The Salad Rhapsodies Vol. 2 Drew B David,2016-12-11 A semi-long visual/pattern/concrete poem by Drew B David, crafted expressly for millennial tastes. Is Dada dead, or has it been mysteriously resurrected, in a new, nefarious iteration? You decide. This is the second of a three-volume set.

Creating A Memory of Causal Relationships Michael J. Pazzani,2014-02-25 This book presents a theory of learning new causal relationships by making use of perceived regularities in the environment, general knowledge of causality, and existing causal knowledge. Integrating ideas from the psychology of causation and machine learning, the author introduces a new learning procedure called theory-driven learning that uses abstract knowledge of causality to guide the induction process. Known as OCCAM, the system uses theory-driven learning when new experiences conform to common patterns of causal relationships, empirical learning to learn from novel experiences, and explanation-based learning when there is sufficient existing knowledge to explain why a new outcome occurred. Together these learning methods construct a hierarchical organized memory of causal relationships. As such, OCCAM is the first learning system with the ability to acquire, via empirical learning, the background knowledge required for explanation-based learning. Please note: This program runs on common lisp.

Travelling Languages John O'Regan,Jane Wilkinson,Mike Robinson,2015-10-14 Based on the commonly held assumption that we now live in a world that is 'on the move', with growing opportunities for both real and virtual travel and the blurring of boundaries between previously defined places, societies and cultures, the theme of this book is firmly grounded in the interdisciplinary field of 'Mobilities'. 'Mobilities' deals with the movement of people, objects, capital, information, ideas and cultures on varying scales, and across a variety of borders, from the local to the national to the global. It includes all forms of travel from forced migration for economic or political reasons, to leisure travel and tourism, to virtual travel via the myriad of electronic channels now available to much of the world's population. Underpinning the choice of theme is a desire to consider the important role of languages and intercultural communication in travel and border crossings; an area which has

tended to remain in the background of Mobilities research. The chapters included in this volume represent unique interdisciplinary understandings of the dual concepts of mobile language and border crossings, from crossings in 'virtual life' and 'real life', to crossings in literature and translation, and finally to crossings in the 'semioscape' of tourist guides and tourism signs. This book was originally published as a special issue of Language and Intercultural Communication.

Mr. Monk Is Open For Business Hy Conrad, 2014-06-03 Welcome to the series of original mysteries starring Adrian Monk--based on the hit USA Network series Monk, starring Tony Shaloub--the brilliant investigator who always knows when something's out of place.... Failing to win back his girlfriend in New Jersey, Monk returns to San Francisco where Natalie has set up an office for Monk and Teeger, Consulting Detectives. It's time to stop bickering and get to work when Lieutenant Amy Devlin comes to them for help. A disgruntled employee came into work and started shooting, killing three coworkers and leaving a female hostage severely wounded. After spotting the shooter through office windows, the police lost him--leaving Lieutenant Devlin with a real mess on her hands. Visiting the bedridden survivor, Monk finds her to be helpful, cooperative...and quite charming as well. But the more he and Natalie try to track down the assailant, the more he seems to have disappeared from existence altogether....

Miss Manners: On Placid Pregnancy Judith Martin, Jacobina Martin, 2015-02-03 Pregnancy is a time for happiness, serenity, and discovery, as well as a time for inappropriate tummy touching and over sharing by friends and relatives. Is it acceptable to give parenting advice to your daughter-in-law? To a stranger on the bus? Must one endure co-worker baby showers? Entertaining as well as brutally honest, Miss Manners likens pregnant women to low-tier celebrities, and offers not advice but pronouncements on the proper etiquette of behavior to and by moms-to-be in this e-book original. Winner of the National Humanities Medal for her social discourse in etiquette, Miss Manners transforms respectful behavior into a tool for everyday life. Go ahead and let your mother-in-law visit the hospital when the baby is born and resist correcting your best friend when she nicknames your unborn child "Nat-Nat." After all, Miss Manners reminds us, in a few months, you may need a babysitter.

Children's Reading Comprehension and Assessment Scott G. Paris,Steven A. Stahl,2005-03-23 Originating in a recent CIERA conference held at the University of Michigan, this book brings together the nation's most distinguished researchers to examine how readers understand text and how comprehension is assessed. The first part provides both national and historical contexts for the study of reading comprehension. The second part examines how vocabulary, motivation, and expertise influence comprehension, and it includes analyses of the developmental course and correlates of comprehension. Chapters in the third part consider how schools focus on comprehension for instruction and assessment. The fourth part includes chapters on large-scale assessment that analyze how test formats and psychometric characteristics influence measures of reading comprehension. At the end of each part is a commentary--written by an expert--that reviews the chapters, critiques the main points, and synthesizes critical issues. Key features of this outstanding new book include: *Integration of Research and Practice--provides a bridge between conceptual issues studied by researchers concerned with reading comprehension theories and practical issues addressed by educators concerned with classroom instruction and assessment. *Comprehension Focus--provides a thorough history and rigorous research-based analyses of reading comprehension. *Assessment Focus--provides innovative approaches to comprehension assessment that include the influences of vocabulary, decoding, and motivation. *Synthetic Commentaries--provides periodic summaries that analyze and synthesize research, practices, and issues discussed in each part. *Expertise--contributing authors and commentators are highly respected authorities on reading comprehension (see table of contents). This text is appropriate for educational and psychological researchers, reading educators, and graduate students in education and psychology. It is part of the CIERA series, which includes the following volumes: Taylor and Pearson: Teaching Reading: Effective Schools, Accomplished Teachers (2002) Van Kleeck, Stahl, and Bauer: On Reading Books to Children: Parents and Teachers (2003) Hoffman and Schallert: The Texts in Elementary Classrooms (2005)
