Quay Walls, Second Edition J.G. de Gijt, M.L. Broeken, 2013-12-02 This new edition of the handbook of Quay Walls provides the reader with essential knowledge for the planning, design, execution and maintenance of quay walls, as well as general information about historical developments and lessons learned from the observation of ports in various countries. Technical chapters are followed by a detailed calculation of a quay wall based on a semi-probabilistic design procedure, which applies the theory presented earlier. Since the publication of the Dutch edition in 2003 and the English version in 2005, considerable new experience has been obtained by the many practitioners using the book, prompting the update of this handbook. Moreover, the introduction of the Eurocodes in 2012 has prompted a complete revision of the Design chapter, which is now compliant with the Eurocodes. Furthermore, additional recommendations for using FEM-analysis in quay wall design have been included. In response to ongoing discussions within the industry about buckling criteria for steel pipe piles, a thorough research project was carried out on steel pipe piles filled with sand and on piles without sand. The results of this research programme have also been incorporated in this new version. Finally, the section on corrosion has been updated to reflect the latest knowledge and attention has been given to the latest global developments in quay wall engineering. The new edition was made possible thanks to the contributions of numerous experts from the Netherlands and Belgium.

Risk, Reliability and Safety: Innovating Theory and Practice Lesley Walls, Matthew Revie, Tim Bedford, 2016-11-25 The safe and reliable performance of many systems with which we interact daily has been achieved through the analysis and management of risk. From complex infrastructures to consumer durables, from engineering systems and technologies used in transportation, health, energy, chemical, oil, gas, aerospace, maritime, defence and other sectors, the management of risk during design, manufacture, operation and decommissioning is vital. Methods and models to support risk-informed decision-making are well established but are continually challenged by technology innovations, increasing interdependencies, and changes in societal expectations. Risk, Reliability and Safety contains papers describing innovations in theory and practice contributed to the scientific programme of the European Safety and Reliability conference (ESREL 2016), held at the University of Strathclyde in Glasgow, Scotland (25–29 September 2016). Authors include scientists, academics, practitioners, regulators and other key individuals with expertise and experience relevant to specific areas. Papers include domain specific applications as well as general modelling methods. Papers cover evaluation of contemporary solutions, exploration of future challenges, and exposition of concepts, methods and processes. Topics include human factors, occupational health and safety, dynamic and systems reliability modelling, maintenance optimisation, uncertainty analysis, resilience assessment, risk and crisis management.

A Dictionary of Ila Usage, 1860–1960 Dennis G. Fowler,2000 This book is based on material collected by missionaries at Kasenga Mission in Zambia. Edwin Smith began in 1901 to note each new Ila word, together with illustrative sentences dictated by his Ila informants. Later missionaries continued this practice, so that in 1959 the author found a mass of over 12,000 items already collected. As the largest body of Ila ever assembled, the dictionary offers much of interest in several fields. The language has a consistent agglutinative structure of great sophistication, logical as Latin, flexible as Greek. The speakers reveal not merely the preoccupations of daily existence in Ila villages a century ago, but an outlook both sensitive and wryly humorous. Feared in battle, fearful of spirits, revering God; hunters of lion and buffalo, polygamous, romantic, ribald in men's company, but highly proper in women's, tender towards children, with a high regard for the arts of hospitality, conversation, and love, the Baila spring with verve from these pages. Appendices list nearly 2,000 synonyms, 276 proverbs, 164 metaphors, 216 customs, 400 trees with their medicinal uses, 290 plants, 150 birds, and grammatical tables.

Imaging Systems for Medical Diagnostics Arnulf Oppelt,2011-02-25 The book provides a comprehensive compilation of fundamentals, technical solutions and applications for medical imaging systems. It is intended as a handbook for students in biomedical engineering, for medical physicists, and for engineers working on medical technologies, as well as for lecturers at universities and engineering schools. For qualified personnel at hospitals, and physicians working with these instruments it serves as a basic source of information. This also applies for service engineers and marketing specialists. The book starts with the representation of the physical basics of image processing, implying some knowledge of Fourier transforms. After that, experienced authors describe technical solutions and applications for imaging systems in medical diagnostics. The applications comprise the fields of X-ray diagnostics, computed tomography, nuclear medical diagnostics, magnetic resonance imaging, sonography, molecular imaging and hybrid systems. The Ila Speaking Dennis G. Fowler,2002 The Ila Speaking is a record of life in a Central African village around a century ago. It originated in conversations recorded by Methodist missionaries as they attempted to learn the language and customs of the Ila people. Over the years 1906 to 1966 they collected over 12000 items. What began as a vocabulary with examples ended as the self-portrait of a

people and a way of life. The author worked with the Ila from 1958 to 1966, later producing a Dictionary of Ila Usage (LIT Verlag 2000). The present book is a series of extracts from the dictionary arranged by subject, with a commentary. It is the author's hope that 'the voices come over loud and clear to you the reader, and that you come away from this book with a feel for Ila humour, Ila life, and Ila reflections on people and their ways. I did, and I am sure you will too' (Professor Graham Furniss, School of Oriental and African Studies - London).
