Smart Process Apps Jonathan Sapir,Peter Fingar,2013-11 The rise of the Smart Process App is not just another platform shift. It will profoundly change how people live and work, and how companies operate. How do SPAs help? They are light weight and easy to change. They assume mobile media (smart phones and tablets). They use big data, analytics and human collaboration to predict events and drive actions. And unlike ordinary mobile apps, they integrate and leverage core business systems. The Apple App Store has thousands of business apps that are barely used. The main reason? They lack a process layer. They do not interact well with existing information and

processes. So enter SPAs and a new era of competitive advantage in business. SPAs bring order and auditability to chaotic, unstructured, interdependent and extended processes that are currently executed primarily via email, spreadsheets and meetings. The goal of Smart Process Apps is to improve this messy range of human-based activities. Unlike structured processes, where automation can replace people, SPAs can enhance the capabilities of the people doing unstructured work. And because such work commonly provides the most value in modern organizations, improving unstructured business processes can generate the most competitive advantage today. SPAs support the way knowledge workers actually do their work, how they use their problem-solving skills, and how they make decisions that drive a process forward. Although this book is written as a crisp briefing for business executives, it also includes two technical appendices that provide guidance for SPA builders and IT staffs

Designing Efficient BPM Applications Christine McKinty,Antoine Mottier,2016-03-07 Looking for efficiency gains in your business? If you're a business analyst, this practical guide will show you how to design effective

business process management (BPM) applications. Every business uses business processes—these everyday tasks help you gain and retain customers, stay profitable, and keep your operations infrastructure functioning. BPM specialists Christine McKinty and Antoine Mottier show you step-by-step how to turn a simple business procedure into an automated, process-based application. Using hands-on examples, you'll quickly learn how to create an online process that's easy to use. Each chapter builds on earlier material. You don't have to have any programming experience to design business processes—and if you have skills in designing workflows and understanding human interactions with processes, you already have a headstart. Through the course of this book, you will: Build a prototype of an application page Create the most frequent use flow in a process, and define the data model Generate real process forms and produce the first version of the application Connect your application to external information systems, and then build and test the complete application

SAP Certified Application Associate - SAP Simple Finance Jay John,2016-05-11 SAP Certified Application Associate - SAP Simple Finance On Premise Edition 1503 These questions are similar to the ones asked in the actual Test. How should I know? I know, because although I have been working as an SAP Finance/Hana consultant for many years, I have myself recently certified with the latest version of the Certification test. Before you start here are some Key features of the Certification Exam. This certification exam verifies that the candidate has the knowledge required in the area of SAP Simple Finance. This certificate builds on basic consultant skills and experience that is then refined by practical experience during several projects. Candidates must also demonstrate understanding of System Architecture, how to prepare the system for migration, Accounting configuration and usage, Post migration activities and handling cash management. The exam is Computer based and you have three hours to to answer 80 Questions. The Questions are (mostly) multiple choice type and there is NO penalty for an incorrect answer. Some of the Questions have more than one correct answer. You must get ALL the options correct for you to be awarded points. For questions with a single answer, the answers will have a button next to them. You will be able to

select only one button. For questions with multiple answers, the answers will have a 'tick box' next to them. This allows you to select multiple answers. You are not allowed to use any reference materials during the certification test (no access to online documentation or to any SAP system).    Resale Price Maintenance and the Law Christy Kollmar,2023-03-31 The question of how to properly enforce against RPM has been a contentious debate for decades on both sides of the Atlantic. The catalyst is the acceptance that RPM can generate both anti-competitive effects and pro-competitive efficiencies that need to be properly balanced to ensure against Type I/Type II errors and to create viable legislation. Part I focuses on 100 years of US origins and the current legal approach to VR enforcement, which reveals the precedent responsible for the transition between per se illegality and the rule of reason thresholds at the federal level. Nine anti-competitive and 19 pro-competitive theoretical models are also introduced to clearly demonstrate the true nonconsensus existent between economists as to whether RPM is deleterious enough to justify a stringent approach to RPM regulation. Part II closely examines the EU origins and current legal structure, where RPM has maintained its hardcore by-object designation pursuant to Art. 101(1) TFEU with the consequence of having no safe harbours, no applicability of the De Minimus Doctrine, an onerous negative rebuttable presumption, non-severability of the agreement and almost no chance of obtaining an exemption under Art. 101(3). This is exacerbated by the EC's lack of guidance on how to prove all conditions necessary for an Art. 101(3) exemption and when a vertical arrangement actually escapes Art. 101(1) applicability. The aim of this book is to examine the economic models, historical origins and legal structures of the US/EU regimes to develop proposals on how to modify the EU's current legal structure to ensure proper enforcement of RPM behaviour that actually enhances legal certainty through a more aligned approach at the national level. Part III proposes five solutions which scrutinise the concepts of

appreciability, hardcore and by-object restraints, to implement modifications to EU's current legal framework to ensure RPM receives reasonable and equitable treatment in line with economic theory.
