### **The Alphorn through the Eyes of the Classical**

**Composer** Frances Jones,2021-04-06 'The Alphorn through the  
Eyes of the Classical Composer' is the first and definitive book to  
be written about the alphorn in English. It has been written with  
English-speaking readers in mind, as it examines the extensive  
interest of primarily non-Swiss composers, writers and artists in  
the alphorn as a symbol of the Alps, the influence and significance  
of the alphorn in culture, literature and the arts across the globe,  
and the ways in which the instrument has been specifically utilised  
by the Swiss as the iconic representation of their country. This  
book also explores the use of the musical language of the alphorn  
call, to ascertain why and how such references as those of Berlioz  
or Beethoven can convey so much meaning. Dr Jones seeks out  
what it is that a composer brings into the concert hall, the theatre,  
the opera house, the church, or the drawing room by such a  
quotation, to what heritage they are referring, and upon what  
basis there are grounds for an assumption that such a reference  
will be understood by an audience. The book, which will be of  
interest to researchers in Swiss cultural studies and

ethnomusicology, builds on Dr Jones's research and PhD thesis. The six chapters deal with a variety of topics, including a basic introduction to the alphorn and an exploration of the promotion of the instrument as the symbol of Switzerland, as well as the reasons behind symbolic references to alphorn motifs by European and British composers in concert repertoire, jazz and film.

*Ethics and Electronic Information* Barbara Rockenbach,Tom Mendina,2015-10-03 Stephen Almagno's career as a professor of library science began at the University of Pittsburgh in 1971. In 1990, he became the first professor in the United States to teach an information ethics course in a library and information science program. Almagno's work in the area of information ethics was recognized at the 2001 "Ethics of Electronic Information in the 21st Century" symposium held at the University of Memphis on October 18-21, 2001, upon the occasion of his retirement from the University of Pittsburgh. The essays in this book were presented at the symposium honoring Almagno. The first section of the book features papers that pay special tribute to Almagno. The second contains papers on library issues and ethics, such as the ethics of electronic information in China and eastern Europe, the organizations that represent information professionals, the ethics of user privacy in the digital library, and ethical implications of e-commerce, to name just a few. The third section covers topical issues, such as Internet plagiarism, ethical hacking and the security justification, social democracy and information media

policy, and the ethics of dialogue, among others.

Georgics Virgil, 1988-07-29 This volume and its companion volume devoted to the second half of the poem provide a detailed commentary, with text, on the whole of Virgil's *Georgics*. Professor Thomas describes this work as 'perhaps the most difficult, certainly the most controversial, poem in Roman literature'. He presents the *Georgics* as the finished poem of Virgil's mature years, approaching it not merely as a part of the tradition of didactic poetry, but rather as a work which confronts, behind its generic appearance, issues not essentially different from those which inform the *Eclogues* and *Aeneid*. His introduction and Commentary argue that Virgil's agricultural world, with its successes, failures and ultimate limitations, represents the arena for man's struggle with the realities of existence. Professor Thomas pays particular attention to Virgil's allusion to and reshaping of prior Greek and Latin poetry. The Introduction also covers stylistic, metrical and structural questions. A subject index and indexes of important Greek and Latin words conclude each volume. This edition is aimed primarily at students at university and in the upper forms of schools, but the range of its scholarship means that it will be valuable to all classical scholars. The Introduction contains material for non-classicists interested in Latin literature.

**Variations on the Canon** Robert Curry, David Gable, Robert Lewis Marshall, 2008 Masterful essays honoring the great pianist and critic Charles Rosen, on masterpieces from Bach and Beethoven to Chopin, Verdi, and Stockhausen. Charles Rosen, the pianist and man of letters, is perhaps the single most influential writer on music of the past half-century. While Rosen's vast range as a writer and performer is encyclopedic, it has focused particularly on the living canonical repertory extending from Bach to Boulez. Inspired in its liveliness and variety of critical approaches by Charles Rosen's challenging work, *Variations on the Canon* offers original essays by some of the world's most eminent musical scholars. Contributors address such issues as style and compositional technique, genre, influence and modeling, and reception history; develop insights afforded by close examination of compositional sketches; and consider what language and metaphors might most meaningfully convey insights into music. However diverse the modes of inquiry, each essay sheds new light on the works of those composers posterity has deemed central to the modern Western musical tradition. Contributors: Pierre Boulez, Scott Burnham, Elliott Carter, Robert Curry, Walter Frisch, David

Gable, Philip Gossett, Jeffrey Kallberg, Joseph Kerman, Richard Kramer, William Kinderman, Lewis Lockwood, Sir Charles Mackerras, Robert L. Marshall, Robert P. Morgan, Charles Rosen, Julian Rushton, David Schulenberg, László Somfai, Leo Treitler, James Webster, and Robert Winter. Robert Curry is principal of the Conservatorium High School and honorary senior lecturer in the Centre for Medieval Studies, University of Sydney; David Gable is Assistant Professor of Music at Clark-Atlanta University; Robert L. Marshall is Louis, Frances, and Jeffrey Sachar Professor Emeritus of Music at Brandeis University.
