Hermes' Dilemma and Hamlet's Desire Vincent Crapanzano, 1992 In essays that question how the human sciences, particularly anthropology and psychoanalysis, articulate their fields of study, Crapanzano addresses nothing less than the enormous problem of defining the self in both its individual and collective projections.

Cultural Theory and Cultural Change Mike Featherstone, 1992 Recent years have seen a significant reappraisal of the idea of culture within the social sciences, and a growing integration of theoretical concerns between the social sciences and the humanities. Debates over concepts such as postmodernism and cultural globalization have been symptomatic of a broader interdisciplinary interest in the social context of cultural practice. In this book an international cast of eminent theorists examines a series of key questions on the borders of the cultural and the social. Ranging across a broad canvas, the contributors focus on different elements of cultural theory and cultural process: discourse, lifestyle, the emotions, the intelligentsia, social movements, postmodernism. Linking the chapters is a concern with the central role of European social theory in the current reappraisal of culture, and an assessment of its relation to other international traditions. This book, for an interdisciplinary readership, will serve as an outline of key concerns in cultural theory and an insight into the central insights of Theory, Culture and Society. The book is also published as issue 9.1 of Theory, Culture and

Society.

Urban Acupuncture Jaime Lerner, 2016-02-02 During his three terms as mayor of Curitiba, Brazil in the 1970s and '80s, architect and urbanist Jaime Lerner transformed his city into a global model of the sustainable and livable community. From the pioneering Bus Rapid Transit system to parks designed to catch runoff and reduce flooding, and the creation of pedestrian-only zones, Lerner has been the driving force behind a host of innovative urban projects. In more than forty years of work in cities around the globe, Lerner has found that changes to a community don't need to be large-scale and expensive to have a transformative impact—in fact, one block, park, or a single person can have an outsized effect on life in the surrounding city. In *Urban Acupuncture*, Lerner celebrates these “pinpricks” of urbanism—projects, people, and initiatives from around the world that ripple through their communities to uplift city life. With meditative and descriptive prose, Lerner brings readers around the world to streets and neighborhoods where urban acupuncture has been practiced best, from the bustling La Boqueria market in Barcelona to the revitalization of the Cheonggyecheon River in Seoul, South Korea. Through this journey, Lerner invites us to re-examine the true building blocks of vibrant communities—the tree-lined avenues, night vendors, and songs and traditions that connect us to our cities and to one another. *Urban Acupuncture* is the first of Jaime Lerner's visionary work to be published in English. It is a love letter to the elements that make a street hum with life or a neighborhood feel like home, penned by one of the world's most successful advocates for sustainable and livable urbanism.
