Throwing Large Nic Collins,2011 Throwing large work is a challenging area and takes a different approach to throwing normal ware. This book looks at throwing purely from the perspective of making very large work. It assumes the reader can already throw, but different techniques are needed when making large work because of all the added problems - it can buckle during making, collapse if not moved to the kiln safely and warp in the firing. Not to mention that the techniques needed to physically throw much larger work are very different. This book looks at all of these issues, offering clear guidance on how to make work successfully, covering the various techniques used, such as throwing on coils and throwing in sections, or blow-torching work before continuing to throw as well as how to avoid disastrous pitfalls. This book offers expert guidance, giving you all you need to ensure your work develops successfully as you make larger pieces.--Back cover.

*Throwing Rocks at the Google Bus* Douglas Rushkoff,2017-06-06 Why doesn't the explosive growth of companies like Facebook and Uber deliver more prosperity for everyone? What is the systemic problem that sets the rich against the poor and the technologists against everybody else? When protesters shattered the windows of a bus carrying Google employees to work, their anger may have been justifiable, but it was misdirected. The true conflict of our age isn't between the unemployed and the digital elite, or even the 99 percent and the 1 percent. Rather, a tornado of technological improvements has spun our economic program out of control, and humanity as a whole—the protesters and the Google employees as well as the shareholders and the executives—are all trapped by the consequences. It's time to optimize our economy for the human beings it's supposed to be serving. In this groundbreaking book, acclaimed media scholar and author Douglas Rushkoff tells us how to combine the best of human nature with the best of modern technology. Tying together disparate threads—big data, the rise of robots and AI, the increasing participation of algorithms in stock market trading, the gig economy, the collapse of the eurozone—Rushkoff provides a critical vocabulary for our economic moment and a nuanced portrait of humans and commerce at a critical crossroads.

Throwing Fire Alfred W. Crosby,2002-04-08 Historian Alfred W. Crosby looks at hard, accurate throwing and the manipulation of fire as unique human capabilities. Humans began throwing rocks in prehistory and then progressed to javelins, atlatls, bows and arrows. We learned to make fire by friction and used it to cook, drive game, burn out rivals, and alter landscapes. In historic times we invented catapults, trebuchets, and such flammable liquids as Greek Fire. About 1,000 years ago we invented gunpowder, which accelerated the rise of empires and the advance of European imperialism. In the 20th century, gunpowder weaponry enabled us to wage the most destructive wars of all time, peaking at the end of World War II with the V-2 and atomic bomb. Today, we have turned our projectile talents to space travel which may make it possible for our species to migrate to other bodies of our solar system and even other star systems.

**The Trolley Problem, or Would You Throw the Fat Guy Off the Bridge?** Thomas Cathcart,2013-09-10 A trolley is careering out of control. Up ahead are five workers; on a spur to the right stands a lone individual. You, a bystander, happen to be standing next to a switch that could divert the trolley, which would save the five, but sacrifice the one—do you pull it? Or say you’re watching from an overpass. The only way to save the workers is to drop a heavy object in the trolley’s path. And you’re standing next to a really fat man.... This ethical conundrum—based on British philosopher Philippa Foot’s 1967 thought experiment—has inspired decades of lively argument around the world. Now Thomas Cathcart, coauthor of the New York Times bestseller *Plato and a Platypus Walk into a Bar*, brings his sharp intelligence, quirky humor, and gift for popularizing serious ideas to “the trolley problem.” Framing the issue as a possible crime that is to be tried in the Court of Public Opinion, Cathcart explores philosophy and ethics, intuition and logic. Along the way he makes connections to the Utilitarianism of Jeremy Bentham, Kant’s limits of reason, St. Thomas Aquinas’s fascinating Principle of Double Effect, and more. Read with an open mind, this provocative book will challenge your deepest held notions of right and wrong. Would you divert the trolley? Kill one to save five? Would you throw the fat man off the bridge?
