L'école à 2 ans : est-ce bon pour l'enfant ? Claire Brisset, 2006 En France, les enfants peuvent entrer en maternelle dès l'âge de 2 ans. C'est le moment où ils acquièrent leur individualité, où ils se construisent physiquement et psychologiquement. Ils organisent leurs relations avec leurs parents, puis avec le groupe et acquièrent le langage. Mais ce sont encore des « bébés » : ils ont besoin de sommeil, d'attention, de protection et d'affection. L'école d'aujourd'hui est-elle adaptée pour ces petits ? Quel est pour eux le meilleur mode d'accueil qui permet de respecter leurs besoins fondamentaux ? On sait que les étapes ultérieures du développement ne peuvent être réussies que si les précédentes se sont réalisées dans de bonnes conditions. Avant d'entrer à l'école, l'enfant doit acquérir sa sécurité interne. C'est une pièce essentielle du « droit à l'enfance ». Préface. Une école trop précoce Introduction. Respecter le temps du bébé Chapitre 1. La maîtrise linguistique, un enjeu essentiel qui dépasse l'école Chapitre 2. L'accueil de l'enfant de deux ans à l'école maternelle entre devoirs, vouloir et pouvoir Chapitre 3. Quel environnement pour les besoins spécifiques du développement d'un enfant entre deux et trois ans ? Chapitre 4. Quelles structures d'accueil pour les enfants de deux à trois ans ? Chapitre 5. Réflexions développementales et psychanalytiques sur la scolarisation précoce Chapitre 6. L'école à deux ans est un scandale... sauf si... Chapitre 7. La création de l'École de médecine du Nord de l'Ontario Geoffrey Tesson, Geoffrey Hudson, Roger Strasser, 2010 Rural and remote communities have long been challenging health care settings that rely on distant metropolises to supply their health workforce. The Northern Ontario School of Medicine, a pioneering faculty of medicine founded in 2005, was established to realise the potential of the rich learning environments found in such communities. This is the story of the establishment of a school of medicine that is part of a growing trend toward providing medical education that responds to the needs of remote populations and produces resourceful physicians capable of meeting those needs. Twelve contributors highlight the various aspects of the school's development and the unique opportunities it offers. The first new medical school in Canada in over thirty years, the Northern Ontario School of Medicine provides a blueprint for those interested in an innovative approach to medical education. This collection provides a fascinating and detailed account of the challenges and rewards faced by those who insisted on creating a patient-centred, community-based, and culturally sensitive learning environment for the physicians of tomorrow.

The École Royale Militaire Haroldo A. Guízar, 2020-08-24 This book explores the Paris Ecole Militaire as an institution, arguing for its importance as a school that presented itself as a model for reform during a key moment in the movement towards military professionalism as well as state-run secular education. The school is distinguished for being an Enlightenment project, one of its founders publishing an article on it in the Encyclopédie in 1755. Its curriculum broke completely with the Latin pedagogy of the dominant Jesuit system, while adapting the legacy of seventeenth-century riding academies. Its status touches on the nature of absolutism, as it was conceived to glorify the Bourbon dynasty in a similar way to the girls' school at Saint Cyr and the Invalides. It was also a dispensary of royal charity calculated to ally the nobility more closely to royal interests through military service. In the army, its proofs of nobility were the model for the much debated 1781 Ségur decree, often described as a notable cause of the French Revolution.

The Ecole Normale Supérieure and the Third Republic Robert J. Smith, 1981-06-30 The Ecole Normale Supérieure was founded during the Revolutionary era to dominate the educational structure of France. During the Third Republic, the French academic elite trained at the Ecole Normale Supérieure greatly expanded its national role and enhanced its prestige and influence. In this book, the first full treatment of the social and political history of the Ecole Normale Supérieure in recent times, Robert J. Smith has examined the changing world of the normaliens under the Third Republic and their new, but temporary, cultural and political importance. His comparative study of the social origins, education, political ideas, and careers of the normaliens and students of other grandes écoles documents the segmented character of French elites and indicates the evolution of French society during this period.

Handbook of American Private Schools , 1927 This handbook aims to be a guide to the best private schools of the country. It has been undertaken with the parent especially in mind, but it is hoped that it may be of value to school and college authorities and all others interested in the subject. It is believed that this Handbook is the first volume which attempts a critical and discriminating treatment of the private schools of the country. It is an endeavor to classify the schools on their merits -- at least a step, it is hoped, toward eventual standardization. - Editor's foreword.

School Blues Daniel Pennac, 2011-08-04 Daniel Pennac has never forgotten what it was like to be a very unsatisfactory student, nor the day one of his teachers saved his life by assigning him the task of writing a novel. This was the moment Pennac realized that no-one has to be a failure for ever. In School Blues, Pennac explores the many facets of schooling: how fear makes children reject education; how children can be captivated by inventive thinking; how consumerism has altered attitudes to learning. Haunted by memories of his own turbulent time in the classroom, Pennac enacts dialogues with his teachers, his parents and his own students, and serves up much more than a bald analysis of how young people are consistently failed by a faltering system. School Blues is not only universally applicable, but it is unquestionably a work of literature in its own right, driven by subtlety, sensitivity and a passion for pedagogy, while embracing the realities of contemporary culture.

Decorative Arts of the Tunisian École Jessica Gerschultz, 2019 Examines the gendering of tapestry and decorative arts in mid-twentieth-century Tunis, with a focus on how collaborations across art schools destabilized the boundary between art and craft as women gained entry into ateliers and workshops previously dominated by men. Explores how art and feminism were entwined with socialist modernizing projects i
