Financing resource recovery and reuse in developing and emerging economies Lazurko, Anita, Drechsel, Pay, Hanjra, M. A., 2018-12-12

Gun Violence, Disability and Recovery Cate Buchanan, Editor, 2014-01-24 Gun violence—intentional, self-directed or accidental—is a profoundly traumatic experience. From physical injuries to unseen psychological scars and permanent impairments, it irrevocably changes people’s lives. Gun violence does not just the individual shot or threatened. Secondary victimisation also includes relatives, friends, colleagues, caregivers, and, perhaps controversially, perpetrators themselves. *Gun Violence, Disability and Recovery* provides the first overview of the rights and needs of survivors of gun violence. The collection contains contributions from gun violence survivors, trauma surgeons, disability rights activists, rehabilitation specialists, violence prevention and reduction experts, development practitioners, and gender justice advocates. From countries with low resource levels to those already equipped with state-of-the-art rehabilitation centres, this innovative publication provides policymakers, practitioners, government officials, and donors with timely analysis on what could be done differently to meet the needs and rights of survivors of gun violence. “This volume speaks to me both as a government official and as a survivor of gun violence. I know first-hand how painful the aftermath of such a life-changing event can be. But I also know it is possible to recover and make

a positive difference in society. I hope this book will inspire other survivors to follow this path.”

Lenín Moreno Garcés, Vice President, Ecuador
“Little attention has been paid to the fact that for every person killed by gun violence, as many as six victims will survive, often with severe disabilities. The long-term physical and psychological damage, social and economic impacts, can no longer be overlooked. Bringing together voices of survivors, as well as health, medical, rehabilitation and legal concerns, this book represents a significant step forward, outlining key issues for policy, practice and intervention. It is a must read for anyone concerned about human rights and violence—and that should mean all of us.” Nora Ellen Groce, Director, Leonard Cheshire Disability & Inclusive Development Centre, University College London, UK
“Every year, hundreds of thousands of victims of gun violence, together with their families, experience the real costs of the availability and misuse of arms in our communities. For these victims to attain their basic human rights, so often denied them, we need a better understanding of their predicament, challenges and needs. Gun Violence, Disability and Recovery, with its comprehensive overview and analysis, will critically inform our efforts to develop and implement better policies and practices to enhance the realisation of the rights of survivors of armed violence, including implementation of the Arms Trade Treaty.” Espen Barth Eide, former Minister of Foreign Affairs, Norway
“The reality of survivors of gun violence—my reality—is so often lost in narrow

political and economic interests. This volume gives me hope that attention to life after gun violence will begin to receive long overdue attention, and contribute to the long haul effort of improving services for survivors as well as working towards accountability about the arms trade." Shelley Barry, filmmaker, South Africa "International development goals, including the Millennium Development Goals, will not be achieved if the rights of people with disabilities are not met. Through a broad range of case studies and examples from low and middle income countries, this book shows us how States could do better. Let us hope that its message is heard. As a

Recovery Peter N Watkins, 2007-06-07 This title is directed primarily towards health care professionals outside of the United States. In this book the author charts the journey of recovery from severe and disabling mental health problems. The book's optimistic tone challenges the prevailing notion that recovery is an outcome open only to a minority. It describes the necessary transformation of mental health services into a recovery culture. At the heart of the book are five recovery stories which are a testament to the indomitable nature of the human spirit that enables us to rise above adversity. It is these themes that mental health professionals must engage with if they are to be guides and companions to people on their recovery journeys. Uses a model of recovery based on the 'hero's journey' Maps a clear pathway to recovery that can be used collaboratively by clients and mental health professionals In-depth exploration of

recovery relationships and a recovery culture

Protecting and Promoting Good Nutrition in Crisis and Recovery Food and Agriculture Organization of the United Nations, 2005 Every year, natural disasters, armed conflicts and other forms of crisis adversely affect the lives of millions of people in the developing world. In many countries, families are forced to abandon their homes, farms and villages; access to adequate food becomes difficult, and hardship contributes to high rates of malnutrition. This book offers guidance to program planners and technicians in the fields of nutrition, food security, agriculture and community development in adopting a longer-term perspective to addressing problems of household food insecurity and malnutrition during periods of crisis and recovery. It provides a framework for an implementation strategy that focuses on both saving lives in the short term and strengthening livelihood to ensure that households are less vulnerable to food and nutrition insecurity in the future.

Consolidating the Recovery World Bank, 2022-04-07 The Latin America and the Caribbean region is consolidating its recovery from the COVID-19 crisis, but the road ahead poses challenges: The damage inflicted by the pandemic on education and poverty require redress; new variants may appear; rising global inflation presents new policy dilemmas; and the long-standing reform agenda needed to lay the foundations for renewed and inclusive growth remains pending. Further, the global context is evolving rapidly. Over the

medium term, the tragedy unfolding in Ukraine will affect the region through unpredictable channels. Over the longer term, increased global alarm over the pace of climate change raises new policy issues. The region's contribution to greenhouse gases is modest and can be reduced, but the impact of climate change on its people and productive sectors will require significant adaptation. The good news is that LAC's unique endowments positions it well to seize emerging green growth opportunities if well-managed. A key message is that improving the region's capability to adapt and innovate needs to be placed at the center of both the growth and greening agendas and can generate synergies between them.

Latin American Economic Outlook 2021 Working Together for a Better Recovery OECD, Economic Commission for Latin America and the Caribbean, CAF Development Bank of Latin America, European Commission, 2021-12-02 The Latin American Economic Outlook 2021: Working Together for a Better Recovery aims to analyse and provide policy recommendations for a strong, inclusive and environmentally sustainable recovery in the region. The report explores policy actions to improve social protection mechanisms and increase social inclusion, foster regional integration and strengthen industrial strategies, and rethink the social contract to restore trust and empower citizens at all stages of the policy-making process.

Music therapy in mental health for illness management and recovery Michael J.

Silverman, 2015-05-21 Many music therapists work in adult mental health settings after qualifying. For many, it will be a challenging and even daunting prospect. Yet until now, there has been no psychiatric music therapy text providing advice on illness management and recovery. This essential book fills the gap in the literature, providing the necessary breadth and depth to inform readers of the psychotherapeutic research base and show how music therapy can effectively and efficiently function within a clinical scenario. The book takes an illness management and recovery approach to music therapy specific to contemporary group-based practice. It is also valuable for administrators of music therapy, providing innovative theory-based approaches to psychiatric music therapy, developing and describing new ways to conceptualize psychiatric music therapy treatment, educating music therapists, stimulating research and employment, and influencing legislative policies. An important aim of the book is to stimulate both critical thought and lifelong learning concerning issues, ideas, and concepts related to mental illness and music therapy. Critical thinking and lifelong learning have been - and will likely continue to be - essential aspirations in higher education. Moreover, contemporary views concerning evidence-based practice rely heavily upon the clinician's ability to think critically, seek a breadth of

contradicting and confirmatory evidence, implement meta-cognition to monitor thoughts throughout processes, and synthesize and evaluate knowledge to make informed clinical decisions relevant and applicable to idiosyncratic contextual parameters. For both students and clinicians in music therapy, this is an indispensable text to help them learn, develop, and hone their skills in music therapy

and recommendations on how to accomplish the paradigm shift from viewing waste as a problem to a valuable resource. It explores a low-cost, low-technology, community-based and decentralized waste-to-resource model called the "integrated resource recovery centre". The publication articulates key lessons learned by ESCAP and its partners in establishing integrated resource recovery centres across cities in Asia and the Pacific since 2009. These lessons are grouped around four important areas for waste-to-resource initiatives: (i) partnerships; (ii) awareness raising and behaviour change; (iii) facilities management and operational performance; and (iv) replication and scaling up.
