Deadly Artifact Eugene Allen Wilson,2007-03 On Monday, September 17, 1860, near Carbonwood, a small mining town located in Northern California, tragedy strikes. Mine worker Silas Jeremiah Baldwin is killed after an unusually bizarre encounter with another individual. Baldwin's death initiates a series of historical events that will in time allow three modern day high school teenagers to come into possession of two devices. The second device, a gravitational force-based weapon called the extraspatial otivicon, is inconceivably more powerful than any other weapon in the known galaxy. The teenager's possession of this device is bringing upon them adverse difficulties, even as police officials and military officials are after them. Yet, a greater threat is facing them all. Two enormously powerful, yet opposing alien forces are coming to retrieve this fearsome device. Inadvertently, these teenagers have found themselves caught in the middle of a raging interstellar conflict that has engulfed numerous inhabited worlds and is precipitating the rise of a galactic empire. In a high-suspense story spanning four centuries and involving numerous planetary civilizations; the creation of the galaxy's most powerful weapon, murderous betrayal and one individual's insatiable craving for absolute power are the explosive catalysts that is pushing the entire inhabited galaxy toward its deadliest conflict.

Napoleon's Conquest of Europe Frederick C. Schneid,2005-05-30 Poised to strike at England in the summer of 1805, Napoleon found himself facing a coalition of European powers determined to limit his territorial ambitions. Still, in less than one hundred days, Napoleon's armies marched from the English Channel to Central Europe, crushing the armies of Austria and Russia—the first step in his conquest of Europe. In this telling new account, Schneid demonstrates how this was possible. Schneid details how Napoleon's victory over the Third Coalition was the product of years of diplomatic preparation and the formation of French alliances. He played upon the prevailing conditions of the European state system and the internal politics of the Holy Roman Empire to improve France's strategic position. This war must be understood in the context of the French Revolution and its influence on major and minor European states. In some cases, Napoleonic diplomacy returned to France's traditional and historic relationships; in others, he capitalized upon longstanding competition and animosities to gather allies and create wedges. Schneid approaches the campaign from a broad diplomatic, economic, and military perspective, including not only the French perspective, but the points of view of the other powers involved as well. This telling account reveals that the road to Vienna was paved long before Napoleon's armies marched upon the enemies arrayed against them.

Celibacy and Religious Traditions Carl Olson,2008 For an educated, general readership and for use in college courses, this text introduces the role of celibacy, or a lack of it, in various religious traditions, and the contributors present the rationale for its observance (or not) within the context of each tradition.

Manual of Brazilian Portuguese Linguistics Johannes Kabatek,Albert Wall,2022-10-24 This manual is the first comprehensive account of Brazilian Portuguese linguistics written in English, offering not only linguists but also historians and social scientists new insights gained from the intensive research carried out over the last decades on the linguistic reality of this vast territory. In the 20 overview chapters, internationally renowned experts give detailed yet concise information on a wide range of language-internal as well as external synchronic and diachronic topics. Most of this information is the fruit of large-scale language documentation and description projects, such as the project on the

linguistic norm of educated speakers (NURC), the project “Grammar of spoken Portuguese”, and the project “Towards a History of Brazilian Portuguese” (PHPB), among others. Further chapters of high contemporary interest and relevance include the study of linguistic policies and psycholinguistics. The manual offers theoretical insights of general interest, not least since many chapters present the linguistic data in the light of a combination of formal, functional, generative and sociolinguistic approaches. This rather unique feature of the volume is achieved by the double authorship of some of the relevant chapters, thus bringing together and synthesizing different perspectives.

Children's Home Musical Experiences Across the World Beatriz Ilari, Susan Young, 2016-09-06 This book offers a fresh and diverse perspective on home musical activities of young children from a variety of countries, including; Brazil, Denmark, Greece, Israel, Kenya, the Netherlands, Singapore, Spain, South Africa, Taiwan, the UK, and the United States. Narrowing their

study to seven-year-olds from middle-class families, the articles in this volume argue that home musical experiences provide new and important windows into musical childhoods as they relate to issues of identity, family life, gender, culture, social class and schooling. Though childhood musical engagement differs considerably, it has direct implications for a better understanding of music education and childhood development. Using a wiki to share data and research across time and space, this volume is a model for collaborative cross-cultural research and is centered on the home as a primary research site for children's musical engagement.

Iter Italicum: Italy: Orvieto to Volterra. Vatican City Paul Oskar Kristeller, 1963

Parenting Musically Lisa Huisman Koops, 2019-11-01 Parents use music in family life to accomplish practical tasks, make relational connections, and guide their children's musical development. *Parenting Musically* portrays the musicking of eight diverse Cleveland-area families in home, school, and community settings. Themes from interviews focused on the families' hopes and dreams for their children musically, as well as the families' perceptions of media messages regarding parents and music, serve to deepen the documentation of how families use and perceive music in their daily lives. Family musical interactions are analyzed using the concepts of musical parenting (actions to support a child's musical development) and parenting musically (using music to accomplish extra-musical parenting goals), arguing the importance of recognizing and valuing both modes. An additional construct, practical/relational musicking, adds to the detailed analysis of family musical engagement. Practical musicking refers to musicking for a practical purpose, such as learning a scale or passing the time in a car; relational musicking is musicking that deepens relationships with self, siblings, parents, or community members, such as a grandmother singing to her grandchildren via Facetime as a way to feel connected. Families who embraced both practical and relational musicking expressed satisfaction in long-term musical involvement. Weaving together themes of conscious and intuitive parenting, the rewards and struggles of musical practice, and the role of mutuality in community musicking, the discussion draws on research in music education, psychology, family studies, and sociology. This book serves to highlight the multi-faceted nature of families' engagement in music; the author urges music education practitioners and administrators to consider this diversity when approaching curricular decisions. Written in a style accessible to laypersons, this book will interest a wide range of music educators as well as families, community members, and scholars and practitioners in family studies, psychology, and sociology.
