*From Pen to Pixel* Patrizia Fortini, Krupali Krusche, 2021-01-31 Efforts to build, rebuild and maintain the Forum Romanum, Rome's historic urban epicenter, are likely as old as the place it self - some 2800 years. As a result the historic significance and archaeological richness of the Forum cannot be overestimated. Despite its many changes the Forum Romanum's survival today represents an outstanding example of cultural heritage continuity. Its highest possible protection status among monuments conservation agencies in Italy and its early listing on UNESCO's World Heritage List in 1980 are testaments to this. Due to its remarkable physical survival, the Forum Romanum has been the object of extensive research, documentation, restoration and preservation efforts over the past two centuries especially. The sophistication of these measures evolved to include a wide range of expertise. Lay interest among antiquarians and architects in Rome's past from the Renaissance through the eighteenth century was supplanted by the emerging new disciplines of archaeology, architectural restoration and museology. From the late nineteenth century corresponding advancements in archaeological method and conservation theory and science were increasingly applied. From this time on as well, expectations for preserving and presenting the Forum Romanum were high, the famous site being a matter of intense Roman pride, political interest, and serving as a must see' destination for visitors to Rome. Leading historians, archaeologists and conservators have

been central to the story of the Forum's survival and interpretation. While numerous noted antiquarians and historians preceded him the architect and archaeologist Giacomo Boni (1859-1925) was unusual, even prescient, in his approach and treatment of the place during his tenure as director of excavations of the Forum Romanum from 1898 until 1925. His combined talents as an architect, archaeologist and conservator set a standard at the time for careful research, thorough documentation, and responsible conservation measures. The sponsors of the DHARMA conference have wisely chosen to focus on archaeological research and conservation in the Forum during Giacomo Boni's tenure since his work reflects early best practices' in researching, preserving and interpreting such places. To frame the discussion some precedents and influences of the work of Giacomo Boni are offered.

**Multimedia Networks** Hans W. Barz, Gregory A. Bassett, 2016-03-21 The transportation of multimedia over the network requires timely and errorless transmission much more strictly than other data. This had led to special protocols and to special treatment in multimedia applications (telephony, IP-TV, streaming) to overcome network issues. This book begins with an overview of the vast market combined with the user's expectations. The base mechanisms of the audio/video coding (H.26x etc.) are explained to understand characteristics of the generated network traffic. Further chapters treat common specialized underlying IP network functions which cope with multimedia data in conjunction with special time

adaption measures. Based on those standard functions these chapters can treat uniformly SIP, H.248, High-End IP-TV, Webcast, Signage etc. A special section is devoted to home networks which challenge high-end service delivery due to possibly unreliable management. The whole book treats concepts described in accessible IP-based standards and which are implemented broadly. The book is aimed at graduate students/practitioners with good basic knowledge in computer networking. It provides the reader with all concepts of currently used IP technologies of how to deliver multimedia efficiently to the end user.

 Apps machen den Smartphone-Markt so erfolgreich.  
 Jedoch reicht es heute nicht mehr aus, eine App  
 einfach nur zu veröffentlichen und auf den Erfolg  
 zu warten. Der Autor zeigt in diesem Buch alle  
 wichtigen Stellschrauben, an denen Sie drehen

 definiert durch Entscheidungen, die in einem ganz  
 frühen Stadium getroffen werden. So richten Sie  
 von Anfang an den Blick auf das Wesentliche und  
 legen durch eine strukturierte Arbeitsweise den  
 Grundstein für den Erfolg Ihrer App. Der zweite  
 Teil des Buches behandelt die erfolgreiche  
 Vermarktung nach Veröffentlichung der App. Sie

lernen verschiedene Marketing-Maßnahmen kennen und erfahren, wo Sie Ihre App am besten bewerben. Ein Kapitel zur Erfolgsmessung rundet das Buch ab. Das Buch richtet sich sowohl an Entwickler, die ihre eigene Idee umsetzen möchten, als auch an App-Publisher, die ihre Idee von externen Dienstleistern umsetzen lassen. Ebenfalls können Unternehmen von den Inhalten profitieren, die bereits online präsent sind und nun den Sprung in die mobile Welt wagen wollen. *EBOOK: Succeeding with your Master's Dissertation: A Step-by-Step Handbook* John Biggam, 2018-02-16 What do I need to do to write a literature, context or systematic review? How do I explain my research methods and write up my findings? Help! How do I prepare for a viva? This essential handbook carefully guides the student through the entire dissertation process from start to finish, offering clear, straightforward and practical advice. Biggam uses clear illustrations of what students should do- or not do - to reach their full potential, helping them to succeed with their dissertation and avoid common pitfalls along the way. Thoroughly updated, this popular book takes the student from research proposal, through literature reviews, research methods, and writing

up, referencing and avoiding plagiarism, through to submission and marking, featuring:

- New chapter on 'Introducing the Master's Dissertation' focusing on the skills you need to succeed
- New material on Contextual Review for computer science, art and performance art students
- Updated material on the benefits of using university library databases and social media in research
- Expanded advice on the emotional journey and where to find assistance and support
- New Research Methods chapter for art, drama and computer science students

This is key reading for any social science, business, humanities or healthcare student required to complete a dissertation as part of their studies. It will also prove useful for undergraduate students considering postgraduate studies and for supervisors facilitating dissertation supervision. This book is a really excellent and friendly guide through the Master's dissertation process. It is clearly and engagingly written and easily understandable to a student. It also guides students gently from a general understanding in the first chapter, down to a significant level of detail in each subsequent chapter with worked examples and relevant practical tips. It also usefully highlights common mistakes. The book presents a realistic view of undertaking a Master's degree, presenting the generic skills needed for success and acknowledging that life outside the dissertation is complex, messy, and can sometimes get in the way! It is particularly useful and relevant to my students as, unlike many other books on this topic, it does not ignore

practice-based forms of research, in fact the book includes a substantial chapter on practice-as-research in the creative disciplines. This chapter includes software alongside creative arts and is therefore particularly suitable for inter- or multi-disciplinary postgraduates using technology to enhance their existing understanding of a subject (or their practice) through research. I also really like the fact that the chapter on Abstracts is at the end (where it belongs!) and that students are explicitly told to write it last – no matter how many times I tell my students this, it is a common and recurring mistake! Daisy Abbott, School of Simulation and Visualisation, The Glasgow School of Art, UK

The dissertation component of a Master's programme can be very daunting for students. In this book John Biggam demystifies both the concept, and process of a dissertation. Biggam clearly explains the different parts of a dissertation, and offers a pragmatic structure which can be used by students to help frame their ideas. Also, the guidance given in the book is written in a reassuring tone which is never patronising. The summary on good practise in dissertation writing should be particularly useful during the planning stage, and as a final check for students. Dr Donna Murray SFHEA, Head of Taught Student Development, Institute for Academic Development, The University of Edinburgh, UK
