**Self-Tracking** Gina Neff,Dawn Nafus,2016-06-24 What happens when people turn their everyday experience into data: an introduction to the essential ideas and key challenges of self-tracking. People keep track. In the eighteenth century, Benjamin Franklin kept charts of time spent and virtues lived up to. Today, people use technology to self-track: hours slept, steps taken, calories consumed, medications administered. Ninety million wearable sensors were shipped in 2014 to help us gather data about our lives. This book examines how people record, analyze, and reflect on this data, looking at the tools they use and the communities they become part of. Gina Neff and Dawn Nafus describe what happens when people turn their everyday experience—in particular, health and wellness-related experience—into data, and offer an introduction to the essential ideas and key challenges of using these technologies. They consider self-tracking as a social and cultural phenomenon, describing not only the use of data as a kind of mirror of the self but also how this enables people to connect to, and learn from, others. Neff and Nafus consider what's at stake: who wants our data and why; the practices of serious self-tracking enthusiasts; the design of commercial

self-tracking technology; and how self-tracking can fill gaps in the healthcare system. Today, no one can lead an entirely untracked life. Neff and Nafus show us how to use data in a way that empowers and educates.

**Tracking Wonder** Jeffrey Davis, 2021-11-16 Discover how the lost art of wonder can help you cultivate greater creativity, resilience, meaning, and joy as you bring your greatest contributions to life. Beyond grit, focus, and 10,000 hours lies a surprising advantage that all creatives have—wonder. Far from child’s play, wonder is the one radical quality that has led exemplary people from all walks of life to move toward the fruition of their deepest dreams and wildest endeavors—and it can do so for you, too. “Wonder is a quiet disruptor of unseen biases,” writes Jeffrey Davis. “It dissolves our habitual ways of seeing and thinking so that we may glimpse anew the beauty of what is real, true, and possible.” Rich with wisdom, inspiring stories, and practical tools, *Tracking Wonder* invites us to explore how the lost art of wonder can inspire a life of greater joy, possibility, and purpose. You’ll discover: The six facets of wonder—key qualities to help you cultivate the art of wonder in your work, relationships, and life How wonder can help us fertilize creativity, sustain the motivation to pursue big ideas, navigate uncertainty and crises, deepen our relationships, and more The biases against wonder—moving beyond societal and internalized resistance to our inherent gifts Why experiencing wonder isn’t really about achieving goals—though that happens—but about how we live each day Inspiring stories of people whose experiences of wonder helped them move through the unthinkable to create extraordinary lives Practical exercises, tools, and reflections to help you begin your own practice of tracking wonder A refreshing counter-voice to the exhausting narrative hyper-productivity, *Tracking Wonder* is a welcome guide for

experiencing more meaning and joy in the present moment as you bring your greatest contributions to life.

*Tracking* Sonja Needs, 2016-05-17 Tracking is a great way to channel your dogs energy and challenge their mind. There are different avenues of tracking from sports trials (earning titles), to search and rescue (professional working dogs), to dogs who only participate for fun and energy release. Tracking as a dog sport is intended to exercise the mind and body of your dog. Tracking is an ideal activity for dogs which have high drive (motivation and energy for a task) and require a means for release. Any breed of dog can do tracking and many dogs will excel at tracking where they have failed at other dog sports. Tracking challenges your dog with a task, they utilize their innate physical and mental abilities to the fullest extent, as nature had intended. In this book, we focus on Tracking as a sport or for fun. We use techniques and methods used by professional tracking and trailing dog handlers. We cover everything from laying your first track, progressing your training and troubleshooting. Learn about scent, how it moves and how it is affected by the environment so that you can start to understand your dogs behaviour and support them.

Understanding scent also makes it easier for you to make well planned practice tracks for you and your training partners.

**The Heart of Tracking** Richard Vacha,2019 Literary Nonfiction. California Interest. Religion & Spirituality. Originally published in recurring dispatches for a small town newspaper, this collection of essays by noted California naturalist Richard Vacha reads like a delighted field journal, full of insights into the mystic, sensory, and nearly-forgotten world of animal tracking. Through a series of outings, Vacha traverses the prismatic experience of tracking and brings it to our level. Practical investigations of signs and tracks draw close to the lives of all the animals in his landscape, including bobcats, badgers, skunks, coyotes, and one particular vulture. With spontaneous energy, Vacha's essays reveal the practice of asking sacred questions, and the process of stripping down to your senses in order to enter this primal awareness.

*Tracking Pythons* Kate Messner,2020-03-03 Burmese pythons are invading Florida. These enormous snakes are native to Southeast Asia, so when one showed up dead along the side of a Florida highway in 1979, scientists wondered where it came from. No one knew the snakes had launched a full-scale invasion. Pet pythons that escaped or were released by their owners started breeding in the wild, and these enormous predators began eating every animal in their path. Today a group of scientists at the Conservancy of Southwest Florida is tracking Burmese pythons to find ways to stop their spread. Page Plus QR code links lead to video clips and photos of the scientists working in the field. Delve into the science of pythons and their role as invasive predators. [A] fascinating example of field biology . . . Who knew that snake science could be so adventurous?—starred, Kirkus Reviews

**The Tracking Wars** Tom Loveless, 2011-10-01 In the 1980s, a nationwide reform movement sprang up in opposition to tracking, the controversial practice of schools grouping students by ability and organizing curriculum by level of difficulty. Officials in two states, Massachusetts and California, adopted policies urging middle schools to reduce or abandon tracking. In this book, Tom Loveless describes how schools reacted to these recommendations and discusses why some schools

went along with detracking while others bitterly resisted the reform. Loveless explains that the state policies were adopted without strict mandates, financial incentives, legal threats, or new bureaucratic structures. They were also adopted without convincing evidence that detracking brings lasting benefits to students. But advocates framed tracking reform as a policy supporting greater educational equity. In response, urban schools, low-achieving schools, and schools serving disadvantaged children have reacted sympathetically to the reform. Suburban schools, high-achieving schools, and schools serving wealthier families have been less willing to detrack. Drawing on extensive survey and case study data, Loveless concludes that this reform's fate is in the hands of local decisionmakers. Schools formulate tracking policy based on their own institutional, organizational, political, and technical considerations. All school reform entails risks. One troubling implication of this study is that the risks of detracking are being assumed by schools with some of society's most vulnerable youngsters.
