Txtng: The Gr8 Db8 David Crystal, 2009-07-09 This book takes a long hard look at the text-messaging phenomenon and its effects on literacy, language, and society. Young people who seem to spend much of their time texting sometimes appear unable or unwilling to write much else. Media outrage has ensued. It is bleak, bald, sad shorthand, writes a commentator in the UK Guardian. It masks dyslexia, poor spelling, and mental laziness. Exam answers using textese and reports that examiners find them acceptable have led to headlines in the tabloids and leaders in the qualities. Do young people text as much as people think? Do adults? Does texting spell the end of literacy? Is there a panic in the media? David Crystal looks at the evidence. He investigates how texting began and who uses it, why and what for. He shows how to interpret its mix of pictograms, logograms, abbreviations, symbols, and wordplay, and how it works in different languages. He explores the ways similar devices have been used in different eras and discovers that the texting system of conveying sounds and meaning goes back a long way, all the way in fact to the origins of writing - and he concludes that far from hindering literacy, texting may turn out to help it. The Cell Phone Reader Anandam P. Kavoori, Noah Arceneaux, 2006 The Cell Phone Reader offers a diverse, eclectic set of essays that examines how this rapidly evolving technology is shaping new media cultures, new forms of identity, and media-centered relationships. The contributors focus on a range of topics, from horror films to hip-hop, from religion to race, and draw examples from across the globe. The Cell Phone Reader provides a road map for both scholars and beginning students to examine the profound social, cultural and international impact of this small device.

Short Message Service (SMS) Friedhelm Hillebrand, 2010-01-21 Contributions from Finn Trosby, Kevin Holley, Ian Harris Written to celebrate the 25th anniversary of SMS standardization by the people who produced the standards, Short Message Service (SMS): The Creation of Personal Text Messaging, describes the development of the SMS standard and its ongoing evolution. The standardization of SMS started in February 1985 as a part of the creation of the second generation digital cellular system GSM, and the 25th anniversary of the first work on SMS provides an opportunity to review and understand how this service was developed. The book also looks to the future, as a large number of new GSM and evolved GSM phones will support SMS as a mass market high availability messaging service, a new simple Multimedia Messaging Service (MMS) suitable for use by everyone and for implementation in every new terminal is proposed. One of the only books which covers the complete SMS genesis from concept ideas to standardization of a first technical solution and its evolution to the present day. Describes the service concept including the limitation of the message length to 160 characters and explains the rationale behind the concept. Based on existing and newly retrieved documentation. Concludes that SMS has a long future since most future GSM phones will support SMS as the only messaging service, and so an SMS evolution is put forward.

The M-Factor Lynne C. Lancaster, David Stillman, 2010-04-06 From Lynne C. Lancaster and David Stillman, the nationally recognized generational experts and authors of *When Generations Collide*, comes the definitive guide to “Millennials” (those born between 1982 and 2000) in the workplace—what they want, how they think, and how to unlock their talents to your organization’s

advantage. If you enjoyed the insights in It's Okay to Be the Boss, you need to read The M-Factor, destined to become "the" business book on this Millennial generation in the workplace.

**Smart Mobs** Howard Rheingold, 2007-03-21 From Tokyo to Helsinki, Manhattan to Manila, Howard Rheingold takes us on a journey around the world for a preview of the next techno-cultural shift-a shift he predicts will be as dramatic as the widespread adoption of the PC in the 1980s and the Internet in the 1990s. The coming wave, says Rheingold, is the result of super-efficient mobile communications-cellular phones, personal digital assistants, and wireless-paging and Internet-access devices that will allow us to connect with anyone, anywhere, anytime. From the amusing (Lovegetty devices in Japan that light up when a person with the right date-potential characteristics appears in the vicinity) to the extraordinary (the overthrow of a repressive regime in the Philippines by political activists who mobilized by forwarding text messages via cell phones), Rheingold gives examples of the fundamentally new ways in which people are already engaging in group or collective action. He also considers the dark side of this phenomenon, such as the coordination of terrorist cells, threats to privacy, and the ability to incite violent behavior. Applying insights from sociology, artificial intelligence, engineering, and anthropology, Rheingold offers a penetrating perspective on the brave new convergence of pop culture, cutting-edge technology, and social activism. At the same time, he reminds us that, as with other technological revolutions, the real impact of mobile communications will come not from the technology itself but from how people use it, resist it, adapt to it, and ultimately use it to transform themselves, their communities, and their institutions.

**Histories of the Future** Daniel Rosenberg, Susan Harding, 2009-01-01 We live in a world saturated by futures. Our lives are constructed around ideas and images about the future that are as full and as flawed as our understandings of the past. This book is a conceptual toolkit for thinking

about the forms and functions that the future takes. Exploring links between panic and nostalgia, waiting and utopia, technology and messianism, prophecy and trauma, it brings together critical meditations on the social, cultural, and intellectual forces that create narratives and practices of the future. The prognosticators, speculators, prophets, and visionaries have their say here, but the emphasis is on small narratives and forgotten conjunctures, on the connections between expectation and experience in everyday life. In tightly linked studies, the contributors excavate forgotten and emergent futures of art, religion, technology, economics, and politics. They trace hidden histories of science fiction, futurism, and millennialism and break down barriers between far-flung cultural spheres. From the boardrooms of Silicon Valley to the forests of Java and from the literary salons of Tokyo to the roadside cafés of the Nevada desert, the authors stitch together the disparate images and stories of futures past and present. *Histories of the Future* is further punctuated by three interludes: a thought-provoking game that invites players to fashion future narratives of their own, a metafiction by renowned novelist Jonathan Lethem, and a remarkable graphic research tool: a timeline of timelines. Contributors. Sasha Archibald, Susan Harding, Jamer Hunt, Pamela Jackson, Susan Lepselter, Jonathan Lethem, Joseph Masco, Christopher Newfield, Elizabeth Pollman, Vicente Rafael, Daniel Rosenberg, Miryam Sas, Kathleen Stewart, Anna Tsing
