doing if they are to succeed. In The Big Book of Literacy Tasks, Nancy Akhavan offers an instructional plan designed to yield independent effort and engagement. 75 tasks in beautiful full-color two-pagers ensure gradual release by moving more swiftly from the I do teacher phase to the you do, when students benefit from the healthy amount of struggle that is the hallmark of learning. (And spoiler alert: you kick the habit of hovering, over-explaining, and rescuing!) Backed by research and thoughtfully arranged to make day-to-day planning easier, this groundbreaking book provides: Reading and writing tasks organized into 3 sections—everyday skills, weekly practices, and sometime engagements requiring greater complexity Mini-lessons that are essential— whether you use a reading program, a workshop approach, or are just transitioning to Balanced Literacy Colorful teaching charts allowing you to quickly grasp the high points of each lesson A clear task structure for introducing and managing the stages as you move students toward independent practice Mid-task Watch Fors and Work Arounds showing how to coach without risking helicopter teaching Amazing scaffolding tips for meeting the needs of a range of learners Sample student work that offers valuable insights on how to use the tasks as formative assessments Practical and engaging, The Big Book of Literacy Tasks gives you a clear framework for working the minds of your students, helping them forge their own path to becoming better readers and writers.

Classroom-Ready Rich Math Tasks, Grades 4-5 Beth McCord Kobett, Francis (Skip) Fennell, Karen S. Karp, Delise Andrews, Sorsha-Maria T. Mulroe, 2021-04-14 Detailed plans for helping elementary students experience deep mathematical learning Do you work tirelessly to make your math lessons meaningful, challenging, accessible, and engaging? Do you spend hours you don't have searching for, adapting, and creating tasks to provide rich experiences for your students that supplement your mathematics curriculum? Help has arrived! Classroom Ready-Rich Math Tasks for Grades 4-5 details more than 50 research- and standards-aligned, high-cognitive-demand tasks that will have your students doing deep-problem-based learning. These ready-to-implement, engaging tasks connect skills, concepts and practices, while encouraging students to reason, problem-solve, discuss, explore multiple solution pathways, connect multiple representations, and justify their thinking. They help students monitor their own thinking and connect the mathematics they know to new situations. In other words, these tasks allow students to truly do mathematics! Written with a strengths-based lens and an attentiveness to all students, this guide includes: • Complete task-based lessons, referencing mathematics standards and practices, vocabulary, and materials • Downloadable planning tools, student resource pages, and thoughtful questions, and formative assessment prompts • Guidance on preparing, launching, facilitating, and reflecting on each task • Notes on access and equity, focusing on students' strengths, productive struggle, and distance or alternative learning environments. With concluding guidance on adapting or creating additional rich tasks for your students, this guide will help you give all of your students the deepest, most enriching and engaging mathematics learning experience possible.

Tasks for Language Teachers Martin Parrott, 1993-05-13 This book contains 40 tasks of two types: discussion tasks and classroom-based tasks.

Tasks Galore for the Real World Laurie Eckenrode, Pat Fennell, Kathy Hearsey, 2004 Tasks Galore for the Real World features over 240 full-color photos of highly organized, multi-modal tasks that emphasize the functional skills needed for daily living. Each task includes visual strategies

that enhance independence in the home, school, community, and workplace. Life skill areas covered include domestic skills, independent functioning, vocational skills, and job sites. The tasks attempt to clarify visually and to make concrete abstract concepts, such as telling time, using money, measuring, etc. An introduction describes how structured environments can be set up to enhance the learning.

Tasks Before Apps Monica Burns, 2017-10-09 Educator and technology consultant Monica Burns shares strategies, tools, and insights that all teachers can use to effectively incorporate technology in the classroom.

Contemporary Task-Based Language Teaching in Asia Michael Thomas, Hayo Reinders, 2015-02-26 Over the last decade task-based approaches to language learning and teaching (TBLT) have become a global focus of increased levels of research. Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some countries have adapted TBLT to deal with the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.

Task Switching and Cognitive Control James Grange, George Houghton, 2014-04-25 One thing that separates human beings from the rest of the animal world is our ability to control behavior by referencing internal plans, goals, and rules. This ability, which is crucial to our success in a complex social environment, depends on the purposeful generation of task sets--states of mental readiness that allow each of us to engage with the world in a particular way or achieve a particular aim. This book reports the latest research regarding the activation, maintenance, and suppression of task sets. Chapters from many of the world's leading researchers in task switching and cognitive control investigate key issues in the field, from how we select the most relevant task when presented with distracting alternatives, to how we maintain focus on a task (eyes on the prize) and switch to a new one when our goals or external circumstances change. Chapters also explore the brain structures responsible for these abilities, how they develop during childhood, and whether they decline due to normal aging or neurological disorders. Of interest especially to scholars and students of cognitive psychology, the volume offers thorough, multi-disciplinary coverage of contemporary research and theories concerning this fundamental yet mysterious aspect of human brain function and behavior.

Multitasking: Executive Functioning in Dual-Task and Task Switching Situations Tilo Strobach, Mike Wendt, Markus Janczyk, 2018-03-27 Multitasking refers to performance of multiple tasks. The most prominent types of multitasking are situations including either temporal overlap of the execution of multiple tasks (i.e., dual tasking) or executing multiple tasks in varying sequences (i.e., task switching). In the literature, numerous attempts have aimed at theorizing about the specific characteristics of executive functions that control interference between simultaneously and/or sequentially active component of task-sets in these situations. However, these approaches have been rather vague regarding explanatory concepts (e.g., task-set inhibition, preparation, shielding, capacity limitation), widely lacking theories on detailed mechanisms and/ or empirical evidence for specific subcomponents. The present research topic aims at providing a selection of contributions on the details of executive functioning in dual-task and task switching situations. The contributions specify these executive functions by focusing on (1) fractionating assumed mechanisms into constituent subcomponents, (2) their variations by age or in clinical subpopulations, and/ or (3) their plasticity as a response to practice and training.

Classroom Observation Tasks Ruth Wajnryb,1992 Classroom Observation Tasks shows how to use observation to learn about language teaching. It does this by providing a range of tasks which guide the user through the process of observing, analysing and reflecting, and which develop the skills of observation. The book contains a bank of 35 structured tasks which are grouped into seven areas of focus: the learner, the language, the learning process, the lesson, teaching skills and strategies, classroom management, and materials and resources. Each task looks at one aspect of a particular area; for example, the language a teacher uses to ask questions, or how the teacher monitors learning, or how people interact in a lesson. Each task provides guidance in how to record observations, and questions to help users interpret the data and relate the experience to their own teaching circumstances and practice. [This book]: a- is addressed mainly to teachers, but also caters for trainee teachers, teacher trainers and others involved in school-based teacher support, teacher development and trainer training; b- has a comprehensive introduction to the tasks and a rationale covering the theoretical issues involved; and c- places the responsibility for professional growth in the hands of the teacher. -- Back cover.

Task-Based Language Teaching in Foreign Language Contexts Ali Shehadeh,Christine A. Coombe,2012 This volume extends the Task-Based Language Teaching: Issues, Research and Practice books series by deliberately exploring the potential of task-based language teaching (TBLT) in a range of EFL contexts. It is specifically devoted to providing empirical accounts about how TBLT practice is being developed and researched in diverse educational contexts, particularly where English is not the dominant language. By including contributions from settings as varied as Japan, China, Korea, Venezuela, Turkey, Spain, and France, this collection of 13 studies provides strong indications that the research and implementation of TBLT in EFL settings is both on the rise and interestingly diverse, not least because it must respond to the distinct contexts, constraints, and possibilities of foreign language learning. The book will be of interest to SLA researchers and students in applied linguistics and TESOL. It will also be of value to course designers and language teachers who come from a broad range of formal and informal educational settings encompassing a wide range of ages and types of language learners.

The Role of the Learner in Task-Based Language Teaching Craig Lambert,Scott Aubrey,Gavin Bui,2023-05-03 This comprehensive, forward-looking text is the first holistic research overview and practical methods guide for researching the role that affective and conative factors play in second language learners' task performance and language acquisition. It provides a long overdue update on the role of the learner in task-based language teaching (TBLT). The book brings together theoretical background and major constructs, established and innovative methodological and technological tools, cutting-edge findings, and illuminating suggestions for future work. A group of expert scholars from around the world synthesize the state of the art, detail how to design and conduct empirical studies, and authoritatively set the agenda for future work in this critical, emerging area of language learning and instructional design. With a variety of helpful features like suggested research, discussion questions, and recommended further readings, this will be an invaluable resource to advanced students and researchers of second language acquisition, applied linguistics, psychology, education, and related areas.

Authentic Assessment Katherine Luongo-Orlando,2003 Authentic Assessment combines performance tasks that are relevant to students' lives with the need for accountability. The book explores common mandated language arts expectations and shows teachers how to choose meaningful activities that will guide students toward achieving important learning outcomes. This practical approach to task design includes suggestions for planning through evaluating and generating a mark, as well as sensible ways to use assessment results to improve instructional practice. The book presents: a thorough, constructive background for authentic assessment of student work; clear definitions of terms related to assessment and evaluation; a step-by-step process for developing performance-based tasks; strategies for relating tasks to goals and expectations; numerous

activities that can be used as is or adapted for specific needs. Designed for the busy teacher, the book includes ready-to-copy and use planning sheets, rubrics, and student surveys. Excellent samples of student work based on performance tasks complement this timely book.

Tasks in Second Language Learning Virginia Samuda, Martin Bygate, 2007-11-27 *Tasks in Second Language Learning* aims to re-centre discussion of the ways in which language learning tasks can help offer a holistic approach to language learning, and to explore the research implications. It relates the broad educational and social science rationale for the use of tasks to the principles and practices of their classroom use. The authors provide a balanced review of research as a basis for exploring a broader research agenda. Throughout, the book offers telling illustration of the contributions of a range of specialists in research, teaching methodology and materials development, and of the authors' own argument.

Interactive Tasks Michael Leiser, Justin White, 2015-09-16 This module on interactive tasks provides teachers with an overview of the nature of communication and explores the ways in which interactive tasks can promote communicative exchanges among students and teachers. The module provides guidelines for developing tasks, along with examples and options for their use in various types of language courses, including beginning level language classes, as well as more advanced language courses focusing culture, linguistics, literature, and film. Interactive Task Learning Kevin A. Gluck, John E. Laird, 2019-08-16 Experts from a range of disciplines explore how humans and artificial agents can quickly learn completely new tasks through natural interactions with each other. Humans are not limited to a fixed set of innate or preprogrammed tasks. We learn quickly through language and other forms of natural interaction, and we improve our performance and teach others what we have learned. Understanding the mechanisms that underlie the acquisition of new tasks through natural interaction is an ongoing challenge. Advances in artificial intelligence, cognitive science, and robotics are leading us to future systems with human-like capabilities. A huge gap exists, however, between the highly specialized niche capabilities of current machine learning systems and the generality, flexibility, and in situ robustness of human instruction and learning. Drawing on expertise from multiple disciplines, this Strüngmann Forum Report explores how humans and artificial agents can quickly learn completely new tasks through natural interactions with each other. The contributors consider functional knowledge requirements, the ontology of interactive task learning, and the representation of task knowledge at multiple levels of abstraction. They explore natural forms of interactions among humans as well as the use of interaction to teach robots and software agents new tasks in complex, dynamic environments. They discuss research challenges and opportunities, including ethical considerations, and make proposals to further understanding of interactive task learning and create new capabilities in assistive robotics, healthcare, education, training, and gaming. Designing and Using Performance Tasks Tracey K. Shiel, 2016-09-14 Stretch student thinking with performance-based tasks. With the continual increase of high-stakes assessments also comes the surge of professional development on designing performance-based tasks. Providing step-by-step insights, this book shows you how to incorporate performance tasks as a tool to teach, monitor, and extend student learning. If you're

ready to stretch your students' thinking, grab a copy of this how-to guide to help you: Make instructional decisions based on student performance of learning tasks Incorporate learning progressions as an integral part of planning performance tasks Close the "knowing-doing" gap by focusing on considerations for successful implementation

Tasks for the Veterinary Assistant Paula Pattengale, Teresa Sonsthagen, 2014-01-28 *Tasks for the Veterinary Assistant*, Third Edition provides practical, step-by-step instructions for preparing and performing a wide range of veterinary assisting tasks. With expanded coverage of large animal and exotic restraint, anatomy and physiology, nutrition and feeding, digital radiography, and electronic medical records and client communication, this revised edition now includes why and when to perform each task with the preparation and procedure information. The book includes everything from appearance and professional language to equipment maintenance and dental and surgical assisting, making it equally useful for learning new techniques or as a memory refresher. Offering a detailed, comprehensive guide to all aspects of veterinary assisting, the book is written using an accessible, user-friendly style. A companion website offers figures from the book, downloadable flash cards, lesson plans, exams, a competency checklist, and concept maps. *Tasks for the Veterinary Assistant* is equally useful for acquiring new skills and gaining confidence in the veterinary practice, making it invaluable for veterinary assistant students and veterinary assistants of all experience levels.

Whispering the Strategies of Language: An Emotional Journey through **Tasks**

In a digitally-driven earth where screens reign great and immediate conversation drowns out the subtleties of language, the profound strategies and mental nuances concealed within words frequently move unheard. Yet, set within the pages of **Tasks** a captivating fictional treasure pulsating with organic emotions, lies an extraordinary quest waiting to be undertaken. Penned by a skilled wordsmith, this charming opus attracts readers on an introspective journey, gently unraveling the veiled truths and profound impact resonating within the very cloth of every word.
