*Web Engineering* Juan Manuel Cueva Lovelle, 2003-06-30 The refereed proceedings of the International Conference on Web Engineering, ICWE 2003, held in Oviedo, Spain in July 2003. The 25 revised full papers and 73 short papers presented together with 2 invited papers were carefully reviewed and selected from 190 submissions. The papers are organized in topical sections on agents on the Web, e-commerce, e-learning, human-computer interaction, languages and tools, mobility and the Web, multimedia techniques and telecommunications, security, Web quality and testing, semantic Web, and Web applications development.

*Strategic Imperatives and Core Competencies in the Era of Robotics and Artificial Intelligence* Batko, Roman, Szopa, Anna, 2016-11-30 The use of machines has changed the workplaces of today. While machinery is still not able to perform certain jobs that require creative or non-routine functions, their continuous advancements have shifted the dynamic between organizations and manual laborers. *Strategic Imperatives and Core Competencies in the Era of Robotics and Artificial Intelligence* focuses on contemporary organizations and their use of new competencies. Featuring coverage on new skill identification and best practices for management, this book is essential for professionals, administrators, researchers, and students seeking current research on the latest developments in technological applications in the workplace.

Personalized Nutrition George Moschonis, Katherine Livingstone, Jessica Biesiekierski, 2019-08-26 “Personalised Nutrition” represents any initiative that attempts to provide tailor-made healthy eating advice based on the nutritional needs of each individual,

as these are dictated by the individual's behaviour, phenotype and/or genotype, and their interactions. This Special Issue of *Nutrients* is dedicated to the development, implementation and assessment of the effectiveness of evidence-based "Personalised Nutrition" strategies. In this regard, a selection of reviews and original research manuscripts will bring together the latest evidence on how lifestyle habits, physiology, nutraceuticals, gut microbiome and genetics can be integrated into nutritional solutions, specific to the needs of each individual, for maintaining health and preventing diseases.

**Information Technologies in Biomedicine** Ewa Pietka, Jacek Kawa, 2010-05-29

Information Technology in Biomedicine is an interdisciplinary research area, that bridges the gap between methodological achievements in engineering and clinical requirements in medical diagnosis and therapy. In this book, members of the academic society of technical and medical background present their research results and clinical implementation in order to satisfy the functional requirements of authorized physicians for the benefit of the patients. An extended area is covered by the articles. It includes biomedical signals, medical image processing, computer-aided diagnosis and surgery, biometrics, healthcare and telemedicine, biomechanics, biomaterials, bioinformatics. Section on bronchoscopy presents the basis as well as new research studies performed in this field. Papers present various theoretical approaches and new methodologies based on fuzzy sets, mathematical statistics, mathematical morphology, fractals, wavelets, syntactic methods, artificial neural networks, graphs and many others.

**Face to Face** Kausik Bandyopadhyay,2021-03-31 While rivalry is embedded in any sporting event or performance, soccer, the world's most popular mass spectator sport, has been an emblem of such rivalries since its inception as an organized sport. Some of these rivalries grow to become long-term and perennial by their nature, extent, impact and legacy, from the local to the global level. They represent identities based on widely diverse affiliations of human life—locality, region, nation, continent, community, class, culture, religion, ethnicity, and so on. Yet, at times, such rivalries transcend barriers of space and time, where soccer-clubs, -nations, -personalities, -organizations, -styles and -fans float and compete with intriguing identities. The present volume brings into focus some of the most fascinating and enduring rivalries in the world of soccer. It attempts to encapsulate, analyse and reconstruct those rivalries—between nations, between clubs, between personalities, between styles of play, between fandoms, and between organizations—in a historical perspective in relation to diverse identities, competing ideologies, contestations of power, psychologies of attachment, bonds of loyalty, notions of enmity, articulations of violence, and affinities of fan culture—some of the core manifestations of sporting rivalry. The chapters in this book were originally published as a special issue of Soccer & Society.

**The Politicization of Social Divisions in Post-War Poland** Piotr Borowiec,2023-02-16 The monograph examines the sources of Polish social divisions. It

explains their emergence and discusses the mechanisms behind their evolution from 1945-2022. The findings corroborate the idea that divisions were formed irrespective of the current state of social hierarchy, or the accepted interpretation of justice, and that they existed both in totalitarian and democratic systems alike. The book distinguishes the category of divisions from the practices of repartition, and demonstrates that the repartitions discussed in a political discourse do not generate divisions, but constitute the politicization of the latter. Repartitions are understood as discursive, dichotomic juxtapositions that result from the existence of divisions and can be used as political tools. It has been demonstrated that they can also function as analytical categories used with a view to determining the state of social inequalities. The notions of divisions and repartitions discussed in this volume confirm the existence of the continuity of changes and describe the evolution of Polish society has a consequence.

*Independence Day* M. B. B. Biskupski, 2012-09-13 The 11th of November 1918, Polish Independence Day, is a curious anniversary whose commemoration has been only intermittently observed in the last century. In fact, the day — and the several symbols that rightly or wrongly have become associated with it — has a rather convoluted history, filled with tradition and myth, which deserves attention. Independence Day is more than just the history of a day, or the evolution of its celebration, but an explanation of what meaning has come to be associated with that date. It offers a re-reading of Polish history, not by a series of dates, but through a series of symbols whose combination allows the Poles to understand who they are by what they have been. Its focus is on the era 1914-2008, and the central actor is the charismatic Jozef Pilsudski. He came to represent a disposition regarding the

meaning of Polish history which eventually penetrated virtually all of modern Polish society. The work is constructed by the analysis of memoirs, documents, coins, stamps, films, maps, monuments, and many other features making it a multi-disciplinary and multi-dimensional volume.

**Mastering Market Analytics** Robert Kozielski, 2017-11-24 In *Mastering Market Analytics*, Robert Kozielski presents different measurement systems and marketing activities, along with common mistakes made by organizations and managers in the process of building measurement, and illustrates how to avoid these mistakes.

*Polish Estrada Music* Ewa Mazierska, 2023-09-01 Polish estrada music dominated Polish popular music throughout the state socialist period but gained little attention from popular music scholars because it was regarded as being of low quality and politically conformist. Ewa Mazierska carefully examines these assumptions, considering those institutions which catered for the needs of estrada artists and their fans, the presence of estrada in different media and the careers and styles of the leading stars, such as Mieczysław Fogg, Irena Santor, Violetta Villas, Anna German, Jerzy Połomski, Maryla Rodowicz, Zdzisława Sośnicka, Zbigniew Wodecki and Krzysztof Krawczyk. Mazierska also discusses the memory and legacy of estrada music in the post-communist period. The book draws on Poland's cultural and political history and the history of Polish popular music and media, including television and radio. Mazierska engages with concepts such as genre, stardom and authenticity in order to capture the essence of Polish estrada music and to provide a comparison with popular music produced in other countries.

**Politics of Stigmatization** Molly Krasnodebska,2020-10-27 This book studies how the pursuit of becoming an established 'insider' in an international community shapes a state's foreign policy. It looks at Poland's response to three international crises that called for joint action of the EU and its members: the Iraq war of 2003, the Russo-Georgian war of 2008, and the Ukraine crisis beginning in 2013. The book develops the concept of strategic culture as a collection of historically informed narratives that guide a state's pursuit of ontological security, a basic sense of certainty about the state's role and place in the international environment. Building on this concept the author argues that Poland's behavior reflects the awareness of its stigma as a 'late arrival' in the EU, and more generally in the 'West' as an identity community. The study thus provides insight into how stigmatization and struggle for recognition shape international dynamics.

Advanced Numerical Modelling of Wave Structure Interaction David M Kelly,Angelos Dimakopoulos,Pablo Higuera Caubilla,2021-04-06 This book will serve as a reference guide, and state-of-the-art review, for the wide spectrum of numerical models and computational techniques available to solve some of the most challenging problems in coastal engineering. The topics covered in this book, are explained fundamentally from a numerical perspective and also include practical examples applications. Important classic themes such as wave generation, propagation and breaking, turbulence modelling and sediment transport are complemented by hot topics such as fluid and structure interaction or multi-body interaction to provide an integral overview on numerical techniques for coastal engineering. Through the vision of 10 high impact authors, each an expert in one or more

of the fields included in this work, the chapters offer a broad perspective providing several different approaches, which the readers can compare critically to select the most suitable for their needs. Advanced Numerical Modelling of Wave Structure Interaction will be useful for a wide audience, including PhD students, research scientists, numerical model developers and coastal engineering consultants alike.

**Generation of Surfaces** Stephen P. Radzevich, 2014-02-03 A commonly used practice in industry is the machining of sculptured part surfaces on a multi-axis numerical control (NC) machine. While this practice is vital, it is also a costly aspect of the surface generation process. After investing more than 40 years of research into the theory of part surface generation, the author of *Generation of Surfaces*:

**Computer Security - ESORICS 2017** Simon N. Foley, Dieter Gollmann, Einar Snekkenes, 2017-09-01 The two-volume set, LNCS 10492 and LNCS 10493 constitutes the refereed proceedings of the 22nd European Symposium on Research in Computer Security, ESORICS 2017, held in Oslo, Norway, in September 2017. The 54 revised full papers presented were carefully reviewed and selected from 338 submissions. The papers address issues such as data protection; security protocols; systems; web and network security; privacy; threat modeling and detection; information flow; and security in emerging applications such as cryptocurrencies, the Internet of Things and automotive.
