The United Nations under Dag Hammarskjöld, 1953-1961 Peter B. Heller, 2001-10-23 Organized around the major events that marked Hammarskjöld's eight and a half years in office, this volume takes stock of Hammarskjöld first as a person and then as an international functionary. Also included are a bibliography, chronology, index, and an appendix of significant documents.

Dag Prawitz on Proofs and Meaning Heinrich Wansing, 2014-11-27 This volume is dedicated to Prof. Dag Prawitz and his outstanding contributions to philosophical and mathematical logic. Prawitz's eminent contributions to structural proof theory, or general proof theory, as he calls it, and inference-based meaning theories have been extremely influential in the development of modern proof theory and anti-realistic semantics. In particular, Prawitz is the main author on natural deduction in addition to Gerhard Gentzen, who defined natural deduction in his PhD thesis published in 1934. The book opens with an introductory paper that

surveys Prawitz's numerous contributions to proof theory and proof-theoretic semantics and puts his work into a somewhat broader perspective, both historically and systematically. Chapters include either in-depth studies of certain aspects of Dag Prawitz's work or address open research problems that are concerned with core issues in structural proof theory and range from philosophical essays to papers of a mathematical nature. Investigations into the necessity of thought and the theory of grounds and computational justifications as well as an examination of Prawitz's conception of the validity of inferences in the light of three “dogmas of proof-theoretic semantics” are included. More formal papers deal with the constructive behaviour of fragments of classical logic and fragments of the modal logic S4 among other topics. In addition, there are chapters about inversion principles, normalization of p roofs, and the notion of proof-theoretic harmony and other areas of a more mathematical persuasion. Dag Prawitz also writes a chapter in which he explains his current views on the epistemic dimension of proofs and addresses the question why some inferences succeed in conferring evidence on their conclusions when applied to premises for which one already possesses evidence.

The Dag Brick Standard Brian D'Agostine, 2015-04-30 Using just your own pieces, you can create large novelty bricks of your very own! This book goes through the history and theory of creating the standard for these bricks, as well as many diagrams and instructions. By the end of the book you will be able to build your own collection of Dag Bricks. Nineteen full instructions are in the back to get you started. Then use them for decoration, party favors, paper weights and even your own organization system! New instructions are released occasionally and you can request them as well using the info in the book.

The Dag Gadol Pat O'Rourke, There were earlier civilizations that experienced and lived destinies. They understood the destinies and lived it. That you have neither read nor understand them does not amount to their nonexistence. They existed. Though reasonable people understand that hearsay testimonies are worthless, some Holy Book believers have used the New Testament reference to Jonah, a hearsay, as evidence that a whale, they mistakenly defined as a "fish," swallowed up an adult human being. Perhaps you've heard of the movie Jaws. This was no movie. Some say it was/is a myth. Incontrovertible science evidence says anyone in the belly of a whale would suffocate to death for lack of oxygen. A whale swallowed a human; can you see the anthropomorphism? Anthropomorphism and zoomorphism were some of the best methods to paint or represent an unknown object of discussion. It was the best vocabulary available to them at that time. A submarine scooping a human is akin to a whale that swallowed Jonah. Perhaps our perception of the past is not what it should be. Perhaps our perceptive truth of the past is jaundiced. Perhaps our knowledge of the past has been erroneously prioritized by the academics. Why would the academics do this? Remember that he who pays the piper dictates the tune. Obviously, we have been conditioned by the academics to accept that our civilization is better than earlier civilizations, therefore making it hard even to contemplate that there could have been better technologies in submarines before today. We are conditioned to totally accept that we are the center of the universe and the supreme beings of living things.

Developing a Protocol for Observational Comparative Effectiveness Research: A User's Guide Agency for Health Care Research and Quality (U.S.),2013-02-21 This User's Guide is a resource for investigators and stakeholders who develop and review observational comparative effectiveness research protocols. It explains how to (1) identify key considerations and best practices for research design; (2) build a protocol based on these standards and best practices; and (3) judge the adequacy and completeness of a protocol. Eleven chapters cover all aspects of research design, including: developing study objectives, defining and refining study questions, addressing the heterogeneity of treatment effect, characterizing exposure, selecting a comparator, defining and measuring outcomes, and identifying optimal data sources. Checklists of guidance and key considerations for protocols are provided at the end of each chapter. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews. More more information, please consult the Agency website: www.effectivehealthcare.ahrq.gov)

Dag Pike's Cruising Under Power Dag Pike,2012-04-23 The aim of this book is to enable novices to cruise safely and enjoyably. It will cover the preparations needed before undertaking a cruise, operating the boat under different and sometimes challenging conditions, how to cope when things go wrong, how to conform to the rules and

regulations, and how to navigate. It conveys the advice and information just as the cruiser will encounter it on passage - from setting off to arriving at their destination (rather than compartmentalised into navigation/weather/engine etc). Topics include: Preparing to cruise (weather forecasts, route planning, checklists); Leaving harbour (harbour entrances, radio contact, setting courses and speeds, crew briefing, food and drink); Assessing weather and sea conditions (fine tuning plans); Watch keeping under way (visual and electronic navigation, coping with alarms); Entering harbour (planning ahead, radio channels, finding an anchorage, speeds); Cruising at night and in fog (lights, radar, shipping lanes, stopping distance); Adventurous cruising (navigating inshore, beach landing, hidden dangers); Fuel management and economy (economical speeds, boat trim, reserves); Comfort on board (cooking and sleeping at sea, security); When things go wrong (potential problems, safety equipment, coping with fire, leaks, grounding, engine problems, calling for help); Rules and regulations (collision regulations, traffic lanes, going foreign, qualifications). Aimed at owners of powerboats and motor cruisers between 25 and 65ft, the book will be entirely practical, with checklists, sidebars and box-outs and many diagrams and photos.

Novel 11, Book 18 Dag Solstad, 2021-06-01 A brilliant novel by the Norwegian master Dag Solstad Bjorn Hansen, a respectable town

treasurer, has just turned fifty and is horrified by the thought that chance has ruled his life. Eighteen years ago he left his wife and their two-year-old son for his mistress, who persuaded him to start afresh in a small, provincial town and to devote himself to an amateur theater. In time that relationship also faded, and after four years of living alone Bjorn contemplates an extraordinary course of action that will change his life forever. He finds a fellow conspirator in Dr. Schiotz, who has a secret of his own and offers to help Bjorn carry his preposterous plan through to its logical conclusion. But the sudden reappearance of his son both fills Bjorn with new hope and complicates matters. The desire to gamble with his comfortable existence proves irresistible, however, taking him to Vilnius in Lithuania, where very soon he cannot tell whether he's tangled up in a game or reality. Dag Solstad won the Norwegian Critics Prize for Literature for *Novel 11, Book 18*, a concentrated uncompromising existential novel that puts on full display the author's remarkable gifts and wit.

Learning Apache Apex Thomas Weise, Munagala V. Ramanath, David Yan, Kenneth Knowles, 2017-11-30 Designing and writing a real-time streaming publication with Apache Apex About This Book Get a clear, practical approach to real-time data processing Program Apache Apex streaming applications This book shows you Apex integration with the open source Big Data ecosystem Who This Book Is For This book assumes knowledge of application development with Java and familiarity with distributed systems. Familiarity with

other real-time streaming frameworks is not required, but some practical experience with other big data processing utilities might be helpful. What You Will Learn Put together a functioning Apex application from scratch Scale an Apex application and configure it for optimal performance Understand how to deal with failures via the fault tolerance features of the platform Use Apex via other frameworks such as Beam Understand the DevOps implications of deploying Apex In Detail Apache Apex is a next-generation stream processing framework designed to operate on data at large scale, with minimum latency, maximum reliability, and strict correctness guarantees. Half of the book consists of Apex applications, showing you key aspects of data processing pipelines such as connectors for sources and sinks, and common data transformations. The other half of the book is evenly split into explaining the Apex framework, and tuning, testing, and scaling Apex applications. Much of our economic world depends on growing streams of data, such as social media feeds, financial records, data from mobile devices, sensors and machines (the Internet of Things - IoT). The projects in the book show how to process such streams to gain valuable, timely, and actionable insights. Traditional use cases, such as ETL, that currently consume a significant chunk of data engineering resources are also covered. The final chapter shows you future possibilities emerging in the streaming space, and how Apache Apex can contribute to it. Style and approach This book is divided into two major parts: first it explains what Apex is, what its relevant parts are, and how to write well-built Apex applications. The second part is entirely application-driven, walking you through Apex applications of increasing complexity.

The Dag's Dictionary Richard Glover,2004 What do you call clothes kept in the cupboard for years in the vain hope you'll fit into them once more? What's the name of the wild dance, first forward then backward, performed by standing passengers when a bus comes to a sudden halt? And what do you call the practice of following a conversation in order to spot the moment when you can jump in and make it all about yourself?The Dag's Dictionaryis a book about words that should exist -- but don't. With nearly 400 freshly minted words, and based on the hit ABC radio game, The Dag's Dictionaryis a hilarious trip into the delicious oddities of human behaviour.PS: The clothes are 'Hope Couture', the dance is a 'Bussa Nova', and the conversational hijacking is, of course, an 'I-jacking'.
