**Income Distribution in New Zealand** George Barker,1996

**Wealth and New Zealand** Max Rashbrooke,2015-11-09 We are heading towards Thomas Piketty's predicted steady state of wealth being worth six times national income. We are not immune to his prognosis of a return to Victorian-style levels of inequality. The most recent NBR Rich List has revealed the biggest proportional increase in wealth since the list first appeared in 1986. But what do these figures mean and what else do we know about New Zealand's fortunes? Following his groundbreaking work on income inequality, Max Rashbrooke examines how wealth shapes our experience. Drawing on previously unpublished data, he explores what constitutes wealth in New Zealand – where, how and why it is held. In doing so, he addresses how wealth has come to be so unevenly distributed, and why this imbalance is something we can no longer ignore.

*Inequality* Max Rashbrooke,2013-06-27 The divide between New Zealand's poorest and wealthiest inhabitants has widened alarmingly over recent decades. Differences in income have grown faster than in most other developed countries. New Zealand society is being reshaped, stretching to accommodate new distance between those who 'have' and those who 'have not'. Income inequality is a crisis that affects us all. A diverse gathering of New Zealand scholars, journalists, researchers, business leaders, workers, students and parents share these pages. Their voices speak to the complex shape of income inequality, and its effects on the communities of these Pacific islands.

*Basic Income in Australia and New Zealand* J. Mays,G. Marston,J. Tomlinson,2016-03-02 Basic income is an innovative, powerful egalitarian response to widening global inequalities and poverty experiences in society, one that runs counter to the neoliberal transformations of modern welfare states, social security, and labor market programs. This book is the first collective volume of its kind to ask whether a basic income offers a viable solution to the income support systems in Australia and New Zealand. Though often neglected in discussions of basic income, both countries are advanced liberal democracies dominated by neoliberal transformations of the welfare state, and therefore have great potential to advance debates on the topic. The contributors' essays and case studies explore the historical basis on which a basic income program might stand in these two countries, the ideological nuances and complexities of implementing such a policy, and ideas for future development that might allow the program to be put into practice regionally and applied internationally.

**New Zealand** International Monetary Fund. Asia and Pacific Dept,2016-02-08 This paper discusses prospects for potential growth, house prices, household debt, and financial stability risks, and tax policy reforms in New Zealand. Despite having world-class institutions and strong policy framework, income levels remain low relative to other Organisation for Economic Co-operation and Development (OECD) countries. During 1980–2014, per capita income levels have remained about 20 percent below the OECD's average income. Longstanding structural issues need to be addressed to boost potential growth. House prices and household debt have increased rapidly in New Zealand over the past two decades. New Zealand's low national saving rate is a source of vulnerability and likely contributes to the relatively high interest rates needed to attract foreign capital.

*For Richer Or Poorer* New Zealand Planning Council. Income Distribution Group,1988 This report outlines the findings of the study is to describe, within the limits of the data available, the distribution of income and wealth in New Zealand.

*The Inequality Debate* Max Rashbrooke,2014-03-11 The divide between New Zealand's poorest and wealthiest inhabitants has widened alarmingly over faster than in most other developed countries. Max Rashbrooke's succinct introduction to these changes in our society, drawn from the larger work *Inequality: A New Zealand Crisis* and updated with the latest evidence, is essential reading. The *Inequality Debate* was updated in July 2014 with the latest data.

Too Much Money Max Rashbrooke,2021-11-25 Today, someone in the wealthiest 1 per cent of adults – a club of some 40,000 people – has a net worth 68 times that of the average New Zealander. Too Much Money is the story of how wealth inequality is changing Aotearoa New Zealand. Possessing wealth opens up opportunities to live in certain areas, get certain kinds of education, make certain kinds of social connections, exert certain kinds of power. And when access to these opportunities becomes alarmingly uneven, the implications are profound. This ground-breaking book provides a far-reaching and compelling account of the way that wealth – and its absence – is transforming our lives. Drawing on the latest research, personal interviews and previously unexplored data, Too Much Money reveals the way wealth is distributed across the peoples of Aotearoa. Max Rashbrooke's analysis arrives at a time of heightened concern for the division of wealth and what this means for our country's future.

**The Piketty Phenomenon** Geoff Bertram,Simon Chapple,Donal Curtin,Brian Easton,Max Harris,Tim Hazledine,Bernard Hickey,Prue Hyman,Hautahi Kingi,Gareth Morgan,Matt Nolan,Max Rashbrooke,Susan St John,Robert Wade,Cathy Wylie,2014-10-23 Few books have had the global impact of Thomas Piketty's *Capital in the Twenty-First Century*. An overnight bestseller, Piketty's assessment that inherited wealth will always grow faster, on average, than earned wealth has energised debate. Hailed as 'bigger than Marx' (The Economist) or dismissed as 'medieval' (Wall Street Journal), the book is widely acknowledged as having significant economic and political implications. Collected in this BWB Text are responses to this phenomenon from a diverse range of New Zealand economists and commentators. These voices speak independently to the relevance of Piketty's conclusions. Is New Zealand faced with a one-way future of rising inequality? Does redistribution need to focus more on wealth, rather than just income? Was the post-war Great Convergence merely an aberration and is our society doomed to regress into a new Gilded Age?

Left Behind Susan St. John, Donna Wynd, 2008 This report outlines how increasing inequalities are harmful to children and society at large - and what to do about it.

*New Zealand: Selected Issues* International Monetary, International Monetary Fund. Asia and Pacific Dept, 2021-05-05 Selected Issues

**Compulsory Income Management in Australia and New Zealand** Marston, Greg, Humpage, Louise, 2022-06-16 More than a decade on from their conception, this book reflects on the consequences of income management policies in Australia and New Zealand. Drawing on a three-year study, it explores the lived experience of those for whom core welfare benefits and services are dependent on government conceptions of 'responsible' behaviour. It analyses whether officially claimed positive intentions and benefits of the schemes are outweighed by negative impacts that deepen the poverty and stigma of marginalised and disadvantaged groups. This novel study considers the future of this form of welfare conditionality and addresses wider questions of fairness and social justice.

*Who Gets What?* New Zealand Planning Council. Income Distribution Group, 1990 This report builds on and updates the Planning Council's 1988 publication on income and wealth For richer or poorer. It is written in the context of the two broad objectives of the Planning Council's current work programme -- to seek ways of returning the New Zealand economy to a sustainable full employment growth path at high wages, and to aid understanding and resolution of Treaty of Waitangi issues and improvement of the social and economic position of Maori. An efficient and growing economy, providing full employment, is a necessary precondition of better living standards for all members of the community ...--Foreword.

*New Zealand Master Tax Guide (2013 edition)* CCH New Zealand Ltd, 2013-07-01 The Master Tax Guide, New Zealand's most popular tax handbook, contains practical examples and concise summaries of legislation, cases and IRD rulings and statements affecting the 2012/2013 and future tax years. The commentary is concise and easy to read. The new edition also includes discussion of various proposals introduced under the Taxation (Livestock Valuation, Assets Expenditure and Remedial Matters) Bill, including: proposed mixed use asset rules; new calculation methods for some foreign currency hedges; GST changes, including a new zero-rating rule; further livestock valuation changes.

**Tax and Fairness** Deborah Russell, Terry Baucher, 2017-05-28 The world has changed a lot in the last thirty years, but New Zealand's tax system hasn't. Since the 1980s New Zealand's taxation policy has remained the same, despite substantial economic and social changes. The system may be familiar, but is it fair? Deborah Russell and Terry Baucher's lively analysis shows why answers to this question cut to the heart of whether New Zealand can be considered an egalitarian country. Drawing on the latest evidence and using plain language, they explore thorny issues such as the taxation of housing, multinationals and inequality between generations. The remedies proposed in this short book will help change the way New Zealanders think about tax in the twenty-first century.
