Introduction to Google Translate Gilad James, PhD, Google Translate is a multilingual translation service provided by Google. It allows users to translate words, phrases, and entire documents between multiple languages. The service was launched in April 2006 and has since been constantly updated to provide more accurate translations. Initially offering translations in only two languages, Google Translate now supports over 100 languages. The translation process works by analyzing the text or document input by the user, breaking it up into smaller segments, and then using statistical algorithms to match these segments with translations from its database. Google Translate has been a helpful tool for people to communicate across different languages, whether it be for business or personal use. However, it must be noted that automated translations often carry a high risk of inaccuracies due to the complexities inherent in language and the nuances of different cultures and contexts. It is always recommended to use translations as a starting point, and then have a native speaker review and refine the language to ensure accuracy.

Defence Speeches Cicero, 2001-01-04 'But I must stop now. I can no longer speak for tears - and my client has ordered that tears are not to be used in his defence.' Cicero (106-43 BC) was the greatest orator of the ancient world: he dominated the Roman courts, usually appearing for the defence. His speeches are masterpieces of persuasion: compellingly written, emotionally powerful, and sometimes hilariously funny. This book presents five of his most famous defences: of Roscius, falsely accused of murdering his father; of the consul-elect Murena, accused of electoral bribery; of the poet Archias, on a citizenship charge; of Caelius, ex-lover of Clodia Metelli, on charges of violence; and of Milo, for murdering Cicero's hated enemy Clodius. Cicero's clients were rarely whiter-than-white; but so seductive is his oratory that the reader cannot help taking his side. In these speeches we are plunged into some of the most exciting courtroom dramas of all time. These new translations preserve Cicero's literary artistry and emotional force, and achieve new standards of accuracy. Each speech has its own introduction, and a general introduction discusses Cicero's public career and the criminal courts. The substantial explanatory notes guide the reader through the speeches, and offer new scholarship presented in a clear way.

Issues in the Multilingual Information Processing of Spoken Political and Journalistic Texts Christina Alexandris, 2020-01-21 From television screens to mobile phones, spoken political and journalistic texts in the media are accessible to recipients of almost any kind, including the international public. These texts constitute a remarkable source of empirical data for human behaviour and for linguistic phenomena, but pose significant challenges in terms of their evaluation, processing and translation due to a set of distinctive characteristics. This volume presents and describes a number of features of spoken political and journalistic texts, and proposes strategies for their correct and efficient analysis and processing both by human evaluators and by Natural Language Processing applications. The book also discusses the accessibility of “complex” information content and transfer for an international audience, as well as the visibility of the speaker’s attitude and intentions.
