History Is in the Land T. J. Ferguson, Chip Colwell, 2015-09-01 Arizona's San Pedro Valley is a natural corridor through which generations of native peoples have traveled for more than 12,000 years, and today many tribes consider it to be part of their ancestral homeland. This book explores the multiple cultural meanings, historical interpretations, and cosmological values of this extraordinary region by combining archaeological and historical sources with the ethnographic perspectives of four contemporary tribes: Tohono O'odham, Hopi, Zuni, and San Carlos Apache. Previous research in the San Pedro Valley has focused on scientific archaeology and documentary history, with a conspicuous absence of indigenous voices, yet Native Americans maintain oral traditions that provide an anthropological context for interpreting the history and archaeology of the valley. The San Pedro Ethnohistory Project was designed to redress this situation by visiting archaeological sites, studying museum collections, and interviewing tribal members to collect traditional histories. The information it gathered is arrayed in this book along with archaeological and documentary data to interpret the histories of Native American occupation of the San Pedro Valley. This work provides an example of the kind of interdisciplinary and politically conscious work made possible when Native Americans and archaeologists collaborate to study the past. As a methodological case study, it clearly articulates how scholars can work with Native American stakeholders to move beyond confrontations over who "owns" the past, yielding a more nuanced, multilayered, and relevant archaeology.

The American College and University Frederick Rudolph, 1990 First published in 1962, Frederick Rudolph's groundbreaking study, *The American College and University*, remains one of the most useful and significant works on the history of higher education in America. Bridging the chasm between

educational and social history, this book was one of the first to examine developments in higher education in the context of the social, economic, and political forces that were shaping the nation at large. Surveying higher education from the colonial era through the mid-twentieth century, Rudolph explores a multitude of issues from the financing of institutions and the development of curriculum to the education of women and blacks, the rise of college athletics, and the complexities of student life. In his foreword to this new edition, John Thelin assesses the impact that Rudolph's work has had on higher education studies. The new edition also includes a bibliographic essay by Thelin covering significant works in the field that have appeared since the publication of the first edition. At a time when our educational system as a whole is under intense scrutiny, Rudolph's seminal work offers an important historical perspective on the development of higher education in the United States.

Search History Eugene Lim, 2021-10-05 *Search History* oscillates between a wild cyberdog chase and lunch-date monologues as Eugene Lim deconstructs grieving and storytelling with uncanny juxtapositions and subversive satire. Frank Exit is dead—or is he? While eavesdropping on two women discussing a dog-sitting gig over lunch, a bereft friend comes to a shocking realization: Frank has been reincarnated as a dog! This epiphany launches a series of adventures—interlaced with digressions about AI-generated fiction, virtual reality, Asian American identity in the arts, and lost parents—as an unlikely cast of accomplices and enemies pursues the mysterious canine. In elliptical, propulsive prose, *Search History* plumbs the depths of personal and collective consciousness, questioning what we consume, how we grieve, and the stories we tell ourselves.

History Comes Alive M. J. Rymysz-Pawlowska, 2017-10-03 During the 1976 Bicentennial celebration, millions of Americans engaged with the past in brand-new ways. They became absorbed by historical miniseries like *Roots*, visited museums with new exhibits that immersed them in the past, propelled works of historical fiction onto the bestseller list, and participated in living history events across the nation. While many of these activities were sparked by the Bicentennial, M. J. Rymysz-Pawlowska shows that, in fact, they were symptomatic of a fundamental shift in Americans' relationship to history during the 1960s and 1970s. For the majority of the twentieth century, Americans thought of the past as foundational to, but separate from, the present, and they learned and thought about history in informational terms. But Rymysz-Pawlowska argues that the popular culture of the 1970s reflected an emerging desire to engage and enact the past on a more emotional level: to consider the feelings and motivations of historic individuals and, most importantly, to use this in reevaluating both the past and the present. This thought-provoking book charts the era's shifting feeling for history, and explores how it serves as a foundation for the experience and practice of history making today.

All the People Joy Hakim, 2003 Covers the period of American history from 1945 to 1998, from the end of World War II to the Clinton administration.
