Capitalism XXL Geert Noels,2023-05-15 Our world is suffering from economic gigantism. Under the current capitalist system huge companies and organizations are becoming even larger and more powerful, creating a Champions League effect that kills healthy competition, doesn't consider sustainable growth, and leaves workers feeling pressured and susceptible to burnout. Capitalism XXL makes it clear that current rules of capitalism favour bigness in an unfair way, and that a general unease with the capitalist system is growing. The trend for bigness goes beyond businesses: schools, hospitals, libraries, and all kinds of organizations, misled by economies of scale, have consolidated. A larger entity can seem attractive for its short-term financial gains, but the results produce enormous social costs. Rather than dismantling the capitalist system in favour of neo-Marxism, Geert Noels argues, we have to instead go back to the roots of capitalism and embrace its traditional principles as written by Adam Smith in the eighteenth century. Capitalism XXL makes the case for changing the rules in order to tame the giants and restore the individual to the world economy. Guided by history, Noels proposes an approach to capitalism that considers all human dimensions – social, ecological, and economic – and describes a sustainable future economy that will not burden the generations to come with debt, social inequality, and a natural environment that is damaged beyond repair.

However, this is the perfect book for those who enjoy the deeply satisfying first bite of a juicy cheeseburger, the crunch of Korean fried chicken or a guilt-free spoonful of fried apple pie and double cream. Food is meant to be enjoyed! Avid traveler Billy Law has traversed the globe collecting his—and he hopes your—favorite comfort recipes from places as diverse as Saigon, San Francisco, London, L.A., Tokyo, and Mexico City. Join him on this over-the-top food adventure. Chapters cover snacks, burgers, mains, desserts, and drinks. The 70 XXL-tastic recipes include fried cheese balls, poutine, mega-nachos, donut burgers, pimped-up lobster rolls, a simple turducken, a meatball pizza bowl, beer-and-chili peanut brittle, and a five-tier pavlova. These are not recipes for the faint-hearted.

Mural XXL Claudia Walde,2015-10-20 The first book to focus on the new trend in graffiti and street art: permanent murals on a gigantic scale Once upon a time, illegal graffiti and street art were modest in scale, hastily created in hours or even minutes and destroyed just as quickly by authorities, vandals, or the weather. Now, however, architects, urban planners, and development companies have begun to support the creation of large murals, allowing street artists and graffiti artists to make carefully planned, more permanent works, sometimes covering entire buildings, and adding a whole new visual dimension to the world's cities. For this spectacular volume, Claudia Walde, whose own recent 1,800-square-foot, brilliantly colored mural on the Alte Messe, Leipzig, was created in just one grueling week of work, has selected more than 200 of the best XXL mural works from around the world and profiled thirty artists who pioneered this trend. Working in dangerous conditions, hundreds of yards above the ground, yet always keenly aware of the viewer's perspective from street level, these new street muralists are as fearless and technically skilled as they are brilliant and creative. With exclusive commentary from the practitioners as well as detailed information about their planning, methods, challenges, and inspirations, Mural XXL also includes a map identifying exciting murals around the world.

eCommerce for Financial Institutions in Germany and the USA Klaus Schmidt,2001-08-21 Master's Thesis from the year 2001 in the subject Business economics - Offline Marketing and Online Marketing, grade: 1,3 (A), Reutlingen University (Southeastern Louisiana University), language: English, abstract: 1. Executive Summary Online banks dig for continued quantitative growth in account number, transaction, and value of transaction since these factors are essential for valuation of the company at the stock exchange. The market for online financial services, or “eFinance”, is growing in Europe and the US. The German market is the biggest but not the fastest growing market within Europe. Financial institutions have to consider trends in the market in order to survive and prosper in this very dynamic and competitive environment. Simple products like current account, saving accounts and brokerage, incl. mutual funds, as well as personal loans will be sold more on the Internet. However, customers are using the Internet as an information tool but close the contact often at physical branches. In order to avoid this miss match, online financial institutions will be forced to obtain core competence in: • Customer relationship management The ability to capture, manipulate, and utilise customer data will be one of the principal keys in the competition for market share. • Multi-channel banking Customers increasingly demand being served any time, any place, anywhere. Meanwhile, employees and suppliers alike are more likely to be connected to the financial institution’s architecture. This addi-tional complexity will require innovative solutions by financial institu-tions, and most likely, a real-time online platform. • Customer satisfaction Technology problems such as poor system performances or poor execution of orders are a source of much frustration for customers. A dissatisfied customer with a greater number of options in the Internet is less likely to remain loyal for long. • Competitive differentiation Technology supports new product and feature development, as well as customisation, which allows online financial institutions to differentiate their offer from their competitors. Branding requires a sophisticated differentiation strategy. The online financial institution faces a number of challenges: a heavy transaction load, fast moving shifts in channel usage and a requirement to sew all the channels together. There are many requirements for the success of this business environment: security, data management, degree of customisation, and range of products and features. [...]
