Urban Play Fabio Duarte,Ricardo Alvarez,2021-08-03 Why technology is most transformative when it is playful, and innovative spatial design happens only when designers are both tinkerers and dreamers. In *Urban Play*, Fábio Duarte and Ricardo Álvarez argue that the merely functional aspects of technology may undermine its transformative power. Technology is powerful not when it becomes optimally functional, but while it is still playful and open to experimentation. It is through play--in the sense of acting for one's own enjoyment rather than to achieve a goal--that we explore new territories, create new devices and languages, and transform ourselves. Only then can innovative spatial design create resonant spaces that go beyond functionalism to evoke an emotional response in those who use them. The authors show how creativity emerges in moments of instability, when a new technology overthrows an established one, or when internal factors change a technology until it becomes a different technology. Exploring the role of fantasy in design, they examine Disney World and its outsize influence on design and on forms of social interaction beyond the entertainment world. They also consider Las Vegas and Dubai, desert cities that combine technology with fantasies of pleasure and wealth. Video games and interactive media, they show, infuse the design process with interactivity and participatory dynamics, leaving spaces open to variations depending on the users' behavior. Throughout, they pinpoint the critical moments when technology plays a key role in reshaping how we design and experience spaces.

Urban Informatics Wenzhong Shi,Michael F. Goodchild,Michael Batty,Mei-Po Kwan,Anshu Zhang,2021-04-06 This open access book is the first to systematically introduce the principles of urban informatics and its application to every aspect of the city that involves its functioning, control, management, and future planning. It introduces new models and tools being developed to understand and implement these technologies that enable cities to function more efficiently – to become ‘smart’ and ‘sustainable’. The smart city has quickly emerged as computers have become ever smaller to the point where they can be embedded into the very fabric of the city, as well as being central to new ways in which the population can communicate and act. When cities are wired in this way, they have the potential to become sentient and responsive, generating massive streams of ‘big’ data in real time as well as providing immense opportunities for extracting new forms of urban data through crowdsourcing. This book offers a comprehensive review of the methods that form the core of urban informatics from various kinds of urban remote sensing to new approaches to machine learning and statistical modelling. It provides a detailed technical introduction to the wide array of tools information scientists need to develop the key urban analytics that are fundamental to learning about the smart city, and it outlines ways in which these tools can be used to inform design and policy so that cities can become more efficient with a greater concern for environment and equity.

The Real Hoodwives of Detroit 2 INDIA,2021-05-25 What up, doe! Welcome back to the mean streets of Detroit. With all the drama going down in Motown, I knew your nosey self couldn't stay away. Don't worry, you haven't missed a thing. We pick up the story right where we left off in *The Real Hoodwives of Detroit* part one. If you thought your first visit to the Motor City was crazy, you ain't seen nothing yet. Nikki, Gucci, and Chloe have been waiting for you, and boy do they have some fire! Lies have been told, relationships have been tested, and these women are out for blood. The heat amongst this group is real. This ain't no television show. No one sits in a director's chair and yells, “cut!” This drama is official. This is how the real, raw, and certified hoodwives from the Dirty Glove get down. We don't bump our gums; instead, we let our pistols do the talking. The way we live ain't for the weak-hearted. Where we come from, it's survival of the fittest, and only the strong survive. Scared? You should be. Welcome back to Detroit for round two!

**Formerly Urban** Julia Czerniak,2013-01-02 *Formerly Urban* is a collection of essays grounded in the belief that design, in all its manifestations, must play a central role in the revitalization of shrinking cities in America. The essays-by notable architects, landscape architects, and urban planners-argue that designers need to seize the opportunity to be the link between universities, local government, and private foundations. Only by participating from an urban project's inception can designers help shape design policy and the design of public works. *Formerly Urban* is for practitioners, urban thinkers, and anyone participating in the renewal and revitalization of our formerly urban centers.

**Urban Voices** Susan Lobo,2002-12-01 California has always been America's promised land—for American Indians as much as anyone. In the 1950s, Native people from all over the United States moved to the San Francisco Bay Area as part of the Bureau of Indian Affairs Relocation Program. Oakland was a major destination of this program, and once there, Indian people arriving from rural and reservation areas had to adjust to urban living. They did it by creating a cooperative, multi-tribal community—not a geographic community, but rather a network of people linked by shared experiences and understandings. The Intertribal Friendship House in Oakland became a sanctuary during times of upheaval in people's lives and the heart of a vibrant American Indian community. As one long-time resident observes, The Wednesday Night Dinner at the Friendship House was a must if you wanted to know what was happening among Native people. One of the oldest urban Indian organizations in the country, it continues to serve as a gathering place for newcomers as well as for the descendants of families who arrived half a century ago. This album of essays, photographs, stories, and art chronicles some of the people and events that have played—and continue to play—a role in the lives of Native families in the Bay Area Indian community over the past seventy years. Based on years of work by more than ninety individuals who have participated in the Bay Area Indian community and assembled by the Community History Project at the Intertribal Friendship House, it traces the community's changes from before and during the relocation period through the building of community institutions. It then offers insight into American Indian activism of the 1960s and '70s—including the occupation of Alcatraz—and shows how the Indian community continues to be created and re-created for future generations. Together, these perspectives weave a richly textured portrait that offers an extraordinary inside view of American Indian urban life. Through oral histories, written pieces prepared especially for this book, graphic images, and even news clippings, *Urban Voices* collects a bundle of memories that hold deep and rich meaning for those who are a part of the Bay Area Indian community—accounts that will be familiar to Indian people living in cities throughout the United States. And through this collection, non-Indians can gain a better understanding of Indian people in America today. If anything this book is expressive of, it is the insistence that Native people will be who they are as Indians living in urban communities, Natives thriving as cultural people strong in Indian ethnicity, and Natives helping each other socially, spiritually, economically, and politically no matter what. I lived in the Bay Area in 1975-79 and 1986-87, and I was always struck by the Native (many people do say 'American Indian' emphatically!) community and its cultural identity that has always insisted on being second to none. Yes, indeed this book is a dynamic, living document and tribute to the Oakland Indian community as well as to the Bay Area Indian community as a whole. —Simon J. Ortiz When my family arrived in San Francisco in 1957, the people at the original San Francisco Indian Center helped us adjust to urban living. Many years later, I moved to Oakland and the Intertribal Friendship House became my sanctuary during a tumultuous time in my life. The Intertribal Friendship House was more than an organization. It was the heart of a vibrant tribal community. When we returned to our Oklahoma homelands twenty years later, we took incredible memories of the many people in the Bay Area who helped shape our values and beliefs, some of whom are included in this book. —Wilma Mankiller, former Principal Chief, Cherokee Nation

*East Asia's Changing Urban Landscape* Chandan Deuskar,World Bank,Judy L. Baker,David Mason,2015 This report was prepared by a World Bank team comprising Chandan Dreuskar, Judy Baker (Task Team Leader), and David Mason--Page xiii.

*The Whole30* Melissa Hartwig Urban,Dallas Hartwig,2015 The best-selling authors of *It Starts With Food* outline a scientifically based, step-by-step guide to weight loss that explains how to change one's relationship with food for better habits, improved digestion and a stronger immune system. 150,000 first printing.

**Introducing Urban Anthropology** Rivke Jaffe,Anouk De Koning,2015-10-30 This book provides an up-to-date introduction to the important and growing field of urban anthropology. This is an increasingly critical area of study, as more than half of the world's population now lives in cities and anthropological research is increasingly done in an urban context. Exploring contemporary anthropological approaches to the urban, the authors consider: How can we define urban anthropology? What are the main themes of twenty-first century urban anthropological research? What are the possible future directions in the field? The chapters cover topics such as

urban mobilities, place-making and public space, production and consumption, politics and governance. These are illustrated by lively case studies drawn from a diverse range of urban settings in the global North and South. Accessible yet theoretically incisive, *Introducing Urban Anthropology* will be a valuable resource for anthropology students as well as of interest to those working in urban studies and related disciplines such as sociology and geography.

**Urban Morphology** Vítor Oliveira, 2016-03-30 This is a book about cities or, more precisely, about the physical form of cities. It starts presenting the main elements of urban form – streets, urban blocks, plots and buildings – structuring our cities and the fundamental actors and processes of transformation shaping these elements. It then applies this analytical framework to describe the evolution of cities over history as well as to explain the functioning of contemporary cities. After the initial focus on the ‘object’ (cities) the book describes how different researchers and different schools of thought have been dealing with this object since the emergence of Urban Morphology, as the science of urban form, in the turning to the twentieth century. Finally, the book tries to identify what are the most important (and specific) contributions that Urban Morphology has to offer to contemporary cities, societies and economies.

*Urban Habitats* C. Philip Wheater, 2002-01-31 The author presents an illustrated and practical guide to the wide range of urban habitats and the flora and fauna that live within them. The important conservation and management issues presently being faced within our towns and cities are examined. Topics of concern to the conservationist or habitat manager are explored, including: \* the impact and monitoring of pollution \* the effects of invasive species \* guidelines for the ecological management of sites to enhance their nature conservation value. *Urban Habitats* is richly illustrated, features up-to-date references and data, and proposes a series of projects.

*Urban Transformations* Ian Bentley, 2004-08-02 Cities affect every person's life, yet across the traditional divides of class, age, gender and political affiliation, armies of people are united in their dislike of the transformations that cities have undergone in recent times. The physical form of the urban environment is not a designer add-on to 'real' social issues; it is a central aspect of the social world. Yet in many people's experience, the cumulative impacts of recent urban development have created widely un-loved urban places. To work towards better-loved urban environments, we need to understand how current problems have arisen and identify practical action to address them. *Urban Transformations* examines the crucial issues relating to how cities are formed, how people use these urban environments and how cities can be transformed into better places. Exploring the links between the concrete physicality of the built environment and the complex social, economic, political and cultural processes through which the physical urban form is produced and consumed, Ian Bentley proposes a framework of ideas to provoke and develop current debate and new forms of practice.

*Urban Ecosystem Services* Alessio Russo, Giuseppe T. Cirella, 2021-05-07 The school of thought surrounding the urban ecosystem has increasingly become in vogue among researchers worldwide. Since half of the world's population lives in cities, urban ecosystem services have become essential to human health and wellbeing. Rapid urban growth has forced sustainable urban developers to rethink important steps by updating and, to some degree, recreating the human–ecosystem service linkage. Assessing, as well as estimating the losses of ecosystem services can denote the essential effects of urbanization and increasingly indicate where cities fall short. This book contains 13 thoroughly refereed contributions published within the Special Issue “Urban Ecosystem Services”. The book addresses topics such as nature-based solutions, green space planning, green infrastructure, rain gardens, climate change, and more. The contributions highlight new findings for landscape architects, urban planners, and policymakers. Important future cities research is considered by looking at the system connectivity between the social and ecological sphere—via varying forms of urban planning, management, and governance. The book is supported by methods and models that utilize an urban sustainability and ecosystem service-centric focus by adding knowledge-base and real-world solutions into the urbanization phenomenon.

**Fragile Urban Governance** Gangadhar Jha, 2018-06-13 Urbanization is giving rise to a vibrant and volatile urban India. The urban local self-government (ULSG) is struggling to provide efficient, effective, inclusive and responsive urban services. Most ULSGs are too fragile to perform the mandated functions for enhancing the quality of life and making cities and towns livable. The book traces evolution of ULSGs, its decline after Independence, and steps taken to strengthen them, especially through the big-bang decentralization initiative of 1992 for their empowerment, by enacting the 74th Constitution Amendment Act (74th CAA). Analyzing facets of the decentralization initiative, views of two review Commissions, policy responses to it and processes for implementation of constitutional provisions, it alludes to conspicuous gaps at three levels such as (i) gaps and deficiencies in the 74th CAA (ii) gaps in the post-74th CAA municipal Acts that were required to conform to the constitutional provisions, and (iii) gaps due to half-hearted implementation of even the mandatory constitutional provisions. Empowerment and strengthening of ULSG being in the nature of an imperative, it explores plausible options within the constitutional autonomy of states. Empowerment denotes authority, power and clarity in municipal functional and fiscal domain. Therefore it also specifies experiential based rational framework and a strategy for strengthening ULSGs that must look beyond the existing predilection for mere training. It fills an existing void in ULSG literature on the subject. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka

**Urban Energy Landscapes** Vanesa Castán Broto, 2019-04-11 Research volume on urban energy transition that will have wide interdisciplinary appeal to researchers in energy, urban and environmental studies.

**Urban Pollution** Eveline Dürr, Rivke Jaffe, 2010-08-30 Re-examining Mary Douglas' work on pollution and concepts of purity, this volume explores modern expressions of these themes in urban areas, examining the intersections of material and cultural pollution. It presents ethnographic case studies from a range of cities affected by globalization processes such as neoliberal urban policies, privatization of urban space, continued migration and spatialized ethnic tension. What has changed since the appearance of *Purity and Danger*? How have anthropological views on pollution changed accordingly? This volume focuses on cultural meanings and values that are attached to conceptions of 'clean' and 'dirty', purity and impurity, healthy and unhealthy environments, and addresses the implications of pollution with regard to discrimination, class, urban poverty, social hierarchies and ethnic segregation in cities.

*Urban Artscapes* Manila Castoro, Carolina Vasilikou, 2018-07-06 In recent years, artists, architects, activists and curators, as well as corporations and local governments have addressed the urban space. They challenge its use and destination, and dispute current notions of space, legality, trade and artistry. Emerging art practices challenge old ideas about where art belongs, what forms it can take and what political discourses it fosters. Selected from papers presented at the 2013 Artscapes conference in Canterbury, this collection of new essays explores the dynamic relationship between art and the city. Contributors discuss the everyday artistic use of public space around the world, from sculpture to graffiti to street photography.

**Charles Urban** Luke McKernan, 2015-03-15 Based on original research from Charles Urban's own papers, this is the first biography of this influential film maker and innovator. It is also a historical study of the development of the non-fiction film in Britain and America in the early years of cinema, told through the experiences of the leading pioneer of the form. Charles Urban was a renowned figure in his time, and he has remained a name in film history chiefly for his development of Kinemacolor, the world's first successful natural colour moving picture system. He was also a pioneer in the filming of war, science, travel, actuality and news, a fervent advocate of the value of film as an educative force, and a controversial but important innovator of film propaganda in wartime. The book uses Urban's story as a means of showing how the non-fiction film developed in the period 1897-1925, and the dilemmas that it faced within a cinema culture in which the entertainment fiction film was dominant. Urban's solutions – some successful, some less so – illustrate the groundwork that led to the development of documentary film. The book considers the roles of film as informer, educator and generator of propaganda, and the social and aesthetic function of colour in the years when cinema was still working out what it was capable of and how best to reach audiences. Luke McKernan also curates a web resource on Charles Urban at [www.charlesurban.com](http://www.charlesurban.com) Winner of the Kraszna-Krausz Moving Image Book Award 2014.

**The Urban Climate Challenge** Craig Johnson,Noah Toly,Heike Schroeder,2015-02-20 Drawing upon a variety of empirical and theoretical perspectives, The Urban Climate Challenge provides a hands-on perspective about the political and technical challenges now facing cities and transnational urban networks in the global climate regime. Bringing together experts working in the fields of global environmental governance, urban sustainability and climate change, this volume explores the ways in which cities, transnational urban networks and global policy institutions are repositioning themselves in relation to this changing global policy environment. Focusing on both Northern and Southern experience across the globe, three questions that have strong bearing on the ways in which we understand and assess the changing relationship between cities and global climate system are examined. How are cities repositioning themselves in relation to the global climate regime? How are cities being repositioned – conceptually and epistemologically? What are the prospects for crafting policies that can reduce the urban carbon footprint while at the same time building resilience to future climate change? The Urban Climate Challenge will be of interest to scholars of urban climate policy, global environmental governance and climate change. It will be of interest to readers more generally interested in the ways in which cities are now addressing the inter-related challenges of sustainable urban growth and global climate change. Chapter 9 and Chapter 11 of this book is freely available as a downloadable Open Access PDF at [www.tandfebooks.com/openaccess](http://www.tandfebooks.com/openaccess). It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license.

*Irish Urban Fictions* Maria Beville,Deirdre Flynn,2018-11-01 This collection is the first to examine how the city is written in modern Irish fiction. Focusing on the multi-faceted, layered, and ever-changing topography of the city in Irish writing, it brings together studies of Irish and Northern Irish fictions which contribute to a more complete picture of modern Irish literature and Irish urban cultural identities. It offers a critical introduction to the Irish city as it represented in fiction as a plural space to mirror the plurality of contemporary Irish identities north and south of the border. The chapters combine to provide a platform for new research in the field of Irish urban literary studies, including analyses of the fiction of authors including James Joyce, Roddy Doyle, Kate O'Brien, Hugo Hamilton, Kevin Barry, and Rosemary Jenkinson. An exciting and diverse range of fictions is introduced and examined with the aim of generating a cohesive perspective on Irish urban fictions and to stimulate further discussion in this emerging area.
