Podcasting with Youth Lucas Maxwell, 2020-06-03 Learn how to set up a student-led podcast in your library, involve staff from several subject areas, market effectively, what challenges you are likely to face, and how podcasting will benefit the students and school overall. Podcasting from the library is a growing movement. Podcasting with Youth teaches librarians and educators how to set up, develop, market, and deliver a successful youth-led podcast from their library. Putting youth in control when interviewing authors and other guests develops their leadership and technical skills and brings new users to the library to engage in a unique library activity. This program can be set up relatively cheaply, and readers will learn how to use the technology required to deliver a podcast. Sound recording equipment, microphones, mixers, and audio files may be intimidating to some librarians and educators; this book quells those fears by explaining the technology in a straightforward, how-to manner. It also includes student input on what podcasters have learned, the challenges they have faced, and their plans for the future. Author Lucas Maxwell offers many helpful tips to librarians who

want to learn how to create a program that puts students in charge and allows them to produce a tangible product that their peers will be interested in.

The Professor's Guide to Taming Technology Kathleen P. King, Thomas D. Cox, 2011-01-01
This book is provided as a guide, encouragement and handbook for faculty to introduce digital media in language you can understand and provide strategies and activities you can quickly assimilate into your teaching. We are excited that more people will be able to benefit from the powerful help and guidance contained in this book. We are even more exhilarated as we anticipate how each of you will discover applications and new directions we would never anticipate, and look forward. We look forward to your innovations as you use the material you discover here. This book responds to the needs of our changing world and students by revealing innovative technology applications and how

faculty are and can use digital media in teaching in higher education because faculty make the quickest changes and learn how to do it best. It is a valuable resource for faculty from faculty, because it allows the sharing of successful teaching experiences with digital media with our worldwide colleagues so they may modify it, extend it, and improve it. Moreover, in our work with faculty across all disciplines, we also find that many struggle to think about teaching in ways in which they can incorporate technology meaningfully. While we might be experts in our discipline (chemistry, philosophy, music, etc) due to the curriculum of terminal degrees, we might not have strong preparation in instructional design. We have been fortunate to bring together faculty experts across different disciplines to specifically speak about how and why to use digital media in higher education settings. We realize we are asking you to think about your way of teaching with new ideas and strategies. Therefore, we try to illustrate them with clear examples. These different approaches include clear descriptions of what these activities look like, why to develop and implement them, and how to do so for your specific needs.

Emerging Solutions for Musical Arts Education in Africa Pan African Society for Musical Arts Education, 2005 *Emerging Solutions for Musical arts Education in South Africa* offers peer-reviewed articles prepared for the 2003 Conference of the Pan African Society for Musical Arts Education in Africa held in Kisumu, Maseno, Kenya. Not only does this publication voice the solutions offered by 31 authors from the African continent and beyond, but it presents in a unique and highly accessible fashion the collective voice of the conference participants. True to the spirit of ubuntu - an individual is only a person through other people (their communities) - this publication is a reflection of the essence of an overarching sub-Saharan philosophy; the contents represents a conference where papers were not presented, but where conference participants engaged to discuss solutions for the musical arts on the African continent. While the individual voice has been given its rightful place, the collective voice represents an emergent song composed by the scholarly community in oral fashion. This publication provides insight into the problems of musical arts education in Africa; and solutions for musical arts education.

Media dan Teknologi Pembelajaran Edisi Kedua Prof. Dr. Muhammad Yaumi, M.Hum., M.A., 2021-09-01 Lahirnya buku ini didorong oleh begitu langkanya buku rujukan utama atau referensi penting yang berkenaan dengan kajian media dan teknologi pembelajaran. Kebanyakan buku yang beredar merupakan buku terjemahan atau referensi lama yang tidak memperhatikan perkembangan kajian teknologi pembelajaran dari masa ke masa. Padahal, dinamika kemajuan ilmu pengetahuan dan teknologi (saintek) begitu cepat dan arus globalisasi informasi dan komunikasi sangat deras, sehingga mengharuskan untuk memperbarui (merevisi) konten buku rujukan tersebut. Edisi kedua ini menyajikan beberapa penambahan materi yang telah disesuaikan dengan kebutuhan mahasiswa, serta mengikuti perkembangan kajian teknologi pembelajaran terkini. Pada bab tujuh hingga sembilan, disajikan materi terkait belajar melalui media audio dan media video; serta dilanjutkan dengan pembahasan blended learning, yakni pemaduan pembelajaran tatap muka dan pembelajaran

daring (online). Materi ini sangat penting untuk dipahami para mahasiswa yang kini dituntut melaksanakan pembelajaran jarak jauh (daring). Karenanya, pembahasan materi pembelajaran jarak jauh berbasis teknologi informasi dan komunikasi (TIK) di bab terakhir saling berkaitan dan menjadi amat relevan dengan tuntutan pembelajaran di masa kini. Buku teks pengantar ini sejatinya merupakan rujukan utama untuk para mahasiswa Fakultas Tarbiyah dan Keguruan di perguruan tinggi agama, dan tentunya juga patut dijadikan rujukan pembelajaran bagi mahasiswa pada perguruan tinggi umum lainnya untuk memperoleh pemahaman komprehensif tentang pengembangan media dan teknologi Buku persembahkan penerbit PrenadaMediaGroup

Applications of Machine Learning and Artificial Intelligence in Education Khadimally, Seda, 2022-02-18 Modes and models of learning and instruction have shown a significant shift from yesterday's conventional learning and teaching given this era's current educational and social contexts. Learners are no longer learning and communicating with human-generated, computed, and mediated—or traditional—learning and instructional practices, paving the way for machine-facilitated communication, learning, and teaching tools. Learning and instruction, communication and information exchange, as well as gathering, coding, analyzing, and synthesizing data have proven to be in need of even more innovative technology-moderated tools. *Applications of Machine Learning and Artificial Intelligence in Education* focuses on the parameters of remote learning, machine learning, deep learning, and artificial intelligence under 21st-century learning and instructional contexts. Covering topics such as data coding and social networking technology, it is ideal for learners with an interest in the deep learning discipline, educators, educational technologists, instructional

designers, and data evaluators, as well as special interest groups (SGIs) in the discipline.

Electronic Voices: Contact with Another Dimension? Anabela Cardoso, 2010 This is the story of a normal woman who experienced the impossible objective contacts with another dimension through loud and clear voices received by electronic means during Instrumental Transcommunication (ITC) experiments. Dr Cardoso, a senior diplomat, describes the astounding experiences that transformed her life since she started ITC research in 1997. She presents extracts of conversations with her deceased loved ones and other personalities who insisted that they live in another world. The level of agreement between communications received by the author and concepts, even words, recorded by other experimenters from Jrgenson and Raudive to contemporary operators, constitutes compelling evidence of the reality of the next world that awaits us all. As communicators from Timestream told Dr Cardoso: The dead pass through here, you pass through here!. Electronic Voices breaks new ground in the literature
