What's So Funny? Nancy A. Walker,1998-11-01 Critical studies attempting to define and dissect American humor have been published steadily for nearly one hundred years. However, until now, key documents from that history have never been brought together in a single volume for students and scholars. *What's So Funny? Humor in American Culture*, a collection of 15 essays, examines the meaning of humor and attempts to pinpoint its impact on American culture and society, while providing a historical overview of its progression. Essays from Nancy Walker and Zita Dresner, Joseph Boskin and Joseph Dorinson, William Keough, Roy Blount, Jr., and others trace the development of American humor from the colonial period to the present, focusing on its relationship with ethnicity, gender, violence, and geography. An excellent reader for courses in American studies and American social and cultural history, *What's So Funny?* explores the traits of the American experience that have given rise to its humor.

What's Wrong with Money? Michael Ashton,2016-03-07 The expert guide to understanding and surviving monetary failure *What's Wrong with Money?* explores how and why money is valued and the warning signs that point to its eventual collapse. Author Michael Ashton is widely regarded as a premier expert on inflation, and in this book, he illustrates how the erosion of trust in central banks is putting us at high risk of both near- and long-term inflation—and a potentially very serious disruption. It's not about a conspiracy surrounding inflation reporting; it's about the tentative agreement we all carry that lends money its value. This value isn't necessarily inherent; while some currency is backed by stored value, others are not. This book walks you through the history of currency and details the ways in which it can fall apart. You'll learn how to invest in any type of collapse scenario, and you'll gain expert insight into the warning signs that signal a coming shock to the financial system. Track the history of monetary value Consider how money could die slowly or quickly Learn investment strategies for both slow and quick scenarios Examine potential causes of erosion of trust in the monetary system, and the chilling results of such erosion An economic system without money is incredibly inefficient, but our shared agreement in monetary value has historically never been enough. *What's Wrong with Money?* shows you the lessons from the past and the reality of the present and helps you make plans for the future of money.

What's Your Problem? Thomas Wedell-Wedellsborg,2020-03-17 The author makes a compelling case that we often start solving a problem before thinking deeply about whether we are solving the right problem. If you want the superpower of solving better problems, read this book. -- Eric Schmidt, former CEO, Google Are you solving the right problems? Have you or your colleagues ever worked hard on something, only to find out you were focusing on the wrong problem entirely? Most people have. In a survey, 85 percent of companies said they often struggle to solve the right problems. The consequences are severe: Leaders fight the wrong strategic battles. Teams spend their energy on

low-impact work. Startups build products that nobody wants. Organizations implement solutions that somehow make things worse, not better. Everywhere you look, the waste is staggering. As Peter Drucker pointed out, there's nothing more dangerous than the right answer to the wrong question. There is a way to do better. The key is reframing, a crucial, underutilized skill that you can master with the help of this book. Using real-world stories and unforgettable examples like the slow elevator problem, author Thomas Wedell-Wedellsborg offers a simple, three-step method - Frame, Reframe, Move Forward - that anyone can use to start solving the right problems. Reframing is not difficult to learn. It can be used on everyday challenges and on the biggest, trickiest problems you face. In this visually engaging, deeply researched book, you'll learn from leaders at large companies, from entrepreneurs, consultants, nonprofit leaders, and many other breakthrough thinkers. It's time for everyone to stop barking up the wrong trees. Teach yourself and your team to reframe, and growth and success will follow.

WTF? Tim O'Reilly, 2017-10-10 WTF? can be an expression of amazement or an expression of dismay. In today's economy, we have far too much dismay along with our amazement, and technology bears some of the blame. In this combination of memoir, business strategy guide, and call to action, Tim O'Reilly, Silicon Valley's leading intellectual and the founder of O'Reilly Media, explores the upside and the potential downsides of today's WTF? technologies. What is the future when an increasing number of jobs can be performed by intelligent machines instead of people, or done only by people in partnership with those machines? What happens to our consumer based societies—to workers and to the companies that depend on their purchasing power? Is income inequality and unemployment an inevitable consequence of technological advancement, or are there paths to a better future? What will happen to business when technology-enabled networks and marketplaces are better at deploying talent than traditional companies? How should companies organize themselves to take advantage of these new tools? What's the future of education when on-demand learning outperforms traditional institutions? How can individuals continue to adapt and retrain? Will the fundamental social safety nets of the developed world survive the transition, and if not, what will replace them? O'Reilly is the man who can really make a whole industry happen, according to Eric Schmidt, Executive Chairman of Alphabet (Google.) His genius over the past four decades has been to identify and to help shape our response to emerging technologies with world shaking potential—the World Wide Web, Open Source Software, Web 2.0, Open Government data, the Maker Movement, Big Data, and now AI. O'Reilly shares the techniques he's used at O'Reilly Media to make sense of and predict past innovation waves and applies those same techniques to provide a framework for thinking about how today's world-spanning platforms and networks, on-demand services, and artificial intelligence are changing the nature of business, education, government, financial markets, and the economy as a whole. He provides tools for understanding how all the parts of modern digital businesses work together to create marketplace advantage and customer value, and why ultimately, they cannot succeed unless their ecosystem succeeds along with them. The core of the book's call to action is an exhortation to businesses to DO MORE with technology rather than just using it to cut costs and enrich their shareholders. Robots are going to take our jobs, they say. O'Reilly replies, "Only if that's what we ask them to do! Technology is the solution to human problems, and we won't run out of work till we run out of problems. Entrepreneurs need to set their sights on how they can use big data, sensors, and AI to create amazing human experiences and the economy of the future, making us all richer in the same way the tools of the first industrial revolution did. Yes, technology can eliminate labor and make things cheaper, but at its best, we use it to do things that were previously unimaginable! What is our poverty of imagination? What are the entrepreneurial leaps that will allow us to use the technology of today to build a better future, not just a more efficient one? Whether technology brings the WTF? of wonder or the WTF? of dismay isn't inevitable. It's up to us!

What Is the What Dave Eggers, 2009-02-24 What Is the What is the story of Valentino Achak Deng, a refugee in war-ravaged southern Sudan who flees from his village in the mid-1980s and becomes one of the so-called Lost Boys. Valentino's travels bring him in contact with enemy soldiers, with liberation rebels, with hyenas and lions, with disease and starvation, and with deadly murahaleen (militias on horseback)—the same sort who currently terrorize Darfur. Eventually Deng is resettled in the United States with almost 4000 other young Sudanese men, and a very different struggle begins. Based closely on true experiences, What Is the What is heartbreaking and arresting, filled with adventure, suspense, tragedy, and, finally, triumph.
