Portable Moving Images Ricardo Cedeño Montaña,2017-08-21 This media history explores a series of portable small cameras, playback devices, and storage units that have made the production of film and video available to everyone. Covering several storage formats from 8mm films of the 1900s, through the analogue videotapes of the 1970s, to the compression algorithms of the 2000s, this work examines the effects that the shrinkage of complex machines, media formats, and processing operations has had on the dissemination of moving images. Using an archaeological approach to technical standards of media, the author provides a genealogy of portable storage formats for film, analog video, and digitally encoded video. This book is a step forward in decoding the storage media formats, which up to now have been the domain of highly specialised technicians.

Shaping Images Thorsten Stephan Beck,2016-09-12 Images play a key role for scholarly work in many ways – they facilitate communication and support understanding or make research results look more appealing. At the same time powerful image-editing programs have profoundly changed how image manipulations are perceived today. This book explores how scholars from different domains conceive image manipulation. The study is based on research carried out at the Interdisciplinary Laboratory Image Knowledge Gestaltung at Humboldt University Berlin. Informants from the field of biology, computer science, art history and design explain how they differentiate between appropriate and inappropriate image manipulation. Furthermore these experts report on whether guidelines or practical logics shape their work with images.

How the Body Shapes the Mind Shaun Gallagher,2006-10-12 How the Body Shapes the Mind is an interdisciplinary work that addresses philosophical questions by appealing to evidence found in experimental psychology, neuroscience, studies of pathologies, and developmental psychology. There is a growing consensus across these disciplines that the contribution of embodiment to cognition is inescapable. Because this insight has been developed across a variety of disciplines, however, there is still a need to develop a common vocabulary that is capable of integrating discussions of brain mechanisms in neuroscience, behavioural expressions in psychology, design concerns in artificial intelligence and robotics, and debates about embodied experience in the phenomenology and philosophy of mind. Shaun Gallagher's book aims to contribute to the formulation of that common vocabulary and to develop a conceptual framework that will avoid both the overly reductionistic approaches that explain everything in terms of bottom-up neuronal mechanisms, and inflationistic approaches that explain everything in terms of Cartesian, top-down cognitive states. Gallagher pursues two basic sets of questions. The first set consists of questions about the phenomenal aspects of the structure of experience, and specifically the relatively regular and constant features that we find in the content of our experience. If throughout conscious experience there is a constant reference to one's own body, even if this is a recessive or marginal awareness, then that reference constitutes a structural feature of the phenomenal field of consciousness, part of a framework that is likely to determine or influence all other aspects of experience. The second set of questions concerns aspects of the structure of experience that are more hidden, those that may be more difficult to get at because they happen before we know it. They do not normally enter into the content of experience in an explicit way, and are often inaccessible to reflective consciousness. To what extent, and in what ways, are consciousness and cognitive processes, which include experiences related to perception, memory, imagination, belief, judgement, and so forth, shaped or structured by the fact that they are embodied in this way?

Heroizability Ibrahim Taha,2015-07-01 The author argues that Heroizability, the ability of heroizing the major character, is the required theory for producing meanings in literary narratives introduced in three circles: the author's, the protagonist's, and the reader's. Based on an evolutionary model, heroizability treats literary characters as natural anthroposemiotic entities aware of their natural motivation to achieve in order to survive and produce meanings of their survival.

Body - Language - Communication Cornelia Müller,2014-10-29 Volume II of the handbook offers the state of the art on how body movements are used for communication around the world. Topics include the functions of body movements, their contexts of occurrence, their forms and meanings, their integration with speech, and how bodily motion can function as language. An interdisciplinary chapter on 'embodiment' explores the body and its role in the grounding of language from current theoretical perspectives.

Cinematic Metaphor in Perspective Sarah Greifenstein,Dorothea Horst,Thomas Scherer,Christina Schmitt,Hermann Kappelhoff,Cornelia Müller,2018-10-08 Over centuries, scholars have explored how metaphor contributes to thought, language, culture. This collection of essays reflects on Müller, Kappelhoff, and colleagues' transdisciplinary (film studies and linguistics) approach formulated in Cinematic Metaphor: Experience – Affectivity – Temporality. The key concept of cinematic metaphor opens up reflections on metaphor as a form of embodied meaning-making in human life across disciplines. The book documents collaborative work, reflecting intense, sometimes controversial, discussions across disciplinary boundaries. In this edited volume, renowned authors explore how exposure to the framework of Cinematic Metaphor inspires their views of metaphor in film and of metaphor theory and analysis more generally. Contributions include explorations from the point of view of applied linguistics (Lynne Cameron), cognitive linguistics (Alan Cienki), media studies (Kathrin Fahlenbrach), media history (Michael Wedel), philosophy (Anne Eusterschulte), and psychology (Raymond W. Gibbs, Jr.).

Data Loam Johnny Golding,Martin Reinhart,Mattia Paganelli,2020-12-16 Als Reaktion auf die dominante Wirkkraft und Deutungshoheit des Digitalen vereint Data Loam auf der Basis von Positionen der internationalen zeitgenössischen Kunstpraxis radikale Denkansätze. Vorbei: das Beharren auf Indexikalität und die instrumentelle Reduktion des Wissens. Stattdessen: eine neue Metrik, die Spiel, Neugier, Experiment und Risiko fordert. Als dringende Antwort auf die stetig wachsende Informationsflut, der Bibliotheken, Suchmaschinen und kulturelle Einrichtungen ausgesetzt sind, werden Ansätze entwickelt, die sinnliche Logik, kausale Durchlässigkeit und neue Formen der Mensch-Maschine-Interaktion anregen und erlauben. Data Loam beleuchtet die Zukunft von Wissenssystemen in Texten zu künstlicher Intelligenz, Kybernetik und Kryptoökonomie: als Gegenmittel zur Zerstreuung apokalyptischer Ängste.

Mnemonic Echoing in Old Norse Sagas and Eddas Pernille Hermann,2022-08-22 This book brings together Old Norse-Icelandic literature and critical strategies of memory, and argues that some of the particularities of this vernacular textual tradition are explained by the fact that this literature derives from,

represents, and incorporates into its designs mnemonic devices of different kinds. Even if Old Norse-Icelandic manuscript culture is relatively silent about the mnemonic context of the literature, the texts themselves exhibit multiple reminiscences of memory. By showing that this literature reveals glimpses of mnemonic technologies at the same time as it testifies to a cultural memory, this study demonstrates how ‘the past’, and narrative traditions about the past, were constructed in a dynamic relationship with ideas that existed at the time the texts were written. Moreover, the book deals with the function of memory in early book-culture, with metaphors of memory, and with mnemonic cues such as spatiality and visuality. With its new readings of canonical texts like the *Íslendingasögur*, the Prose Edda and selected eddic poems, as well as of less widely studied branches of Old Norse-Icelandic literature, such as the sagas of bishops and religious texts, this book will be of interest to Old Norse scholars and to scholars interested in medieval Scandinavia and memory studies.

Metaphor in Communication, Science and Education Francesca Ervas, Elisabetta Gola, Maria Grazia Rossi, 2017-08-07 This collection of papers presents some recent trends in metaphor studies that propose new directions of research on the embodied cognition perspective. The overall volume, in particular, shows how the embodied cognition still remains a relevant approach in a multidisciplinary research on the communicative side of metaphors, by focusing on both comprehension processes in science as well as learning processes in education.

Dynamis of the Image Emmanuel Alloa, Chiara Cappelletto, 2020-05-05 Images are not neutral conveyors of messages shipped around the globe to achieve globalized spectatorship. They are powerful forces that elicit very diverse responses and can resist new visual hegemonies of our global world. Bringing together case studies from the field of media, art, politics, religion, anthropology and science, this volume breaks new ground by reflecting on the very power of images beyond their medial exploitation. The contributions by Hans Belting, Susan Buck-Morss, Georges Didi-Huberman, W.J.T. Mitchell, and Ticio Escobar among others testify that globalization does not necessarily equal homogenization, and that images can open up alternative ways of picturing what is to come.

Asian American Film Festivals Erin Franziska Högerle, 2020-10-26 Responding to a lack of studies on the film festival’s role in the production of cultural memory, this book explores different parameters through which film festivals shape our reception and memories of films. By focusing on two Asian American film festivals, this book analyzes the frames of memory that festivals create for their films, constructed through and circulated by the various festival media. It further establishes that festival locations—both cities and screening venues—play a significant role in shaping our experience of films. Finally, it shows that festivals produce performances which help guide audiences towards certain readings and direct the film’s role as a memory object. Bringing together film festival studies and memory studies, 'Asian American Film Festivals' offers a mixed-methods approach with which to explore the film festival phenomenon, thus shedding light on the complex dynamics of frames, locations, and performances shaping the festival’s memory practices. It also draws attention to the understudied genre of Asian American film festivals, showing how these festivals actively engage in constructing and performing a minority group’s collective identity and memory.

ART and the MIND – Ernst H. GOMBRICH Sybille Moser-Ernst, 2018-02-19 Ernst H. Gombrich, the Art Historian, master of both Continental thought and English language, became one of the world’s most well-known representatives of the discipline. Half a century ago his testable theories transformed thinking on how to look at art. After only a few years during which semiotics appeared to render Sir Ernst’s common-sense framework outdated, the rise of cognitive approaches has enabled him to recover internationally the status he once had in France as a radical thinker within modern philosophy. This book explores Gombrich’s intellectual legacy by analysing some of the concepts and insights in the context of Image Science, the *Steckenpferd*. The international contributors are original authorities in their own right, among them some of Gombrich’s former students.

The Public Mind and the Politics of Postmillennial U.S.-American Writing Jolene Mathieson, Marius Henderson, Julia Lange, 2022-08-22 The Anglia Book Series (ANGB) offers a selection of high quality work on all areas and aspects of English philology. It publishes book-length studies and essay collections on English language and linguistics, on English and American literature and culture from the Middle Ages to the present, on the new English literatures, as well as on general and comparative literary studies, including aspects of cultural and literary theory.

“If Then the World a Theatre Present...” Björn Quiring, 2014-08-19 To metaphorize the world as a theatre has been a common procedure since antiquity, but the use of this trope became particularly prominent and pregnant in early modern times, especially in England. Old and new applications of the “*theatrum mundi*” topos pervaded discourses, often allegorizing the deceitfulness and impermanence of this world as well as the futility of earthly strife. It was frequently woven into arguments against worldly amusements such as the stage: Commercial theatre was declared an undesirable competitor of God’s well-ordered world drama. Early modern dramatists often reacted to this development by appropriating the metaphor, and in an ingenious twist, some playwrights even appropriated its anti-theatrical impetus: Early modern theatre seemed to discover a denial of its own theatricality at its very core. Drama was found to succeed best when it staged itself as a great unmasking. To investigate the reasons and effects of these developments, the anthology examines the metaphorical uses of theatre in plays, pamphlets, epics, treatises, legal proclamations and other sources.

The Beginning of Infinity David Deutsch, 2011-03-31 'Science has never had an advocate quite like David Deutsch ... A computational physicist on a par with his touchstones Alan Turing and Richard Feynman, and a philosopher in the line of his greatest hero, Karl Popper. His arguments are so clear that to read him is to experience the thrill of the highest level of discourse available on this planet and to understand it' Peter Forbes, Independent In our search for truth, how far have we advanced? This uniquely human quest for good explanations has driven amazing improvements in everything from scientific understanding and technology to politics, moral values and human welfare. But will progress end, either in catastrophe or completion - or will it continue infinitely? In this profound and seminal book, David Deutsch explores the furthest reaches of our current understanding, taking in the Infinity Hotel, supernovae and the nature of optimism, to instill in all of us a wonder at what we have achieved - and the fact that this is only the beginning of humanity's infinite possibility. 'This is Deutsch at his most ambitious, seeking to understand the implications of our scientific explanations of the world ... I enthusiastically recommend this rich, wide-ranging and elegantly written exposition of the unique insights of one of our most original intellectuals' Michael Berry, Times Higher Education Supplement 'Bold ... profound ... provocative and persuasive' Economist 'David Deutsch may well go down in history as one of the great scientists of our age' Scotsman

Digilect Ágnes Veszelszki, 2017-06-26 The high degree of internet penetration and its social (and linguistic) effects evidently influence how people, and especially the highly susceptible younger generations, use language. The primary aim of the book is not only to identify the characteristic features of the digital language variety (this has already been done by several works) but to examine how digital communication affects the language of other mediums of communication: orality, handwritten texts, digitally created but not digitally perceived, that is printed texts, including in particular advertisements (which quickly respond to linguistic change). Naturally, the book presents the characteristics of the digital language variety (and coins the term digilect) but only to give a framework to the impact analysis. It is important to document changes in progress and thus direct attention to potential outcomes. The current linguistic change is different from previous ones primarily in its speed and form of spreading, and it not only brings innovative grammatical forms and writing/spelling solutions but may also have far-reaching cultural and educational consequences in the long run.

Handbook of Art and Global Migration Burcu Dogramaci, Birgit Mersmann, 2019-07-08 How can we think of art history as a discipline that moves process-based, performative, and cultural migratory movement to the center of its theoretical and methodical analyses? With contributions from internationally renowned experts, this manual, for the first time, provides answers as to what consequences the interaction of migration and globalization has on research in

the field of the science of art, on curatory practice, and on artistic production and theory. The objective of this multi-vocal anthology is to open up an interdisciplinary discourse surrounding the increased focus on the phenomenon of migration in art history.

Mindscaping the Landscape of Tibet Dan Smyer Yü,2015-03-30 Based on the author’s cross-regional fieldwork, archival findings, and critical reading of memoirs and creative works of Tibetans and Chinese, this book recounts how the potency of Tibet manifests itself in modern material culture concerning Tibet, which is interwoven with state ideology, politics of identity, imagination, nostalgia, forgetting, remembering, and earth-inspired transcendence. The physical place of Tibet is the antecedent point of contact for subsequent spiritual imaginations, acts of destruction and reconstruction, collective nostalgia, and delayed aesthetic and environmental awareness shown in the eco-religious acts of native Tibetans, Communist radical utopianism, former military officers’ recollections, Tibetan and Chinese artwork, and touristic consumption of the Tibetan landscape. By drawing connections between differences, dichotomies, and oppositions, this book explores the interiors of the diverse agentive modes of imaginations from which Tibet is imagined in China. On the theoretical front, this book attempts to bring forth a set of fresh perspectives on how a culturally and religiously specific landscape is antecedent to simultaneous processes of place-making, identity-making, and the bonding between place and people.

Mediatization and Sociolinguistic Change Jannis Androutsopoulos,2014-09-04 This is the first volume to focus on the role of media in processes of linguistic change, one of the most contested issues in contemporary sociolinguistics. Its 17 chapters and five section commentaries present cutting-edge research from variationist and interactional sociolinguistics, media linguistics, language ideology research, and minority language studies. The volume advances our understanding of linguistic change in a mediatized world in three ways. First, it introduces the notions of sociolinguistic change and mediatization to create a broader theoretical framing than the one offered by ‘the media’ and ‘language change’. Second, it takes the discussion beyond the notions of ‘influence’ and ‘effect’ and the binary distinction of ‘media’ vs. ‘community language’. Third, it examines the relation of sociolinguistic change and mediatization and from five complementary viewpoints: media influence on linguistic structure; media engagement in interaction; change in mass and new media language; language-ideological change; and the role of media for minority languages. Bringing these strands of sociolinguistic scholarship together, this volume examines their shared references and common lines of thinking.
