Media Ownership and Control Suzanne Rab,Alison Sprague,2014-12-01 Competition and diversity in media and communications are fundamental to a healthy economy and democracy. In India and internationally there is no consensus on the exact manner and scope of interventions

that are appropriate to protect competition and pluralism in media markets. Many emerging economies including India are seeking to adopt their own regulation in this area taking their lead from the UK. The issues have been brought into sharp focus in India in recent years. First, the enactment and implementation of modern - but sector neutral - competition law under the Competition Act 2002 has caused a step change in regulation towards an economics and effects-based approach. Second, in 2013 the India telecoms regulator launched controversial reform proposals to apply a media-specific approach to ownership regulation. As academics, lawyers, businesses, regulators and policy-makers in India cast a glance at the international experience, this book examines the legal, economic and policy issues relating to regulation of ownership and control of media markets. The focus of comparative assessment is on examples from the European Union, EU Member States and the US.

Western Broadcast Models Leen Haenens, Frieda Saeys, 2007 CD-ROM includes data about general developments in broadcasting, specific examples and analysis techniques.

Sport, Public Broadcasting, and Cultural Citizenship Jay Scherer, David Rowe, 2013-08-15 This book examines the political debates over the access to live telecasts of sport in the digital broadcasting era. It outlines the broad theoretical debates, political positions and policy calculations over the provision of live, free-to-air telecasts of sport as a right of cultural citizenship. In so doing, the book provides a number of comparative case studies that explore these debates and issues in various global spaces.

Digital Media Sport Brett Hutchins, David Rowe, 2013-09-05 Live broadband streaming of the 2008 Beijing Olympics accounted for 2,200 of the estimated

3,600 total hours shown by the American NBC-Universal networks. At the 2012 London Olympics, unprecedented multi-platforming embraced online, mobile devices, game consoles and broadcast television, with the BBC providing 2,500 hours of live coverage, including every competitive event, much in high definition and some in 3D. The BBC also had 12 million requests for video on mobile phones and 9.2 million browsers on its mobile Olympics website and app. This pattern will only intensify at future sport mega events like the 2014 FIFA World Cup and 2016 Summer Olympics, both of which will take place in Brazil.

Increasingly, when people talk of the screen that delivers footage of their favorite professional sport, they are describing desktop, laptop, and tablet computer screens as well as television and mobile handsets. Digital Media Sport analyzes the intersecting issues of technological change, market power, and cultural practices that shape the contemporary global sports media landscape. The complexity of these related issues demands an interdisciplinary approach that is adopted here in a series of thematically-organized essays by international scholars working in media studies, Internet studies, sociology, cultural studies, and sport studies. .

Comprehensive Water Quality and Purification ,2013-09-24 Comprehensive Water Quality and Purification, Four Volume Set provides a rich source of methods for analyzing water to assure its safety from natural and deliberate contaminants, including those that are added because of carelessness of human endeavors. Human development has great impact on water quality, and new contaminants are emerging every day. The issues of sampling for water analysis, regulatory considerations, and forensics in water quality and purity investigations are covered in detail. Microbial as well as chemical contaminations from inorganic compounds, radionuclides, volatile and semivolatile compounds, disinfectants, herbicides, and pharmaceuticals, including endocrine disruptors, are treated extensively. Researchers must be aware of all sources of contamination and know how to prescribe techniques for removing them from our water supply. Unlike other works published to date that

concentrate on issues of water supply, water resource management, hydrology, and water use by industry, this work is more tightly focused on the monitoring and improvement of the quality of existing water supplies and the recovery of wastewater via new and standard separation techniques Using analytical chemistry methods, offers remediation advice on pollutants and contaminants in addition to providing the critical identification perspective The players in the global boom of water purification are numerous and varied. Having worked extensively in academia and industry, the Editor-in-Chief has been careful about constructing a work for a shared audience and cause

Sozialpartnerschaft und Industriepolitik Jürgen

Kädtler, Hans-Hermann Hertle, 2013-03-13 Die Studie analysiert den Wandel der Organisation und der Politik der IG Chemie-Papier-Keramik seit den siebziger Jahren. Als Leitimpulse dieses Wandels gelten das Auslaufen des Wachstums-Vollbeschäftigungs-Automatismus der bundesdeutschen Wirtschaftswundergesellschaft, die Politisierung industrieller Produktion durch eine gesellschaftlich breitenwirksame Ökologiekritik und die mit der Entwicklung zur Angestelltengesellschaft verbundenen gewerkschaftlichen Rekrutierungsprobleme. Die Aufnahme und Verarbeitung dieser Probleme durch die IG Chemie-Papier-Keramik erfolgt im Sinne einer branchenzentrierten Industriepolitik, die auf branchenwirtschaftliche Kooperation anstelle konflikthafter Interessendurchsetzung als zentrales Vertretungsmittel setzt. Diese Politik bildet eine Variante einer allgemeinen Tendenz, die branchenübergreifenden gewerkschaftspolitischen Positionen dauerhaft die Substanz entzieht.

Neue Wege in der Tarifpolitik Alexander Vogel, 2004 Der deutsche Arbeitsmarkt gestaltet sich seit geraumer Zeit zunehmend unübersichtlich - und das, obwohl eine

Institution besteht, deren Ziel die Wahrung der Ordnung am Arbeitsmarkt ist: der Flächentarif. Immer mehr Stimmen werden laut, die ihn in seiner jetzigen Ausgestaltung für Ausmaß und Persistenz der herrschenden Arbeitslosigkeit verantwortlich machen. Alexander Vogel widmet sich in diesem Zusammenhang der Frage, auf welcher Ebene Arbeitsbedingungen bereitzustellen sind. Als Analyse-Instrumentarium kommt die Clubtheorie zum Einsatz - die Arbeitsbedingungen stellen Clubgüter dar, Arbeitnehmer und Arbeitgeber schließen sich (freiwillig) in gemeinsamen Clubs zusammen. Es zeigt sich, daß die optimale, wertschöpfungsmaximierende Tarifebene durch ein hohes Maß an Homogenität ihrer Mitglieder charakterisiert ist. Demgegenüber steht die Entwicklung zu mehr Heterogenität bei Produktionsprozessen und Beschäftigten. Der Autor zeigt Handlungsoptionen für Tarifvertragsparteien und Gesetzgeber auf, die zur Lösung dieses Spannungsfelds beitragen können.
