Good Boy Jennifer Finney Boylan,2020-04-21 From bestselling author of *She's Not There*, New York Times opinion columnist, and human rights activist Jennifer Finney Boylan, *Good Boy: My Life in Seven Dogs*, a memoir of the transformative power of loving dogs. This is a book about dogs: the love we have for them, and the way that love helps us understand the people we have been. It's in the love of dogs, and my love for them, that I can best now take the measure of the child I once was, and the bottomless, unfathomable desires that once haunted me. There are times when it is hard for me to fully remember that love, which was once so fragile, and so fierce. Sometimes it seems to fade before me, like breath on a mirror. But I remember the dogs. In her New York Times opinion column, Jennifer Finney Boylan wrote about her relationship with her beloved dog Indigo, and her wise, funny, heartbreaking piece went viral. In *Good Boy*, Boylan explores what should be the simplest topic in the world, but never is: finding and giving love. *Good Boy* is a universal account of a remarkable story: showing how a young boy became a middle-aged woman—accompanied at seven crucial moments of growth and transformation by seven memorable dogs. "Everything I know about love," she writes, "I learned from dogs." Their love enables us to pull off what seem like impossible feats: to find our way home when we are lost, to live our lives with humor and courage, and above all, to best become our true selves.

Recent Advances in Natural Language Processing III Nicolas Nicolov,Kalina Bontcheva,Galia Angelova,Ruslan Mitkov,2004-11-30 This volume brings together revised versions of a selection of papers presented at the 2003 International Conference on "Recent Advances in Natural Language Processing". A wide range of topics is covered in the volume: semantics, dialogue, summarization, anaphora resolution, shallow parsing, morphology, part-of-speech tagging, named entity, question answering, word sense disambiguation, information extraction. Various 'state-of-the-art' techniques are explored: finite state processing, machine learning (support vector machines, maximum entropy, decision trees, memory-based learning, inductive logic programming, transformation-based learning, perceptions), latent semantic analysis, constraint programming. The papers address different languages (Arabic, English, German, Slavic languages) and use different linguistic frameworks (HPSG, LFG, constraint-based DCG). This book will be of interest to those who work in computational linguistics, corpus linguistics, human language technology, translation studies, cognitive science, psycholinguistics, artificial intelligence, and informatics.

Bread Toast Crumbs Alexandra Stafford,2017-04-04 With praise from Dorie Greenspan, Jim Lahey, and David Lebovitz, the definitive bread-baking book for a new generation. But this book isn't just about baking bread-- it's about what to do with the slices and heels and nubs from those many loaves you'll bake. Alexandra Stafford grew up eating her mother's peasant bread at nearly every meal—the recipe for which was a closely-guarded family secret. When her blog, *Alexandra's Kitchen*, began to grow in popularity, readers started asking how to make the bread they'd heard so much about; the bread they had seen peeking into photos. Finally, Alexandra's mother relented, and the recipe went up on the internet. It has since inspired many who had deemed bread-baking an impossibility to give it a try, and their results have exceeded expectations. The secret is in its simplicity: the no-knead dough comes together in fewer than five minutes, rises in an hour, and after a second short rise, bakes in buttered bowls. After you master the famous peasant bread, you'll work your way through its many variations, both in flavor (Cornmeal, Jalapeno, and Jack; Three Seed) and form (Cranberry Walnut Dinner Rolls; Cinnamon Sugar Monkey Bread). You'll enjoy bread's usual utilities with Food Cart Grilled Cheese and the Summer Tartine with Burrata and Avocado, but then you'll discover its true versatility when you use it to sop up Mussels with Shallot and White Wine or juicy Roast Chicken Legs. Finally, you'll find ways to savor every last bite, from Panzanella Salad Three Ways to Roasted Tomato Soup to No-Bake Chocolate-Coconut Cookies. *Bread, Toast, Crumbs* is a 2018 nominee for The IACP Julia Child First Book Award, and *Alexandra's Kitchen* was a finalist for the Savor Blog Awards Most Inspired Weeknight Dinners 2016

Of Mice and Men John Steinbeck,1937 Tells a story about the strange relationship of two migrant workers who are able to realize their dreams of an easy life until one of them succumbs to his weakness for soft, helpless creatures and strangles a farmer's wife.

Electrooptical Arrays Dmitrii I. Voskresenskii,Aleksandr I. Grinev,Evgenii N. Voronin,2013-06-29 Modern radar, telecommunication, sonar, and radio-astronomy systems use integrated systems, complex signals, and signal processing methods extensively. These systems require the development of new, more efficient systems. One of the major ways to improve radar and sonar systems is to use multichannel systems, the most promising of which employ space-time signal processing. In the last few years the intensive growth in electronics, information processing techniques, microwave and laser technology, electrooptics and holography, acoustics, and optoelectronics have resulted in new scientific and technological research fronts. One of these is the theory and technology of electrooptical array antennas—a new class of receiving antennas whose pattern is controlled by means of coherent optics and holography. Electrooptical array theory and technology have been involved in the study of the power, resolution, and range characteristics of arrays with various coherent optical processors. The practical applications of these systems and methods for building them using contemporary optoelectronics have also been studied.

SRAM Design for Wireless Sensor Networks Vibhu Sharma,Francky Catthoor,Wim Dehaene,2012-07-27 This book features various, ultra low energy, variability resilient SRAM circuit design techniques for wireless sensor network applications. Conventional SRAM design targets area efficiency and high performance at the increased cost of energy consumption, making it unsuitable for computation-intensive sensor node applications. This book, therefore, guides the reader through different techniques at the circuit level for reducing energy consumption and increasing the variability resilience. It includes a detailed review of the most efficient circuit design techniques and trade-offs, introduces new memory architecture techniques, sense amplifier circuits and voltage optimization methods for reducing the impact of variability for the advanced technology nodes.

A Good Neighborhood Therese Anne Fowler,2020-03-10 INSTANT NEW YORK TIMES BESTSELLER * One of NPR's Best Books of 2020 A provocative, absorbing read. — People "A feast of a read... I finished *A Good Neighborhood* in a single sitting. Yes, it's that good." —Jodi Picoult, #1 New York Times bestselling author of *Small Great Things* and *A Spark of Light* In Oak Knoll, a verdant, tight-knit North Carolina neighborhood, professor of forestry and ecology Valerie Alston-Holt is raising her bright and talented biracial son, Xavier, who's headed to college in the fall. All is well until the Whitmans—a family with new money and a secretly troubled teenage daughter—raze the house and trees next door to build themselves a showplace. With little in common except a property line, these two families quickly find themselves at odds: first, over an historic oak tree in Valerie's yard, and soon after, the blossoming romance between their two teenagers. *A Good Neighborhood* asks big questions about life in America today—what does it mean to be a good neighbor? How do we live alongside each other when we don't see eye to eye?—as it explores the effects of class, race, and heartrending love in a story that's as provocative as it is powerful.
