The Software Architect Elevator Gregor Hohpe,2020-04-08 As the digital economy changes the rules of the game for enterprises, the role of software and IT architects is also transforming. Rather than focus on technical decisions alone, architects and senior technologists need to combine organizational and technical knowledge to effect change in their company's structure and processes. To accomplish that, they need to connect the IT engine room to the penthouse, where the business strategy is defined. In this guide, author Gregor Hohpe shares real-world advice and hard-learned lessons from actual IT transformations. His anecdotes help architects, senior developers, and other IT professionals prepare for a more complex but rewarding role in the enterprise. This book is ideal for: Software architects and senior developers looking to shape the company's technology direction or assist in an organizational transformation Enterprise architects and senior technologists searching for practical advice on how to navigate technical and organizational topics CTOs and senior technical architects who are devising an IT strategy that impacts the way the organization works IT managers who want to learn what's worked and what hasn't in large-scale transformation

How To Successfully Invent And Reinvent Yourself Carmel O' Reilly,2023-02-15 Welcome to my book about how to successfully invent and reinvent yourself throughout the chapters of your WorkLife Story. Here is a preview of what's inside, along with the main ideas and the meaning behind these. WorkLife is our life at work, where we spend one third of our lives. It is also the impact our work has on our life outside of work, and the impact our life outside of work has on our work. All areas of our life in and out of work are so intrinsically linked, they cannot be separated, nor do I believe should they. I believe WorkLife needs to be considered holistically. In a world where things are always changing, there will be times when your WorkLife circumstances change, or you change. You'll reach points where you'll want and need to think about who you are and where you're at in your WorkLife, and then figure out whether or not it's time for a refresh, or a total change in direction. Inventing or reinventing yourself, while challenging, is absolutely possible, as you will come to learn through the stories about to unfold. In this book I tell six stories: 1. How She Applied to Work for an Organisation She Aspired to Be Part of when She Didn't Meet the Specified Criteria of the Position Advertised: Orla's story of how in writing a letter that acknowledged her shortcomings, she also projected confidence in herself and her abilities. 2. How a Speculative Approach Helped Him Reinvent Himself: Sean's story of how he approached a new industry and sector, not for an advertised position, but with a letter of enquiry about future positions, in which he let them know why he was the right person for them. 3. Life After Redundancy - What Next: Tim's story of how he turned a rather unusual hobby into a viable business venture, from where he began a new chapter in his WorkLife. 4. Stories of Reinvention and Christmas Puddings: Fanny Craddock and Mrs Beeton's stories as perhaps the queens of reinvention, in carving out new and different chapters throughout their WorkLives. 5. Most Significant WorkLife Transition - From Supreme Judge to Nomadic Social Media Marketer: Katie's story of how she actively shaped her WorkLife so that the choices she made brought about the satisfaction she sought. 6. A Tale of Invention and Reinvention: Madame Clicquot's story of how extreme external forces drove her need to continuously invent and reinvent herself not only for her success but for her survival: I share the exercises that helped to work through these challenging situations to resolve the dilemmas. I present these exercises as the following assignments for you to work through: Bridge the Gap Assignment This assignment is to help you to consider opportunities that you aspire to, that are a stretch for you to apply for, and to take a strategic approach to put your best self forward. Develop a Practice of Continuous Self-Feedback Assignment This assignment is to help you to project a confidence in yourself as a lifelong learner. Develop a Practice of Insightful Self-Questioning Assignment This assignment is to help you to always strive towards knowing what you need to do to keep on top of your professional and personal development needs. Are You in the Right Place in Your WorkLife Journaling Assignment This assignment is to help you to actively shape your WorkLife, so that the choices you make bring about the satisfaction you seek. Three Steps in Taking a Risk Assignment This assignment is to help you to consider the information you need in any venture you're considering undertaking.

Invent, Reinvent, Thrive: The Keys to Success for Any Start-Up, Entrepreneur, or Family Business Lloyd E. Shefsky,2014-08-08 In today's uncertain world of business, one rule stands above the rest: If you want to survive--let alone thrive--you must embrace change. Everything else comes after. In *Invent Reinvent Thrive* Kellogg School of Management Professor Lloyd Shefsky provides the inspiration and insight any entrepreneur or family business needs for long-term success--and he backs it all up with proven models of what works and what doesn't. Shefsky reveals the common thread of all business success stories: reinvention. He explains not just how to reinvent concepts and ideas from the start, but ways to continuously innovate and reinvent your business to meet today's constantly changing marketplace conditions. In addition to his own expert insight, Shefsky provides firsthand advice through case studies derived from dozens of original interviews with entrepreneurs and family business giants, consisting of the leaders of some of today's most successful companies, including: Howard Schultz (founder, Chairman, and CEO of Starbucks) Jim Sinegal (founder of Costco) Chuck Schwab (founder of Charles Schwab & Co.) Tom Stemberg (founder of Staples) The author also gives special attention to family businesses (which account for over half the U.S. GDP) and how to address vexing family disparities, enabling family businesses to last more than two generations. *Invent Reinvent Thrive* offers all the answers you need to get your business where you want it to be. You'll learn exactly where new and multi-generational business owners fall short and miss incredible opportunities, why they fail to take the plunge or innovate--and how you can rework, revitalize, and reinvent your business not just to avoid the most common perils but to lead your business to the apex of your industry. Entrepreneurship is not a cataclysmic event, Shefsky writes. It is a constant process. Follow his advice through every step of the process and you will successfully invent, reinvent--and thrive. PRAISE FOR INVENT REINVENT THRIVE: If you think business books are boring, this is your chance to prove yourself wrong. Storytelling is an art, and Shefsky brings that art to business. *Invent Reinvent Thrive* is a treasure trove of valuable lessons. -- STAN KASTEN, President and CEO, Los Angeles Dodgers; former President of the Washington Nationals and the Atlanta Braves, Hawks, and Thrashers *Invent Reinvent Thrive* is full of wise and practical guidance for both would-be and continuing entrepreneurs. Shefsky's discussions provide wonderful advice that will aid anyone embarking on or continuing in an entrepreneurial enterprise. -- DAVID RUDER, former Chairman, Securities & Exchange Commission Our company's direct experience with Lloyd Shefsky . . . inspired us to methodically pursue Brown-Forman's never-ending greatness, and this book can do the same for others. I highly recommend *Invent Reinvent Thrive* to all businesspeople. -- PAUL VARGA, CEO and Chairman, Brown-Forman Corporation, producer of Jack Daniels, Finlandia, Southern Comfort, and other spirits Lloyd Shefsky tackles the issues many entrepreneurs face and offers practical advice to defy the odds. If you've had business success, yet need to go to the next level, read this book. -- GINGER GRAHAM, former President and CEO, Amylin Pharmaceuticals, and former faculty at the Arthur Rock Center for Entrepreneurship at the Harvard Business School This is a very serious study of a critical issue, and no one dealing with entrepreneurship or family businesses should make the mistake of ignoring it. -- ISRAEL ZANG, Professor and former Dean of Business School and Vice Provost of Tel Aviv University

Young Children Reinvent Arithmetic Constance Kamii,1999 In this fully revised second edition of the classic Young Children Reinvent Arithmetic, Constance Kamii describes and develops an innovative program of teaching arithmetic in the early elementary grades. Kamii bases her educational strategies on renowned constructivist Jean Piaget's scientific ideas of how children develop logico-mathematical thinking. Written in collaboration with a classroom teacher, and premised upon the conviction that children are capable of much more than teachers and parents generally realize, the book provides a rich theoretical foundation and a compelling explanation of educational goals and objectives. Kamii calls attention to the ways in which traditional textbook-based teaching can be harmful to children's development of numerical reasoning, and uses extensive research and classroom-tested studies to illuminate the efficacy of the approach. This book is full of practical suggestions and developmentally appropriate activities that can be used to stimulate numerical thinking among students of varying abilities and learning styles, both within and outside of the classroom. "In this new edition of her important book, Connie Kamii demonstrates scholarship not just in what she has written, but in her willingness to incorporate new ideas and findings. Many people update their books; few assiduously revise them, confronting what they believe to be past errors or gaps in their thinking. Such intellectual honesty, along with consistent connections between theory and practice, make this book a solid contribution to mathematics education of young children." —Douglas Clements, State University of New York at Buffalo "The development of young children's logico-mathematical knowledge is at the heart of this text. Similar to the first edition, this revision provides a rich theoretical foundation as well as child-centered activities and principles of teaching that support problem solving, communicating, reasoning, making connections, and representing mathematical ideas. In this great resource for preservice and in-service elementary teachers, Professor Kamii continues to help us understand the implications of Piagetian theory." —Frances R. Curcio, New York University

Reinventing ASEAN Simon S C Tay,Jesus P Estanislao,Hadi Soesastro,2001-10-29 Bringing together contributions by some of the leading experts on ASEAN, this work focuses primarily on the political-security and economic dimensions of ASEAN co-operation. Reinvention Arlene Dickinson,2019-11-05 Do you want or need to change your life, but aren't sure where to start—or whether you have what it takes? At fifty-seven, Arlene Dickinson's life was turned upside down. Her company was on the brink of disaster. Her sense of herself as a strong, confident leader was in tatters. She was overwhelmed by feelings of loss, fear, and shame. Five years later, her business is booming, she's never been happier or more excited about the future, and she's raised tens of millions of dollars and built a whole ecosystem to help other entrepreneurs. How did she turn things around? By following the process she's always used to transform underperforming companies—only this time, she used it to transform her own life. Applying business principles to her personal life helped her figure out very quickly where she wanted to go and how to get there. Having a clear set of practical steps to follow kept her on track when emotions threatened to derail her progress. In Reinvention, Dickinson shares this blueprint for locating your sense of purpose, realistically evaluating your strengths, assessing opportunities outside your comfort zone, and charting a bold new path. Whether you have a big career dream to achieve, or you need to rebuild after a personal setback, this step-by-step plan for reinvention will help you change your own life—for the better.

Reinventing Higher Education Ben Wildavsky,Andrew P. Kelly,Kevin Carey,2011-04-01 The inspiration for this timely book is the pressing need for fresh ideas and innovations in U.S. higher education. At the heart of the volume is the realization that higher education must evolve in fundamental ways if it is to respond to changing professional, economic, and technological circumstances, and if it is to successfully reach and prepare a vast population of students—traditional and nontraditional alike—for success in the coming decades. This collection of provocative articles by leading scholars, writers, innovators, and university administrators examines the current higher education environment and its chronic resistance to change; the rise of for-profit universities; the potential future role of community colleges in a significantly revised higher education realm; and the emergence of online learning as a means to reshape teaching and learning and to reach new consumers of higher education. Combining trenchant critiques of current conditions with thought-provoking analyses of possible reforms and new directions, Reinventing Higher Education is an ambitious exploration of possible future directions for revitalized American colleges and universities.

Re-invent Massimo Faiferri,2018 Lacaton & Vassal's idea of architecture is the research of a low-cost, though generous in space, form of housing. The concept of reuse and re-invention becomes the driving principle in

planning, with the aim of overlapping new intentions to pre-existing systems, while maintaining the right balance between past and future; in the certainty that the well-being, dreams and expectations of contemporary society can be met through these principles. 100 colour images

Re-Inventing Africa Ifi Amadiume,1997-12 This book reveals how conventional anthropology has consistently imposed European ideas of the natural nuclear family, women as passive object, and class differences on a continent with a long history of women with power doing things differently. Amadiume argues for an end to anthropology and calls instead for a social history of Africa, by Africans.

Reinventing Live Denzil Rankine,Marco Giberti,2020-12-18 Forget the traditional one-off, in-person event. Welcome to a new world, where event organizers no longer see themselves as pure organizers; rather their role is to facilitate - business, connections, education and advocacy. Events are fast-becoming catalysts for building communities and nurturing customer relationships ‘all year round’ – with the use of event technology at its core. The authors Denzil Rankine and Marco Giberti have seen it all in their 30 years of consulting, operating and investing across the global exhibitions and events industry. Based on dozens of their interviews with senior executives, entrepreneurs and investors this book is packed full of practical case studies that will equip readers with new strategies, tools and insights they can apply back into their day-to-day roles. This book is a must-read for C-Level management, marketing and event professionals, or anyone looking to participate in the events industry.

All Positive Action Starts with Criticism Sacha la Bastide-van Gemert,2015-01-16 This study provides a historical analysis of Freudenthal’s didactic ideas and his didactic career. It is partly biographical, but also contributes to the historiography of mathematics education and addresses closely related questions such as: what is mathematics and where does it start? Which role does mathematics play in society and what influence does it have on the prevailing views concerning its accompanying didactics?. Hans Freudenthal (1905–1990), professor in mathematics, scientist, literator, but above all mathematics-educator, was inextricably linked to the changes which took place in mathematics education and didactics during the second half of the last century. His diversity as a scientist and his inexhaustible efforts to establish the didactics of mathematics as a seriously pursued science, made Freudenthal's influence in this area considerable. He foresaw an essential, practical role for mathematics in everyone’s life, encouraging students to discover and create mathematics themselves, instead of imposing a ready-made mathematical system. The theory of mathematics education thus developed in the Netherlands would gain world fame in the following decades. Today, in the light of the discussions about mathematics education, in which the call for ‘genuine’ mathematics instead of the so-called 'kindergarten'-mathematics can be heard, Freudenthal's approach seems to be passé. However, the outcome of this study (which is mainly based on documents from Freudenthal’s vast personal archive) shows a more refined picture. The direct identification of 'kindergarten'-mathematics with Freudenthal’s view on mathematics education is not justified. 'Realistic mathematics' as advocated by Freudenthal includes more than just a practical introductory and should, among other things, always aim at teaching 'genuine' mathematics in the end.

Reinventing Fire Amory Lovins,2013-10-07 Oil and coal have built our civilisation, created our wealth and enriched the lives of billions. Yet their rising costs to our security, economy, health and environment are starting to outweigh their benefits. Moreover, the tipping point where alternatives work better and compete purely on cost is not decades in the future - it is here and now. And that tipping point has become the fulcrum of economic transformation. In Reinventing Fire, Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race - not forced by public policy but led by business for long-term advantage. This independent and rigorous account offers market-based solutions integrating transportation, buildings, industry and electricity. It maps pathways for running a 158%-bigger US economy in 2050 but needing no oil, no coal, no nuclear energy, one-third less natural gas and no new inventions. This transition would cost \$5 trillion less than business-as-usual - without counting fossil fuels' huge hidden costs. Whether you care most about profits and jobs, or national security, or environmental stewardship, climate, and health, Reinventing Fire makes sense. It's a story of astounding opportunities for creating the new energy era. -- Publisher description.
