References no. 2480 – 3686 / ACE-ZYA J. Pospíšilová, J. Solárová, 2012-12-06 The third volume of Water-in-Plants Bibliography includes papers in all fields of plant water relations research which appeared during the year 1977 - from theoretical considerations about the state of water in cells and its membrane transport to drought resistance of plants or physiological significance of irrigation. In addition to papers devoted entirely to plant water relations, papers on other topics are included if they contain data on plant hydration level, water vapour efflux, rate of water uptake or water transport, etc., or if they contain valuable methodological information (measurement of selected microclimatic factors, soil moisture, etc.). We have tried to cover fully the relevant papers which have appeared in the important scientific periodicals and books. Articles published in local journals, mimeographed booklets, abstracts of thesis and of symposia contributions, etc., were chosen mostly from reprints received directly from authors. The courtesy of those authors who have already supplied us with reprints and lists of their publications is highly appreciated. The manuscript is usually prepared in May and June of the year following the year which it covers. Unfortunately some reprints come later and thus the respective references appear in the following volume, with one year delay. To maximize the value of the bibliography the references are arranged alphabetically according to the authors' names, and each volume is provided with three indexes. The authors' index contains all names of authors, co-authors and editors.

A Grammar of Kham David E. Watters, 2009-10-01 First published in 2002, this is a comprehensive grammatical documentation of Kham, a previously undescribed language from west-central Nepal, belonging to the Tibeto-Burman language family. The language contains a number of grammatical systems that are of immediate relevance to current work on linguistic theory, including split ergativity, a mirative system, and a rich class of derived adjectivals. Its verb morphology has implications for the understanding of the history of the entire Tibeto-Burman family. The book, based on extensive fieldwork, deals with all

major aspects of the language including segmental phonology, tone, word classes, noun phrases, nominalizations, transitivity alterations, tense-aspect-modality, non-declarative speech acts, and complex sentence structure. It provides copious examples throughout the exposition and includes three short native texts and a vocabulary of more than 400 words, many of them reconstructed for Proto-Kham and Proto-Tibeto-Burman.

An Engineering Introduction to Biotechnology J. The Focus Stone Matthew W. Harrill,2022-02-05 The life of a traveler was all Zya S'Ve dai had ever known. People often told Zya she was special, but she never knew why, suspecting only that the visions in her dreams would one day become clear. Her simple life changes when a series of events forces her to leave her family - and face her destiny head on. Elsewhere, three guildsmen are dismissed from the coveted Order of Law. Thrown out into the world with nothing but their wits and the guidance of an elderly benefactor, they decide to find out what was really behind the notorious Night of Spears twenty years ago. As Zya travels across The Nine Duchies, new friends and old enemies all seek to tip the balance of power in their favour. What connects Zya's destiny and the guildsmen, despite them being worlds apart? And why are they

all in the sights of the maniacal Garias Gibden - the Witch Finder - and his minions?

Aspectuality and Temporality Zlatka

Guentchéva,2016-03-09 This volume brings together a collection of articles exploring tense and aspect phenomena in a variety of non-related languages: Indo-European (Albanian, Bulgarian, Armenian, English, Norwegian, Hindi), Hamito-Semitic (Berber, Zenaga Berber, Arabic varieties, Neo-Aramaic), African (Wolof, Langi), Asian (Badaga, Korean, Mongolian languages – Khalkha, Buriat, Kalmuck – Thaï, Tibetan languages), Amerindian (Yucatec Maya, Sikuani), Greenlandic (Eskimo) and Oceanian (Nêlêmwa). Each article is grounded in solid empirical knowledge. It offers an in-depth study of aspectual and temporal devices as manifested in many diverse and complex ways from a cross-linguistic perspective and seeks to contribute to our understanding of the domain under consideration and more broadly to linguistic typology and theoretical linguistics, especially the enunciative approach. The book gives readers access to a collection of data and is of particular interest to scholars working on aspectuality and temporality, on pragmatics, on areal linguistics and on typology.
