**"Second Hand High, Third Hand Not so High"** James Marsh Sternberg MD, Danny Kleinman, 2021-07-13 "Second hand low" and "third hand high" are adages we learned in Bridge 101 along with others like "cover an honor with an honor" and "always return your partner's suit." These so-called rules will get you by, but they won't see you very far. Second hand must become familiar with certain basic positions to try to foil declarer's plans, often by playing second hand high. Likewise, many contracts are decided by the play of third hand at trick one. While your play may at first seem so obvious, a little thought may help you find the right card. Being a slave to either "second hand low" or "third hand high" can only lead you down the road to many disasters. Take time to review what you know from the bidding. Think about the hand type. Does it call for passive or aggressive defense? Hopefully after reading the examples in this book you will become more attuned to the variety of options available. The hands are placed in chapters by themes, but of course there is some overlap. We're sure you will recognize situations from your own experiences at the table. We're sure after reading this book you will be more attuned to becoming a thinking bridge player, and less a player just following old nursery rhymes.

**Simultaneous Horizontal and Cyclovertical Strabismus Surgery** M.H. Gobin, J.J.M Bierlaagh, 2012-12-06 Thirty years ago, our attention was drawn to the alphabetical incomitances in strabismus. As an elevation in adduction is the most frequent incomitance, we decided to start treating these incomitances. A weakening procedure of the inferior oblique muscle seemed indicated. However, since we wanted to prevent a torsional overcorrection with a head tilt, we displaced the scleral insertion of the oblique muscle towards the equator of the globe. This way, the torsional action of the muscles is saved. A weakening of the horizontal rectus muscles was systematically added, making it a simultaneous horizontal and cyclovertical surgery. Our way to deal with strabismus developed into a coherent entity and the interest of colleagues encouraged us to write it down. We decided to publish a textbook with a theoretical and an extensive practical part. Our approach is based on thirty years of exclusive strabological work, half-time academic and half-time private practice. More than 6500 results were analysed and the majority have been published. The concerned publications are referred to at the end of the first chapter. Private practice allowed to benefit from the fact that patients were operated on by the same surgeon and remained in personal contact during follow-up.

**Quiz Craze** Thomas A. DeLong, 1991-10-30 For more than fifty years, the quiz show has thrived on American television and radio. From Pot o' Gold and The \$64,000 Question to Wheel of Fortune and Jeopardy, quiz and game programs have entertained and informed millions of Americans, promoted and sold untold quantities of products, generated fortunes for their creators and producers, and filled the pockets of a multitude of jackpot winners. In this volume, Thomas DeLong offers the first in-depth history of quiz and game formats available in print. He describes how mass communications transformed the old parlor guessing games into enormously popular features on radio and television and examines their impact on American society and the consumer marketplace. DeLong also explores their decline in the wake of the quiz scandal inquiry of the late 1950s and their subsequent revival as new shows on daytime TV that began to build up a loyal following. Quiz Craze is enhanced by the recollections, insights, and anecdotes of many who brought the quiz show genre to listeners and viewers. Producers, directors, gamemakers, writers, emcees, panelists, and advertisers have added their first-hand observations on the inner workings and widespread influence of quiz show programming. Former contestants and their families offer reminiscences from shows such as To Tell the Truth, What's My Line?, Name That Tune, and many others. DeLong also draws on the resources of key organizations in the broadcast field, archival records, and published media reports to demonstrate the extraordinary popularity of the game show format.
