Abule Oje Eberekpe Whyte,2008-12-08 You do not keep abreast of the history of this your village; if martyrs are regarded, why should we choose to be assassins? Look, when there is nothing to learn from and live for, you do not hesitate to take your bread from the most possible available means and have it buttered. To tell you the gospel truth

Neglected Aspects of Motion-Event Description Laure Sarda,Benjamin Fagard,2022-07-15 The idea of this book on Neglected Aspects of Motion-Event Description comes from the observation that, over the last 30 years, much attention has been devoted to the manner/path divide in relation to the distinction between Verb-Framed and Satellite-Framed languages. This mainstream focus has left aside other aspects of motion event descriptions. The chapters of this volume take an in-depth look at three less-studied aspects of motion expression. The first part of the book focuses on directional deixis, especially in relation to associated motion and visual motion. The second part explores variations in Source-Goal asymmetries. The third part investigates different types of motion event constructions, e.g., with various types of co-events. Many languages are taken into consideration throughout the 11 chapters, which gives the volume a clear typological dimension. This book is intended for students and academics interested in motion, spatial semantics, typological variation and cognitive linguistics.

A Grammar of Emai Ronald P. Schaefer,Francis O. Egbokhare,2016-12-19 This reference grammar is the first ever description of West Africa's Edoid language Emai. It incorporates narrative, lexical and grammatical field results over the last three decades. Treated are morphology, syntax and argument structure after an introductory phonology and orthographic overview highlighting grammatical and lexical tone. Individual chapters delineate noun and verb phrase structure as well as clause shape in discourse and clause combination. Noun inflection and derivation are detailed as is verb inflection in the context of tense, aspect and modality. Noun phrase character encompasses remnant noun classes, nominal modification types and pronoun forms followed by conjunction. Verb phrase features include complex predicates, both verbs in series and verb plus postverbal particle, functionally distinct copulas, double objects, and sentence complement types constrained by matrix verb. Also analyzed are preverbal and postverbal adverbials relative to information question types. Multi-clause constructions are profiled as to coding varieties across dependent clauses as well as precedence relations. A concluding chapter presents a sample narrative in orthographic form, interlinear gloss and English free translation.

African Languages from a Role and Reference Grammar Perspective Jens Fleischhauer,Claudius Patrick Kihara,2023-05-08 The volume is a collection of papers which apply Role & Reference Grammar (RRG) to African languages. RRG is a functional theory of syntax which has been developed on the basis of two leading questions: First, how would a syntactic theory look like which starts from 'exotic' languages rather than English? Second, how can the interaction between syntax, semantics and pragmatics in different grammatical systems best modelled and explained? Although RRG took linguistic diversity serious from its very beginning, African languages have been underrepresented in the development of the theory. Given the sheer number African languages deserve a wider coverage in a syntactic theory which takes linguistic diversity seriously. The volume is intended to fill this gap and comprises a selection of papers which investigate different aspects related to the syntax-semantics-pragmatics interface of different African languages. This includes: argument doubling and dislocation in isiZulu, complex referential phrases in Gĩkũyũ, serial verb constructions in Igbo, locative complements in Hausa and Zarma Chiine and focus constructions in Emai. The papers will extent the current RRG approach to new

languages and phenomena.

External Possession Doris L. Payne, Immanuel Barshi, 1999-08-15 External Possession Constructions (EPCs) are found in nearly all parts of the world and across widely divergent language families. The data-rich papers in this first-ever volume on EPCs document their typological variability, explore diachronic reasons for variations, and investigate their functions and theoretical ramifications. EPCs code the possessor as a core grammatical relation of the verb and in a constituent separate from that which contains the possessed item. Though EPCs express possession, they do so without the necessary involvement of a possessive predicate such as “have” or “own”. In many cases, EPCs appear to “break the rules” about how many arguments a verb of a given valence can have. They thus constitute an important limiting case for evaluating theories of the relationship between verbal argument structure and syntactic clause structure. They also raise core questions about intersections among verbal valence, cognitive event construal, voice, and language processing.

Grammaticalization Scenarios from Africa, the Americas, and the Pacific Walter Bisang, Andrej Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic description of grammaticalization processes in genealogically and structurally diverse languages. To address the problem of the limitations of the secondary sources for grammaticalization studies, the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire.

Studies in Ditransitive Constructions Andreï L'vovich Mal'chukov, Martin Haspelmath, Bernard Comrie, 2010 Explores the cross-linguistic variation in ditransitive constructions, syntactic patterns of 'give'-like verbs taking Agent, Theme and Recipient arguments. This volume includes a typological overview of ditransitive constructions, the editors' questionnaire, as well as studies of ditransitive constructions in languages from all over the world.

The Nation Gbagura Akanni Adenekan Abiodun, 2000 This book is a thesaurus of history and political features of the nation Gbagura focusing on who the Gbaguras are, their roots, the genesis of how they came in league with other tribes in Egba forest to found the settlement now known as Abeokuta, and the noble roles played by Gbagura heroes and heroines.

Healing Demystified Valentine Oje, 2021-12-19 The only hindrance to healing is the fact that you believe there is a hindrance to healing - CURRY BLAKE. Who says you need the gift of healing before you can heal the sick? Who says you must be a mature believer before you can command deformed organs to be recreated? Who says the sick must first be strong in faith before your prayers can work for them? Certainly not Jesus or the Scripture! In this book; *Healing Demystified*, you will discover: Things Jesus never said about healing Practical answers to the questions you have about healing Your true identity and potentials as a God-man and life-dispenser Common misconceptions about healing that incapacitate believers Inspiring testimonies that will stir up your faith to do the incredible Astonishing revelations about healing as taught by Jesus Christ Himself Compelling proves that healing is for all believers and not a selected few As you read, you will see regular believers like you practically demonstrating the healing power of God. You are about to be enlightened and empowered by God to bring healing to many like never before.
