Agile Software Engineering Skills Julian Michael Bass,2023-04-14 This textbook is about working in teams to create functioning software. It covers skills in agile software development methods, team working, version control and continuous integration and shows readers how to apply some of the latest ideas from lean, agile and Kanban. Part I, which focuses on People, describes various project roles and the skills needed to perform each role. This includes members of self-organizing teams, scrum masters, product owners and activities for managing other stakeholders. The skills needed to create Product artefacts are detailed in Part II. These include skills to create agile requirements, architectures, designs as well as development and security artefacts. The agile development Process to coordinate with co-workers is described in Part III. It introduces the skills needed to facilitate an incremental process and to use software tools for version control and automated testing. Eventually some more advanced topics are explained in Part IV. These topics include large projects comprising multiple cooperating teams, automating deployment, cloud software services, DevOps and evolving live systems. This textbook addresses significant competencies in the IEEE/ACM Computing Curricula Task Force 2020. It includes nearly 100 exercises for trying out and applying the skills needed for agile software development. Hints, tips and further advice about tackling the exercises are presented at the end of each chapter, and a case study project, with downloadable source code from an online repository, integrates the skills learned across the chapters. In addition, further example software projects are also available there. This way, the book provides a hands-on guide to working on a development project as part of a team, and is inspired by the needs of early career practitioners as well as undergraduate software engineering and computer science students.

Body of Knowledge for Modeling and Simulation Tuncer Ören,Bernard P. Zeigler,Andreas

Tolk, 2023-01-27 Commissioned by the Society for Modeling and Simulation International (SCS), this needed, useful new 'Body of Knowledge' (BoK) collects and organizes the common understanding of a wide collection of professionals and professional associations. Modeling and simulation (M&S) is a ubiquitous discipline that lays the computational foundation for real and virtual experimentation, clearly stating boundaries—and interactions—of systems, data, and representations. The field is well known, too, for its training support via simulations and simulators. Indeed, with computers increasingly influencing the activities of today's world, M&S is the third pillar of scientific understanding, taking its place along with theory building and empirical observation. This valuable new handbook provides intellectual support for all disciplines in analysis, design and optimization. It contributes increasingly to the growing number of computational disciplines, addressing the broad variety of contributing as well as supported disciplines and application domains. Further, each of its sections provide numerous references for further information. Highly comprehensive, the BoK represents many viewpoints and facets, captured under such topics as: Mathematical and Systems Theory Foundations Simulation Formalisms and Paradigms Synergies with Systems Engineering and Artificial Intelligence Multidisciplinary Challenges Ethics and Philosophy Historical Perspectives Examining theoretical as well as practical challenges, this unique volume addresses the many facets of M&S for scholars, students, and practitioners. As such, it affords readers from all science, engineering, and arts disciplines a comprehensive and concise representation of concepts, terms, and activities needed to explain the M&S discipline. Tuncer Ören is Professor Emeritus at the University of Ottawa. Bernard Zeigler is Professor Emeritus at the University of Arizona. Andreas Tolk is Chief Scientist at The MITRE Corporation. All three editors are long-time members and Fellows of the Society for Modeling and Simulation International. Under the leadership of three SCS Fellows, Dr. Ören, University of Ottawa, Dr. Zeigler, The University of Arizona, and Dr. Tolk, The MITRE Corporation, more than 50 international scholars from 15 countries provided insights and experience to compile this initial M&S Body of Knowledge.

The Ring of Death Roland Boike, 2018-07-23 In 1868, Jarmon, a young African boy, and his sisters Kindra and Karla struggle to live after the death of their parents. Jarmon, in his spare time and in order to supplement his wages as a thirteen-year-old working in the African diamond mines, hunts for diamonds along the Orange River in Africa. One morning, while hunting diamonds, Jarmon finds he is accosted by the mine owner and is knocked unconscious. The following day the mine owner fires Jarmon, kidnaps his sisters, and plans to take them back to Holland. Finding that he is unable to get his sisters back, Jarmon seeks out a local witch doctor to have a curse placed on the stolen diamonds. In a fit of anger Jarmon seeks out the aid of an African native inyanga to place a curse on the diamonds. It is believed that the curse has caused numerous mysterious deaths of the previous owners of the diamonds. One hundred years later, Grant Powers purchases the diamonds to have made into a thirty-fifth wedding anniversary gift for his wife. In order to save the political life of Grant Powers's brother, Grant and Marianne Powers agree to adopt and raise the illegitimate child of Grants brother. While vacationing the diamond ring is stolen, and the Powers are killed in an automobile accident. The caregiver simply keeps the child and raises her as her

own. The true identity of the child and the eventual recovery of the stolen diamond leads to the final removal of the curse.

The Language of Inequality in the News Michael Toolan, 2018-12-06 Why in the early 1970s does The Times reject the idea of a national lottery, as rewarding luck not merit and effort, but warmly welcome one by the 1990s? Why in the 1970s do the Daily Mail's TV reviews address serious contemporary themes such as class- and race-relations, whereas forty years later they are largely concerned with celebrities, talent shows, and nostalgia? Why does the Conservative Chancellor in the 2010s mention 'Britain' so very often, when the Conservative Chancellor in the 1970s scarcely does at all? Covering news stories spanning fort-five years, Michael Toolan explores how wealth inequality has been presented in centre-right British newspapers, focusing on changes in the representation may have helped present-day inequality seem justifiable. Toolan employs corpus linguistic and critical discourse analytic methods to identify changing lexis and verbal patterns and gaps, all of which contribute to the way wealth inequality was represented in each of the decades from the 1970s to the present.
