**Steve Parker**

**Tumford's Rude Noises** Nancy Tillman, 2012-09-18

Tumford isn't really a terrible cat. It's just, like many children, Tum loves to make loud noises. But today, his parents are not in the mood. They have friends coming over and Tummy isn't just loud. No, Tumford is rude! This charming tale from the multiple New York Times bestselling author Nancy Tillman is sure to delight readers everywhere, as she once again reaffirms that – no matter how much trouble you may get into – you are loved.

*Night Noises* Mem Fox, 1989 Lily Laceby is nearly 90 and lives in a remote cottage with her dog, Butch Aggie. One wild winter night she drifts off to sleep. As she dreams peacefully of bygone days, Butch Aggie stirs, hackles raised, hearing strange noises. Who could be out on such a night? But Lily opens the door to a lovely surprise. A delightfully suspenseful story that children will enjoy again and again. Copyright © Libri GmbH. All rights reserved.

*Pink Noises* Tara Rodgers, 2010-03-23 *Pink Noises* brings together twenty-four interviews with women in electronic music and sound cultures, including club and radio DJs, remixers, composers, improvisers, instrument builders, and installation and performance artists. The collection is an extension of [pinknoises.com](http://pinknoises.com), the critically-acclaimed website founded by musician and scholar Tara Rodgers in 2000 to promote women in electronic music and make information about music production more accessible to women and girls. That site featured interviews that Rodgers conducted with women artists, exploring their personal histories, their creative methods, and the roles of gender in their work. This book offers new and lengthier interviews, a critical introduction, and resources for further research and technological engagement. Contemporary electronic music practices are illuminated

through the stories of women artists of different generations and cultural backgrounds. They include the creators of ambient soundscapes, “performance novels,” sound sculptures, and custom software, as well as the developer of the Deep Listening philosophy and the founders of the Liquid Sound Lounge radio show and the monthly Basement Bhangra parties in New York. These and many other artists open up about topics such as their conflicted relationships to formal music training and mainstream media representations of women in electronic music. They discuss using sound to work creatively with structures of time and space, and voice and language; challenge distinctions of nature and culture; question norms of technological practice; and balance their needs for productive solitude with collaboration and community. Whether designing and building modular synthesizers with analog circuits or performing with a wearable apparatus that translates muscle movements into electronic sound, these artists expand notions of who and what counts in matters of invention, production, and noisemaking. *Pink Noises* is a powerful testimony to the presence and vitality of women in electronic music cultures, and to the relevance of sound to feminist concerns. Interviewees: Maria Chavez, Beth Coleman (M. Singe), Antye Greie (AGF), Jeannie Hopper, Bevin Kelley (Blevin Blectum), Christina Kubisch, Le Tigre, Annea Lockwood, Giulia Loli (DJ Mutamassik), Rekha Malhotra (DJ Rekha), Riz Maslen (Neotropic), Kaffe Matthews, Susan Morabito, Ikue Mori, Pauline Oliveros, Pamela Z, Chantal Passamonte (Mira Calix), Maggi Payne, Eliane Radigue, Jessica Rylan, Carla Scaletti, Laetitia Sonami, Bev Stanton (Arthur Loves Plastic), Keiko Uenishi (o.blaat)

*Noise* Daniel Kahneman, Olivier Sibony, Cass R. Sunstein, 2021-05-18 From the Nobel Prize-winning author

of Thinking, Fast and Slow and the coauthor of Nudge, a revolutionary exploration of why people make bad judgments and how to make better ones—a tour de force” (New York Times). Imagine that two doctors in the same city give different diagnoses to identical patients—or that two judges in the same courthouse give markedly different sentences to people who have committed the same crime. Suppose that different interviewers at the same firm make different decisions about indistinguishable job applicants—or that when a company is handling customer complaints, the resolution depends on who happens to answer the phone. Now imagine that the same doctor, the same judge, the same interviewer, or the same customer service agent makes different decisions depending on whether it is morning or afternoon, or Monday rather than Wednesday. These are examples of noise: variability in judgments that should be identical. In *Noise*, Daniel Kahneman, Olivier Sibony, and Cass R. Sunstein show the detrimental effects of noise in many fields, including medicine, law, economic forecasting, forensic science, bail, child protection, strategy, performance reviews, and personnel selection. Wherever there is judgment, there is noise. Yet, most of the time, individuals and organizations alike are unaware of it. They neglect noise. With a few simple remedies, people can reduce both noise and bias, and so make far better decisions. Packed with original ideas, and offering the same kinds of research-based insights that made *Thinking, Fast and Slow* and *Nudge* groundbreaking New York Times bestsellers, *Noise* explains how and why humans are so susceptible to noise in judgment—and what we can do about it.

Earsplitters! Steve Parker, 2008 Presents the science behind sound including dragster races, rock concerts, and rockets--Provided by publisher.

### The Big Noise and Other Noises Christopher

Kudyahakudadirwe, 2019-02-11 From The frightening Big Noise of the approaching caterpillars sent by government to build a new dam; to the thundering Other Noises of the caterpillars, again sent by government to destroy their shacks; and to the graduates playing soccer wearing full regalia in the streets of Harare, life for the average citizen has never been the same. Then the 93-year-old president, Robert Mugabe, was forced to announce his resignation, and Tonderai, one of his secret agents skips the country fearing for his life. Of course, that was after another big noise that saw armoured cars and many people filling the streets of the capital, rejoicing that the dictator had been deposed. Before that there were other noises that frightened people away from their homes, but this time the noises that frightened people were made by those who had silenced the big noise. A confusion reigned. Graduates were jobless. People fled the country to other countries to become political as well as economic refugees.

**What's that Noise? What's that Sound?** Morris Lurie, Terry Denton, 1991 Children's book, copiously illustrated in colour by Terry Denton, about a small boy troubled by the noises in his house while he is trying to sleep. Written by the well-known author of 'TRappaport' and 'TFlying Home'.

Street Noises Adrian Rifkin, 1995 Street Noises combines the diverse materials of mass culture with literary and archival sources, to produce an innovative and critical re-reading of twentieth-century Paris as the city of the people and of cultural modernity. It concentrates on popular song and opera, cultural theory and records of police surveillance (such as the unpublished archives concerning the sexual mores of sailors in Toulon), sensational weekly magazines (including the weekly

Detective Magazine with its remarkable photomontage) and writers of the Academie Goncourt. The author picks out their common realisation of the experience of the city, also showing how the faits divers and the entertainment industries frame the writing of a Benjamin, a Colette or a Genet. Rifkin re-works modern critical theory through these sources, reflecting on its relation to the production of mass cultures.

Mechanical Sound Karin Bijsterveld, 2008 Tracing efforts to control unwanted sound--the noise of industry, city traffic, gramophones and radios, and aircraft--from the late nineteenth to the late twentieth century.

**Ambient Noise in the Sea** Robert J. Urick, 1984

Physiological Effects of Noise Bruce Welch, 2012-12-06  
The remarkable symposium arranged by Bruce L. Welch and Annemarie S. Welch for the meeting of the American Association for the Advancement of Science in Boston, Massachusetts at the end of the year 1969 was devoted to the physiological effects of audible sound. Dr. Welch and his wife were able to bring together a distinguished group of scientists from all parts of the world. It was very remarkable to be able to discuss the physiological aspects of noise with representative scientists from Israel, France, Germany, Hungary, Russia, Australia, Canada and Argentina. Dr. and Mrs. Welch ran the meeting in a delightful manner and continued to maintain interest and enthusiasm. Now the results of the conference are available. It is to be hoped that this volume will find wide interest and attention. We must differentiate noise from sound. Noise is unpleasant, unwanted or intolerable sound. On the other hand, even ordinary sound may at times be unpleasant, simply because we are not conditioned to it. The general impression that one gets from reading the various reports on the physiological effects of noise is bad.

It's a pollutant that we can each individually reduce, and maybe we can have a great enough effect socially so that we can significantly lower the noise levels which may result in considerable harm to us. It is interesting that noise as a pollutant has only recently attracted attention.

Animal Noises Joe Pedley, 2000 Different farm animals make different noises.

Noise, Noise Sensitivity and Psychiatric Disorder Stephen A. Stansfeld, 1992 This monograph reports on two important studies of noise sensitivity. They are a six-year follow-up study of a group of highly noise-sensitive and low noise-sensitive women and a longitudinal study examining changes in noise sensitivity with recovery from depression.

Noises Off Michael Frayn, 2021-01-14 "As finely worked as a Swiss watch and as funny as the human condition permits..the zigzag brilliance of the text as the clunky lines of the farce-within-a-farce rub against the sharp dialogue of reality" Guardian A play-within-a-play following a touring theatre company who are rehearsing and performing a comedy called *Nothing On*, results in a riotous double-bill of comedic craft and dramatic skill. Hurting along at breakneck speed it shows the backstage antics as they stumble through the dress-rehearsal at Weston-super-Mare, then on to a disastrous matinee at Ashton-under-Lyne, followed by a total meltdown in Stockton-on-Tees. Michael Frayn's irresistible, multi-award-winning backstage farce has been enjoyed by millions of people worldwide since it premiered in 1982 and has been hailed as one of the greatest British comedies ever written. Winner of both Olivier and Evening Standard Awards for Best Comedy. This edition features a new introduction by Michael Blakemore.

*The Night of the Noises / The Noises of the Night* Mar Pavón, 2014-02-17 Winner at the 2014 Moonbeam

Children's Book Awards The Night of the Noises and The Noises of the Night are two versions of the same story, brought together in an original, entertaining book that will help children to overcome their fear of the dark, relax and drift off to sleep. Guided Reading Level: M, Lexile Level: 830L

**In the Dark** Diane Dзамтовски,1999-09-01 A little girl is bothered by nighttime noises as she tries to go to sleep.

**Tumford's Rude Noises** Nancy Tillman,2012-09-18 Describes how Tumford the cat tests the patience of his parents by making loud and rude noises that compel a lesson in manners before company arrives.

*What Noises Can You Hear?* Hannah Reidy,1999 Many young children outgrow first-word books but are not quite ready for story books. The playful text of the In-Between series helps children progress from simple words such as jump and go to more interesting descriptive words and concepts such as striped, itchy, and squiggly.

Nighttime Noises Samantha Berger,2002 Help Little Bill find out who is making the nighttime noises.

The Unwanted Sound of Everything We Want Garret Keizer,2010 Discusses the sounds of modern industrial society in light of consumption, isolation, social inequality, environmental impact, carbon emissions, and stress levels, encouraging conscious choices and respectful interactions.

As recognized, adventure as competently as experience approximately lesson, amusement, as competently as concord can be gotten by just checking out a book **Noises** afterward it is not directly done, you could take even more approximately this life, going on for the world.

We give you this proper as competently as simple

pretension to acquire those all. We pay for Noises and numerous books collections from fictions to scientific research in any way. accompanied by them is this Noises that can be your partner.
