### **Two Decades of Adult T-cell Leukemia and HTLV-I Research**

Kazuo Sugamura,2003 In April 2001, the Japanese Cancer Association was privileged to host a symposium in Kyoto to commemorate the twentieth anniversary of the discovery of the viral pathogenesis of adult T-cell leukemia (ATL). In this monograph, the editors have selected not only papers presented at the symposium but also eminent papers of several individuals from around the world who have extensively researched human T-cell-leukemia virus type I (HTLV-I), the etiological virus of ATL, over the years. During the last two decades, HTLV-I was molecularly characterized as harboring a variety

of oncogenic properties in its Tax protein. Epidemiological studies not only revealed the existence of HTLV-I-endemic areas in the world, but also disclosed the routes of transmission. Despite these great strides, the mechanisms of ATL development have not yet been fully clarified, and viable therapeutic measures are still to be established. This monograph contains recent exciting achievements in molecular virology, epidemiology, immunology and therapeutic trials as well as historical profiles of HTLV-I and HTLV-I-associated diseases.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF

books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers.
