A Social-Scientific Examination of the Dynamics of Communication, Thought, and Selves Sekalala, Seif, 2022-06-17 Intrapersonal communication has been considered and studied less in comparison to general communication and other related topics. Moreover, intrapersonal communication is usually mentioned in the context of studying other topics, as opposed to being studied singularly. To fully understand the complexity and potential uses of this field of study, intrapersonal communication must be researched further. A Social-Scientific Examination of the Dynamics of Communication, Thought, and Selves focuses on the concept of intrapersonal communication, discusses how and why we communicate with ourselves, and considers how scholars can help humans improve and harness intrapersonal communication in fields such as artificial intelligence. The book also makes a forceful case for the importance and potential utility of intrapersonal communication. Covering topics such as language, sociology, and cognitive science, this reference work is ideal for sociologists, psychologists, industry professionals, academicians, scholars, researchers, practitioners, instructors, and students.

Fieldnotes in Qualitative Education and Social Science Research Casey Burkholder, Jennifer Thompson, 2020-04-08 Building upon the incorporation of fieldnotes into anthropological research, this edited collection explores fieldnote practices from within education and the social sciences. Framed by social justice concerns about power in knowledge production, this insightful collection explores methodological questions about the production, use, sharing, and dissemination of fieldnotes. Particular attention is given to the role of context and author positionality in shaping fieldnotes practices. Why do researchers take fieldnotes? What do their fieldnotes look like? What ethical concerns do different types of fieldnotes practices provoke? By drawing on case studies from numerous international contexts, including Argentina, Cameroon, Canada, Ghana, Hong Kong, Hungary, Kenya, Lebanon, Malawi, the Netherlands, South Africa, and the US, the text provides comprehensive and nuanced answers to these questions. This text will be of interest to academics and scholars conducting research across the social sciences, and in particular, in the fields of anthropology and education.

Victorian Music for the English Concertina Allan W. Atlas, 2009-01-01 Developed by the physicist Charles Wheatstone around 1830, the English concertina was extremely popular in art-music circles of Victorian England until late in the nineteenth century. This edition includes fifteen works that present a cross section of the instrument's concert and salon repertoires, and includes music by the mainstream composers George Alexander Macfarren, Julius Benedict, and Bernhard Molique, as well as original compositions by such concertina virtuosos as Giulio Regondi and Richard Blagrove. There are also pieces by two little-known women composers/arrangers, Hannah Rampton Binfield and Rosina King (the instrument was particularly popular with women), and an arrangement by George Case of a well-known hymn tune, which shows how the baritone concertina was used in small parish churches. Finally, there are two works for concertina ensembles,

a duo for treble and baritone concertina by Blagrove and a transcription by Regondi for concertina quartet of the final movement of Mozart's Symphony No. 38 Prague.
