Citizens of the World Margit Warburg,2018-08-14 This general monograph on the Baha'is and their religion places new emphasis on the sociology of contemporary Baha'i, including a thorough case study of a European Baha'i community and of the life at the Baha'i World Centre.

Baha'i and Globalisation Annika Hvithamar,Margit Warburg,Morten Warmind,2005-12-01 Globalisation has become a buzzword that typically refers to the intensifying integration of the world economy, especially as midwifed by technological advances. It also implies a growing political and cultural sense that all humanity is globally interdependent. There have always been individuals of course who have advocated such awareness, one of them being the founder of the Baha'i faith, who formulated a spiritual equivalent as the religion's central doctrine in the late 19th century: Ye are the fruits of one tree, and the leaves of one branch. Its emphasis on global unification made Baha'i an obvious candidate for a case study on new religions and globalisation. The chapters in this volume fall into two sections, diachronic and synchronic. The first part is organised chronologically, beginning with the emergence of the globalist tendency in the messianic vision of Babism, the precursor to Baha'i, and concluding with an analytic history of its leaders' changing attitudes to international politics. The second part considers a variety of global themes in contemporary Baha'i practice, including global thought in Baha'i writings, the impact of the internet, and the triumphalist and secular strains in Baha'i identity. Though five million members make it one of the world's most successful new religions, Baha'i has attracted little scholarly attention. Most of the academics concentrating on Baha'i have contributed to this volume, which will appeal not only to students of modern religious movements, but to anyone interested in the ways religions can adapt to - and embrace - the modern world.

The Baha'i Faith in America William Garlington,2005-08-30 The Baha'i Faith in America sets out to accomplish two main goals. The first is to introduce to the American reading public a religion whose name may be commonly mentioned or heard, yet in terms of its unique history, world-view, beliefs, and laws, is virtually unknown. Such categories provide the essential material for Part I. The second objective, which is the uniting thread of Part II, is to trace the historical development of the American Baha'i community from its earliest beginnings at the end of the nineteenth century up until the present day. The chapters in this section not only peruse the major events and introduce the leading personalities associated with American Baha'i history, they also trace significant themes, motifs, and issues that have characterized the community over the decades. Examples include early Baha'i connections with both American millennialism and metaphysical esotericism, to more recent associations with the Civil Rights Movement and the 1960s youth counterculture. In addition, the book's final chapters take a close look at some of the more controversial issues that have characterized American Baha'i community life over the past few decades. Here issues ranging in content from disagreements over differing styles of propogation to the freedom of expression allowed to Baha'i scholars are examined. In the process, the work reveals a dynamic and highly idealistic faith that is attempting to offer a model of religious community that is compatible with the continuing process of globalization.

The Black Urban Community G. Tate,2019-06-12 This book explores the many facets of black urban life from its genesis in the 18th century to the present time. With some historical background, the volume is primarily a contemporary critique, focusing on the major themes which have arisen and the challenges they confront African Americans as they create communities: political economy, religion and spirituality, health care, education, protest, and popular culture. The essays all examine the interplay between culture and politics, and the ways in which forms of cultural expression and political participation have changed over the past century to serve the needs of the black urban community. The collection closes with analysis of current struggles these communities face - joblessness, political discontent, frustrations with health care and urban schools - and the ways in which communities are responding to these challenges.

Chalabi,2006-02-06 Tamara Chalabi highlights the development of a 'politics of demand' and the increased political activism of this community in a time of great change. Fundamentalism in the Modern World Vol 1 Ulrika Martensson,Jennifer Bailey,Priscilla Ringrose,Asbjorn Dyrendal,2001-11-22 How does religious fundamentalism operate in modern global society? This two-volume series analyses the dynamics of fundamentalism and its relationship to the modern state, the public sphere and globalisation. In this first volume, fundamentalism is approached from the perspective of state and community building, ideology and practices within the context of global society, and the ways in which fundamentalism is intertwined with issues of politics, state power, democracy, globalization, political activism and political ideology. Expert scholars in the field address specific contemporary and past fundamentalist movements that have emerged from within mainstream Islam, Christianity, Baha'ism, Hinduism, Judaism and Buddhism. This is an important study of an increasingly significant and controversial aspect of modern society, and will be essential reading in the fields of Religion, Politics and International Relations.
