Focus Carol Ann Muller, 2008 First Published in 2008. Routledge is an imprint of Taylor & Francis, an informa company.

Focus: Music of South Africa Carol A. Muller, 2010-04-15 Focus: Music of South Africa provides an in-depth look at the full spectrum of South African music, a musical culture that epitomizes the enormous ethnic, religious, linguistic, class, and gender diversity of the nation itself. Drawing on extensive field and archival research, as well as her own personal experiences, noted ethnomusicologist and South African native Carol A. Muller looks at how South Africans have used music to express a sense of place in South Africa, on the African continent, and around the world. Part One, Creating Connections, provides introductory materials for the study of South African Music. Part Two, Musical Migrations, moves to a more focused overview of significant musical styles in twentieth-century South Africa -- particularly those known through world circuits. Part Three, Focusing In, takes the reader into the heart of two musical cultures with case studies on South African jazz and the music of the Zulu-language followers of Isaiah Shembe. The accompanying downloadable resources offer vivid examples of traditional, popular, and classical South African musical styles.

Beyond the Saga of Rocket Science Walter Sierra, 2019-10-03 In Space to Stay, the third book in the spell-binding The Saga of Rocket Science series, gives a thorough exposé of the U.S. Apollo and Space Shuttle programs. You will be there as Gus Grissom, Ed White, and Roger Chaffee perish and get incinerated inside their locked Apollo 1 capsule; when Jim Lovell, Jack Swigert, and Fred Haise didn't know if they would make it back alive aboard a freezing lunar module on Apollo 13; as Neil and Buzz experienced the euphoria of being the first humans to land on the Moon, while Mike Collins in lunar orbit and an anxious world looked on. You'll see the same panoramic vistas of the lunar landscape and the beautiful blue marble we call Earth as the astronauts saw. You are taken inside the Challenger Space Shuttle as it caught fire and disintegrated in flight. What seven brave astronauts felt like as they plunged to their deaths in a basically intact crew cockpit. You'll understand exactly what failed and how it failed on both the Challenger and the ill-fated Columbia space shuttles, and why another seven astronauts aboard the Columbia felt no pain despite their grisly annihilation during reentry.

The New Housekeeper's Manual Catharine Esther Beecher, Harriet Beecher Stowe, 2013-04-16 Published in 1873 in New York, The New Housekeeper's Manual was written by Catharine Esther Beecher and her sister Harriet Beecher Stowe, two of the most influential women writers and activists of their time. Both women exerted profound influence on American letters and on the shape of American domestic life and educational reform. The book combines two works by the sisters in one volume. The American Woman's Home: Or Principles of Domestic Science describes kitchen and home design, coping with kitchen appliances and newly invented gadgets, cooking healthful food and drink, caring for the sick with medical recipes, and gardening with plants and domestic animals. The Handy Cook-Book is a "complete, condensed guide to wholesome, economical, and delicious cooking with nearly 500 choice and tested recipes." The authors assert that their extensive manual was designed specifically for middle-class housewives, versus others written for women with money and servants. It includes housekeeping information and dishes for every occasion that the practical-minded housewife might need. The New Housekeeper's Manual was well received and had over 25 printings in 25 years. This edition of The New Housekeeper's Manual was reproduced by permission from the volume in the collection of the American Antiquarian Society, Worcester, Massachusetts. Founded in 1812 by Isaiah Thomas, a Revolutionary War patriot and successful printer and publisher, the Society is a research library documenting the life of Americans from the colonial era through 1876. The Society collects, preserves, and makes available as complete a record as possible of the printed materials from the early American experience. The cookbook collection includes approximately 1,100 volumes

Tropical Ecology John C. Kricher, 2011-02-28 A comprehensive introduction to tropical ecology This full-color illustrated textbook offers the first comprehensive introduction to all major aspects of tropical ecology. It explains why the world's tropical rain forests are so universally rich in species, what factors may contribute to high species richness, how nutrient cycles affect rain forest ecology, and how ecologists investigate the complex interrelationships among flora and fauna. It covers tropical montane ecology, riverine ecosystems, savanna, dry forest—and more. Tropical Ecology begins with a historical overview followed by a sweeping discussion of

biogeography and evolution, and then introduces students to the unique and complex structure of tropical rain forests. Other topics include the processes that influence everything from species richness to rates of photosynthesis: how global climate change may affect rain forest characteristics and function; how fragmentation of ecosystems affects species richness and ecological processes; human ecology in the tropics; biodiversity; and conservation of tropical ecosystems and species. Drawing on real-world examples taken from actual research, Tropical Ecology is the best textbook on the subject for advanced undergraduates and graduate students. Offers the first comprehensive introduction to tropical ecology Describes all the major kinds of tropical terrestrial ecosystems Explains species diversity, evolutionary processes, and coevolutionary interactions Features numerous color illustrations and examples from actual research Covers global warming, deforestation, reforestation, fragmentation, and conservation The essential textbook for advanced undergraduates and graduate students Suitable for courses with a field component Leading universities that have adopted this book include: Biola University Bucknell University California State University, Fullerton Colorado State University - Fort Collins Francis Marion University Michigan State University Middlebury College Northern Kentucky University Ohio Wesleyan University St. Mary's College of Maryland Syracuse University Tulane University University of California, Santa Cruz University of Central Florida University of Cincinnati University of Florida University of Missouri University of New Mexico University of North Carolina at Chapel Hill University of the West Indies
