Hong Kong Grows as a Regional Intellectual Property Market ,2012

Business Opportunities in Hong Kong U. S. Department U.S. Department of Commerce,2014-09-09 Amid a weak, uneven global economic recovery, the Hong Kong economy grew moderately in 2013. Hong Kong, a Special Administrative Region of the People's Republic of China (PRC) since its reversion in 1997, has proven in past economic crises to be exceptionally resilient. Dominant and sustained drivers of economic growth include private consumption (retail), logistics and business services, financial services, real estate development (bolstered by ongoing public infrastructure works), and tourism. Hong Kong has benefited from continued economic integration with mainland China's strong economy. In particular, Beijing's policy of opening its service sector and gradually expanding the scope of the offshore renminbi (RMB - the PRC's currency) market in Hong Kong and the sustained high numbers of mainland Chinese visitors have strengthened Hong Kong's economy. Hong Kong is an ideal platform for doing business in Asia, especially for mainland China. Hong Kong is a free port that does not levy any customs tariff and has limited excise duties. Its strong rule of law and respect for property rights make it a strategic platform for U.S. companies, especially small- and medium-sized firms, seeking to do business in Asia. Hong Kong's statutory trade promotion body, the Trade Development Council, seized upon this unique positioning to create the Pacific Bridge Initiative in late-2010, the first such agreement with a foreign government affiliate to explicitly support the U.S. National Export Initiative (NEI). Hong Kong's businesses enjoy close links to mainland China and the rest of Asia. According to Hong Kong Government statistics, there are 1,339 subsidiaries of U.S. parent companies in Hong Kong, making the United States the largest source of subsidiaries in Hong Kong. Among those U.S. subsidiaries, 822 are regional headquarters or regional offices.

Hong Kong Stephen Chiu,Tai-Lok Lui,2009-06-09 Hong Kong is a small city with a big reputation. As mainland China has become an 'economic powerhouse' Hong Kong has taken a route of development of its own, flourishing as an entrepot and a centre of commerce and finance for Chinese business, then as an industrial city and subsequently a regional and international financial centre. This volume examines the developmental history of Hong Kong, focusing on its rise to the status of a Chinese global city in the world economy. Chiu and Lui's analysis is distinct in its perspective of the development as an integrated process involving economic, political and social dimensions, and as such this insightful and original book will be a core text on Hong Kong society for students.

Trade, Industrial Restructuring and Development in Hong Kong Ho Yin-Ping,2016-07-27 Focusing on trade in manufactures, industrial restructuring and economic development and enforced by a rich source of data, this book offers an in-depth examination of the evolution and characteristics of Hong Kong's postwar economy. The book presents an historical and comparative perspective and analyses the symbiotic connection with South China in the light of China's open-door policy since late 1970s, as well providing a thoughtful assessment of its current turning point.

Trade and Investment in China Jim Slater,Roger Strange,Limin Wang,2002-09-11 China is under close scrutiny both as a market that could provide massive returns to investors and because of its potential to become the most powerful economy in Asia. This new study examines the economic relationship between China and Europe, its importance and how it is likely to evolve. The book considers the flow of trade, direct investment and technology transfer and contains case studies of manufacturing industries (automobiles, toys, watches, telecommunications) banking and insurance. The trade relationship between Europe and China is being re-evaluated by both sides and this is a valuable contribution to that process.
