Insights from Practices in Community-Based Research Shannon T.

Bischoff, Carmen Jany, 2018-03-19 Free Access in January 2019 There has been an increasing interest in the emerging subfield within linguistics and anthropology often referred to as community-based research (Himmelman 1998, Rice 2010, Crippen and Robinson 2013, among others). This volume brings together perspectives from academics, community members, and those that find themselves in both academia and the community. The volume begins with a working definition of the notions of community-based research as a practice and illustrates how such notions shifted, without abandoning the outlined tenets within the working definition, as the chapters developed to include notions of community-based research as a tool and ideology as well as an orientation. Each of the 17 chapters represents a case-study with the first five including discussions of broader issues and theoretical perspectives while exploring community-based research as an emerging subfield within linguistics. The case-studies comprise work from the Americas, Australia, India, Europe, and Africa. The goal of the volume is to build on the emerging literature and practices in the field to arrive at a better understanding of how community-based research is theorized and practiced in a variety of environments, communities, and cultures.

Integrated Pest Management (IPM) Farmer Field School (FFS) Food and Agriculture Organization of the United Nations,Directorate of Plant Protection Quarantine and Storage, Government of India,2021-10-20 Maize is most important food crop after rice and wheat contributing towards national food security with an annual production of 28.7 million metric tonnes. The major maize producing states are Karnataka, Madhya Pradesh, Rajasthan Maharashtra and Andhra Pradesh. Maize is a relatively less water demanding crop and gives higher yield /hectare as compared to other cereals. Due to

development of newer varieties which are tolerant to extreme temperatures, the area under maize cultivation is increasing in northern parts of India. In India about 15 million farmers are engaged in farming and processing of maize. The recent invasion of Fall Armyworm (FAW) is causing wide economic damage to maize farmers. The pest is new to India. Hence, it is important to understand its behaviour in the agro ecosystem and its interactions with predators, parasitoids and entomo-pathogens in diverse agro ecosystem. Thus, this illustrative guide on IPM-FFS has been developed by FAO and Directorate of Plant protection Quarantine & Storage (DPPQS), MoAFW for promoting IPM in maize cultivation with special emphasis on FAW management. This is an output of FAO's project titled, "Time critical measures to support early warning and monitoring for sustainable management of Fall Armyworm in India".

The Rupture of Time Roderick Main, 2004-06-02 Why was the idea of synchronicity so important to Jung? Jung's theory of synchronicity radically challenges the entrenched assumptions of mainstream modern culture in the West. It is one of the most fascinating yet difficult and discomfiting of Jung's psychological theories. The Rupture of Time aims to clarify what Jung really meant by synchronicity, why the idea was so important to him and how it informed his thinking about modern western culture. Areas examined

include: * how the theory fits into Jung's overall psychological model and the significance of its apparent inconsistencies * the wide range of personal, intellectual and social contexts of Jung's thinking on the topic * how Jung himself applied the theory of synchronicity within his critique of science, religion, and society * the continuing relevance of the theory for understanding issues in contemporary detraditionalised religion. Focusing closely on Jung's own writings and statements, this book discloses that the theory of synchronicity is not an inconsequential addendum to analytical psychology but is central to the psychological project that occupied Jung throughout his professional life. This much-needed clarification of one of Jung's central tenets will be of great interest to all analytical psychologists and scholars engaged with Jungian thought.

Molecular Data Analysis Using R Csaba Ortutay, Zsuzsanna Ortutay, 2016-12-29 This book addresses the difficulties experienced by wet lab researchers with the statistical analysis of molecular biology related data. The authors explain how to use R and Bioconductor for the analysis of experimental data

in the field of molecular biology. The content is based upon two university courses for bioinformatics and experimental biology students (Biological Data Analysis with R and High-throughput Data Analysis with R). The material is divided into chapters based upon the experimental methods used in the laboratories. Key features include:

- Broad appeal--the authors target their material to researchers in several levels, ensuring that the basics are always covered.
- First book to explain how to use R and Bioconductor for the analysis of several types of experimental data in the field of molecular biology.
- Focuses on R and Bioconductor, which are widely used for data analysis. One great benefit of R and Bioconductor is that there is a vast user community and very active discussion in place, in addition to the practice of sharing codes. Further, R is the platform for implementing new analysis approaches, therefore novel methods are available early for R users.

Performance as Research Annette Arlander, Bruce Barton, Melanie Dreyer-Lude, Ben Spatz, 2017-12-06 Performance as Research (PAR) is characterised by an extraordinary elasticity and interdisciplinary drive. Performance as Research: Knowledge, Methods, Impact celebrates this energy, bringing together chapters from a wide range of disciplines and eight different countries. This volume focuses explicitly on three critical, often contentious themes that run through much discussion of PaR as a discipline:

- Knowledge - the areas and manners in which performance can generate knowledge
- Methods - methods and methodologies for approaching performance as research

Impact - a broad understanding of the impact of this form of research These themes are framed by four essays from the book's editors, contextualising their interrelated conversations, teasing out common threads, and exploring the new questions that the contributions pose to the field of performance. As both an intervention into and extension of current debates, this is a vital collection for any reader concerned with the value and legitimacy of performance as research.

Seeing What Others Don't Gary Klein, 2013-06-25 A renowned cognitive psychologist reveals the science behind achieving breakthrough discoveries, allowing readers to confidently solve problems, improve decision-making, and achieve success. Insights-like Darwin's understanding of the way evolution actually works, and Watson and Crick's breakthrough discoveries about the structure of DNA-can change the world. Yet we know very little about when, why, or how insights are formed-or what blocks them. In *Seeing What Others Don't*, Gary Klein unravels the mystery. Klein is a keen observer of people in their natural settings-scientists, businesspeople, firefighters, police officers, soldiers, family members, friends, himself-and uses a marvelous variety of stories to illuminate his research into what insights are and how they happen. What, for example, enabled Harry Markopolos to put the finger on Bernie Madoff? How did Dr. Michael Gottlieb make the connections between different patients that allowed him to publish the first announcement of the AIDS epidemic? How did Martin Chalfie come up with a million-dollar idea (and a Nobel Prize) for a natural flashlight that enabled researchers to look inside living organisms to watch biological processes in action? Klein also dissects impediments to insight, such as when organizations claim to value employee creativity and to encourage breakthroughs but in reality block

disruptive ideas and prioritize avoidance of mistakes. Or when information technology systems are dumb by design and block potential discoveries. Both scientifically sophisticated and fun to read, Seeing What Others Don't shows that insight is not just a eureka! moment but a whole new way of understanding.

Recovery of People with Mental Illness Abraham Rudnick,2012-08-30 It is only in the past 20 years that the concept of 'recovery' from mental health has been more widely considered and researched. Before then, it was generally considered that 'stability' was the best that anyone suffering from a mental disorder could hope for. But now it is recognised that, throughout their mental illness, many patients develop new beliefs, feelings, values, attitudes, and ways of dealing with their disorder. The notion of recovery

from mental illness is thus rapidly being accepted and is inserting more hope into mainstream psychiatry and other parts of the mental health care system around the world. Yet, in spite of conceptual and other challenges that this notion raises, including a variety of interpretations, there is scarcely any systematic philosophical discussion of it. This book is unique in addressing philosophical issues - including conceptual challenges and opportunities - raised by the notion of recovery of people with mental illness. Such recovery - particularly in relation to serious mental illness such as schizophrenia - is often not about cure and can mean different things to different people. For example, it can mean symptom alleviation, ability to work, or the striving toward mental well-being (with or without symptoms). The book addresses these different meanings and their philosophical grounds, bringing to the fore perspectives of people with mental illness and their families as well as perspectives of philosophers, mental health care providers and researchers, among others. The important new work will contribute to further research, reflective practice and policy making in relation to the recovery of people with mental illness. It is essential reading for philosophers of health, psychiatrists, and other mental care providers, as well as policy makers.
