Plus, the book includes a special chapter on integrating Adobe Photoshop seamlessly right into your workflow, and you'll learn some of Scott's latest Photoshop portrait retouching techniques and special effects, which take this book to a whole new level. Text to Tradition Deven M. Patel, 2014-01-07 Written in the twelfth century, the *Naisadhiyacarita* (The Adventures of Nala, King of Nisadha) is a seminal Sanskrit poem beloved by South Asian literary communities for nearly a millennium. This volume introduces readers to the poem's author, his reading communities, the modes through which the poem has been read and used, the contexts through which it became canonical, its literary offspring, and the emotional power it still holds for the culture that values it. The study privileges the intellectual, affective, and social forms of cultural practice informing a region's people and institutions. It treats literary texts as traditions in their own right and draws attention to the critical genres and actors involved in their reception.

The Word on College Reading and Writing Carol Burnell, Jaime Wood, Monique Babin, Susan Pesznecker, Nicole Rosevear, 2020 An interactive, multimedia text that introduces students to reading and writing at the college level.

Ulmer, 2001-12-21 Designed for literature-based writing courses, *Text Book* introduces students to the idea that literary texts and ordinary spoken and written language share many of the same features. By providing imaginative methods and unique assignments that let students work with those features in their

writing, Text Book involves students in the processes of exploring literature creatively, not simply consuming and analyzing it, helping them understand literature from the inside out.

Fundamentals of Predictive Text Mining Sholom M. Weiss, Nitin Indurkha, Tong Zhang, 2010-06-14 One consequence of the pervasive use of computers is that most documents originate in digital form. Widespread use of the Internet makes them readily available. Text mining – the process of analyzing unstructured natural-language text – is concerned with how to extract information from these documents. Developed from the authors' highly successful Springer reference on text mining, Fundamentals of Predictive Text Mining is an introductory textbook and guide to this rapidly evolving field. Integrating topics spanning the varied disciplines of data mining, machine learning, databases, and computational linguistics, this uniquely useful book also provides practical advice for text mining. In-depth discussions are presented on issues of document classification, information retrieval, clustering and organizing documents, information extraction, web-based data-sourcing, and prediction and evaluation. Background on data mining is beneficial, but not essential. Where advanced concepts are discussed that require

mathematical maturity for a proper understanding, intuitive explanations are also provided for less advanced readers. Topics and features: presents a comprehensive, practical and easy-to-read introduction to text mining; includes chapter summaries, useful historical and bibliographic remarks, and classroom-tested exercises for each chapter; explores the application and utility of each method, as well as the optimum techniques for specific scenarios; provides several descriptive case studies that take readers from problem description to systems deployment in the real world; includes access to industrial-strength text-mining software that runs on any computer; describes methods that rely on basic statistical techniques, thus allowing for relevance to all languages (not just English); contains links to free downloadable software and other supplementary instruction material.

Fundamentals of Predictive Text Mining is an essential resource for IT professionals and managers, as well as a key text for advanced undergraduate computer science students and beginning graduate students. Dr. Sholom M. Weiss is a Research Staff Member with the IBM Predictive Modeling group, in Yorktown Heights, New York, and Professor Emeritus of Computer Science at Rutgers University. Dr. Nitin Indurkha is Professor at the School of Computer Science and Engineering, University of New South Wales, Australia, as well as founder and president of data-mining consulting company Data-Miner Pty Ltd. Dr. Tong Zhang is Associate Professor at the Department of Statistics and Biostatistics at Rutgers University, New Jersey.

Text and Image John Bateman, 2014-05-30 Text and image are used together in an increasingly flexible fashion and many disciplines and areas of study are now attempting to understand how these combinations work. This introductory textbook explores and analyses the various approaches to multimodality and offers a broad, interdisciplinary survey of all aspects of the text-image relation. It leads students into detailed discussion concerning a number of approaches that are used. It also brings out their strengths and weaknesses using illustrative example analyses and raises explicit research questions to reinforce learning. Throughout the book, John Bateman looks at a wide range of perspectives: socio-semiotics, visual communication, psycholinguistic approaches to discourse, rhetorical approaches to advertising and visual persuasion, and cognitive metaphor theory. Applications of the styles of analyses presented are discussed for a variety of materials, including advertisements, picture books, comics and textbooks. Requiring no prior knowledge of the area, this is an accessible text for all students studying text and image or multimodality within English Language and Linguistics, Media and Communication Studies, Visual and Design Studies.

Nomadic Text Brennan W. Breed, 2014-05-13 Brennan W. Breed claims that biblical interpretation should focus on the shifting capacities of the text, viewing it as a dynamic process rather than a static product. Rather than seeking to determine the original text and its meaning, Breed proposes that scholars approach the production, transmission, and interpretation of the biblical text as interwoven elements of its overarching reception history. Grounded in the insights of contemporary literary theory, this approach alters the framing questions of interpretation from What does this text mean? to What can this text do?
