Plunkett,2007-07 The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More

camera-equipped cell phones are sold each year than stand alone digital cameras. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Gaming Culture(s) in India Aditya

Deshbandhu, 2020-05-13 This volume critically analyzes the multiple lives of the gamer in India. It explores the everyday of the gaming life from the player's perspective, not just to understand how the games are consumed but also to analyze how the gamer influences the products' many (virtual) lives. Using an intensive ethnographic approach and in-depth interviews, this volume situates the practice of gaming under a broader umbrella of digital leisure activities and foregrounds the proliferation of gaming as a new media form and cultural artifact; critically questions the term gamer and the many debates surrounding the gamer tag to expand on how the gaming identity is constructed and expressed; details participants' gaming habits, practices and contexts from a cultural perspective and analyzes the participants' responses to

emerging industry trends, reflections on playing practices and their relationships to friends, communities and networks in gaming spaces; and examines the offline and online spaces of gaming as sites of contestation between developers of games and the players. A holistic study covering one of the largest video game bases in the world, this volume will be of great interest to scholars and researchers of cultural studies, media and communication studies and science and technology studies, as well as be of great appeal to the general reader.
