The Perfect Police State Geoffrey Cain, 2021-06-29 A riveting investigation into how a restive region of China became the site of a nightmare Orwellian social experiment—the definitive police state—and the global technology giants that made it possible Blocked from facts and truth, under constant surveillance, surrounded by a hostile alien police force: Xinjiang's Uyghur population has become cursed, oppressed, outcast. Most citizens cannot discern between enemy and friend. Social trust has been destroyed systematically. Friends betray each other, bosses snitch on employees, teachers expose their students, and children turn on their parents. Everyone is dependent on a government that nonetheless treats them with suspicion and contempt. Welcome to the Perfect Police State. Using the haunting story of one young woman's attempt to escape the vicious technological dystopia, his own reporting from Xinjiang, and extensive firsthand testimony from exiles, Geoffrey Cain reveals the extraordinary intrusiveness and power of the tech surveillance giants and the chilling implications for all our futures.

Location Technologies in International Context Rowan Wilken, Gerard Goggin, Heather A. Horst, 2019-01-21 Location Technologies in International Context offers the first international account of location technologies (in an expanded sense) and brings together a range of contributions on these technologies and their various cultures of use within the Global South. This collection asks: How, within the Global South, do location technologies differ across national markets, geo-linguistic communities and cultural contexts? What are the contrasting or shared meanings and practices associated with location technologies? And what innovative practices and new (or reinvigorated) theory may emerge from attention to the Global South? In exploring these questions, the collection contributes to our understanding of social, cultural, gendered and political relations on a global and local scale. Location Technologies in International Context is ideal for a range of disciplines, including cultural, communication and media studies; anthropology, sociology and geography; new media, Internet and mobile studies; and informatics and development studies.

Notes on the Customs and Folk-lore of the Tumbuka-Kamanga Peoples Thomas Cullen Young, 1931

Derechos Humanos ante los nuevos desafíos de la globalización, Este es el contexto en el que se encuentra la humanidad en 2020. La Covid-19 es un problema de salud pública agravado por la interconexión entre naciones que requiere de planteamientos y soluciones que impliquen a todos los países. Sin un verdadero multilateralismo, no se encontrarán soluciones duraderas a la pandemia. Algo similar ocurre con los siete desafíos actuales identificados por el Secretario General. Aunque éstos tengan impactos locales, es necesaria una visión global para poder afrontarlos. Este dilema del equilibrio entre lo nacional y lo internacional forma parte de un debate más amplio sobre los derechos humanos ante los nuevos desafíos de la globalización; debate al que contribuyen los temas desarrollados en los capítulos de este libro desde una aproximación interdisciplinar. En esta obra se reflexiona sobre una variedad de problemáticas relacionadas con la globalización y su impacto en diversos derechos humanos, como el derecho de autodeterminación de las comunidades indígenas, el derecho a un medio ambiente adecuado, el derecho a la salud o los derechos de las personas migrantes. Los derechos humanos no se reducen al ámbito jurídico, sino que abarcan diferentes materias que exigen un diálogo entre ellas. Los autores de los capítulos de este libro pertenecen a distintas ramas de la academia y aportan interesantes visiones a un debate amplio y en continua evolución sobre los derechos humanos. Son muchas y variadas las maneras en las que se podría haber estructurado y cada una de ellas aportaría una perspectiva nueva. Esperamos que la presente propuesta sea de utilidad e interés para los lectores, encontrando en estos capítulos ideas y debates que ayuden a seguir luchando por la protección y defensa de los derechos humanos.

Portable Postsocialisms Paloma Duong,2024-01-02 A study of Cuban culture and media in the twenty-first century as both a global phenomenon and a local reality, at a time when the declared death of socialism coexists in tension with emerging anticapitalist movements worldwide. Why does Cuban socialism endure as an object of international political desire, while images of capitalist markets consume Cuba's national imagination? This bold new study argues that Cuba's changing media cultures are key to our understanding of the global postsocialist condition and its competing political imaginaries. *Portable Postsocialisms* calls on a vast multimedia archive to offer a groundbreaking cultural interpretation of Cuban postsocialism. Paloma Duong examines songs, artworks, advertisements, memes, literature, jokes, and networks that refuse exceptionalist and exoticizing visions of Cuba. Expanding postsocialist critical theory to read this complex mediascape, Duong argues that a materialist critique of Cuba's revolutionary legacy must account for Cubans' everyday demands for agency and self-representation. This long overdue reassessment of Cuba's place in Latin American and post-Marxist studies shows Cuban postsocialism to be an urgent and indispensable referent for core debates on the politics of participatory cultures in new media studies. *Portable Postsocialisms* performs the crucial task of redefining how we envision imaginaries of social change in Latin America and the Caribbean.

China: Coronavirus and Loss of Freedoms Richard Pulsifer, 2022-09-13 The book examines; the origin of the coronavirus, history and theories, the loss of freedoms for Tibetan Buddhists, Uyghurs, the people of Hong Kong and Christians throughout China. Views are included from Chinese sources, scholars living among the people, and congressional testimony as well as other reporting. With the Omicron variant of COVID-19 still hanging around in the United States and China it is essential that we review the past. We see a pattern of bureaucratic delay in reporting from four months with SARS 2003, to only a few months with COVID-19. However, the shorter time still allowed for spread of the virus through China, and the world. Possibilities exist that the virus was around as early as October, and lab reports of infected patients were sent to hospitals in December confirmed human-to-human spread. Both theories of animal to human spread, and lab leak remain viable today. The loss of freedoms includes the attack on the cultures of Tibetans by the de-emphasis of Tibetan language in schools. It further took the form of a stabilization program where thousands of informers were sent to monasteries and mosques. Tibetan resistance took the form of immolations. For the Uyghurs, a few “terrorist” events were met with “reeducation”, cruel imprisonment as confirmed by Chinese officials. In Hong Kong, the right to decide for themselves was taken away with a new law forbidding demonstrations, punishing pro-democracy demonstrators, and requiring Communist Party approval of all candidates for Hong Kong's parliament. Over a few decades, the crosses of churches have been removed, some churches that required some minor repair were totally destroyed, and all others were required to install cameras. Religious symbols in the homes were to be replaced with photos or other symbols of Mao or Xi Jinping. The United States is not without means of addressing these issues. To address the coronavirus, a symposium might be established to include principle theories of animal transfer and lab leak. Steps may also be recommended to China and the WHO to monitor more closely wild animal farms and the markets where they are sold. Regarding lab leak, major labs especially those dealing with gain of function research may add increased safety and monitoring measures. Turning to the loss of freedoms, the United States might want to take further steps of the Magnitsky Act to add further more names of oppressors to the list. In addition greater awareness is needed of products being manufactured through forced labor from shirts through sneakers. Those companies that are contributing to sophisticated monitoring equipment should be informed of how they are empowering

China in the area of surveillance. Finally, more Christians and others should participate in programs where there is a listening ear such as teaching during the Summer English Program, and also to donate bibles.

Routledge Handbook of Media Geographies Paul C Adams,Barney Warf,2021-10-27 This Handbook offers a comprehensive overview of media geography, focusing on a range of different media viewed through the lenses of human geography and media theory. It addresses the spatial practices and processes associated with both old and new media, considering media not just as technologies and infrastructures, but also as networks, systems and assemblages of things that come together to enable communication in the real world. With contributions from academics specializing in geography and media studies, the Routledge Handbook of Media Geographies summarizes the recent developments in the field and explores key questions and challenges affecting various groups, such as women, minorities, and persons with visual impairment. It considers geographical aspects of disruptive media uses such as hacking, fake news, and racism. Written in an approachable style, chapters consider geographies of users, norms, rules, laws, values, attitudes, routines, customs, markets, and power relations. They shed light on how mobile media make users vulnerable to tracking and surveillance but also facilitate innovative forms of mobility, space perception and placemaking. Structured in four distinct sections centered around control and access to digital media, mass media, mobile media and surveillance and media and the politics of knowledge, the Handbook explores digital divides and other manifestations of the uneven geographies of power. It also includes an overview of the alternative social media universe created by the Chinese government. Media geography is a burgeoning field of study that lies at the intersections of various social sciences, including human geography, political science, sociology, anthropology, communication/media studies, urban studies, and women and gender studies. Academics and students across these fields will greatly benefit from this Handbook.

May It Fill Your Soul Timothy Rice,1994-07-13 In this vivid musical ethnography, Timothy Rice documents and interprets the history of folk music, song, and dance in Bulgaria over a seventy-year period of dramatic change. From 1920 to 1989, Bulgaria changed from a nearly medieval village society to a Stalinist planned industrial economy to a chaotic mix of capitalist and socialist markets and cultures. In the context of this history, Rice brings Bulgarian folk music to life by focusing on the biography of the Varimezov family, including the musician Kostadin and his wife Todora, a singer. Combining interviews with his own experiences of learning how to play, sing and dance Bulgarian folk music, Rice presents one of the most detailed accounts of traditional, aural learning processes in the ethnomusicological literature. Using a combination of traditionally dichotomous musicological and ethnographic approaches, Rice tells the story of how individual musicians learned their tradition, how they lived it during the pre-Communist era of family farming, how the tradition changed with industrialization brought under Communism, and

finally, how it flourished and evolved in the recent, unstable political climate. This work—complete with a compact disc and numerous illustrations and musical examples—contributes not only to ethnomusicological theory and method, but also to our understanding of Slavic folklore, Eastern European anthropology, and cultural processes in Socialist states.
