**Because I Love You** Max Lucado, 1999-02-03 A long time ago a wise man named Shaddai built a wonderful village for children to live in. He talked to them and sang for them and told them stories. He gave them everything they needed. And with his own hands Shaddai built a protective wall around their village, rock by rock. He did all of this for just one reason—because he loved them. One day Paladin, the village's most curious child, discovers something troubling about the wall. Something that makes him wonder about Shaddai's love. Could there be a mistake? Young Paladin is about to discover the answer. And when he does, he will come to understand just how deeply he is loved. And so will you. Everything God does for your children, He does because of love. He protects them. He listens to their prayers. He provides for their needs. He even gives warnings and sets boundaries—for no other reason than love. As an adult you already know this. Now your children can know it too through this captivating tale, which was first published in the award-winning children's bestseller *Tell Me the Story*. Let this timeless story of a curious boy's choice and a caring man's sacrificial response help you make the infinite love of their Heavenly Father as real to your kids as your own love. Because they need to understand about Him what you have already learned—that everything God does throughout our lives, He does for one reason only, and for the best reason of all: Because I Love You.

**Information Security: "I LOVE YOU" Computer Virus Emphasizes Critical Need for Agency and Governmentwide Improvements** ,2000 ILOVEYOU is both a virus and worm. Worms propagate themselves through networks; viruses destroy files and replicate themselves by manipulating files. The damage resulting from this particular hybrid- which includes overwhelmed e-mail systems and lost files-is limited to users of the Microsoft Windows operating system. ILOVEYOU typically comes in the form of an e-mail message from someone the recipient knows with an attachment called LOVE-LETTER-FOR-YOU. TXT. VBS. The attachment is a Visual Basic Script (VBS) file.<sup>2</sup> As long as recipients do not run the attached file, their systems will not be affected and they need only to delete the e-mail and its attachment. When opened and allowed to run, however, ILOVEYOU attempts to send copies of itself using Microsoft Outlook (an electronic mail software program) to all entries in all of the recipient's address books, infect the Internet Relay Chat (IRC) program so that the next time a user starts chatting on the Internet, the worm can spread to everyone who connects to the chat server, search for picture, video, and music files and overwrite or replace them with a copy of itself, and install a password-stealing program that will become active when the recipient opens Internet Explorer and reboots the computer. (Internet accounts set up to collect this information were reportedly disabled early Friday). In short, ILOVEYOU looks a lot like Melissa in operation: it comes via e-mail; it attacks Microsoft's Outlook; it's a hybrid between a worm and a virus; and it does some damage-but it mostly excels at using the infected system to e-mail copies of itself to others. The one main difference is that it proliferated much faster than Melissa because it came during the work week, not the weekend. Moreover, ILOVEYOU sent itself to everyone on the recipient's e-mail lists, rather than just the first 50 addressees as Melissa did.

**PS, I Love You** Cecelia Ahern,2008-09-04 Meaningful and moving – THE classic million-copy bestselling love story from Cecelia Ahern.

*You Look Like a Thing and I Love You* Janelle Shane,2019-11-05 As heard on NPR's Science Friday, discover the book recommended by Malcolm Gladwell, Susan Cain, Daniel Pink, and Adam Grant: an accessible, informative, and hilarious introduction to the weird and wonderful world of artificial intelligence (Ryan North). *You look like a thing and I love you* is one of the best pickup lines ever . . . according to an artificial intelligence trained by scientist Janelle Shane, creator of the popular blog AI Weirdness. She creates silly AIs that learn how to name paint colors, create the best recipes, and even flirt (badly) with humans—all to understand the technology that governs so much of our daily lives. We rely on AI every day for recommendations, for translations, and to put cat ears on our selfie videos. We also trust AI with matters of life and death, on the road and in our hospitals. But how smart is AI really... and how does it solve problems, understand humans, and even drive self-driving cars? Shane delivers the answers to every AI question you've ever asked, and some you definitely haven't. Like, how can a computer design the perfect sandwich? What does robot-generated Harry Potter fan-fiction look like? And is the world's best Halloween costume really Vampire Hog Bride? In this smart, often hilarious introduction to the most interesting science of our time, Shane shows how these programs learn, fail, and adapt—and how they reflect the best and worst of humanity. *You Look Like a Thing and I Love You* is the perfect book for anyone curious about what the robots in our lives are thinking. I can't think of a better way to learn about artificial intelligence, and I've never had so much fun along the way. —Adam Grant, New York Times bestselling author of *Originals*
