Dear Professor Dyson Freeman J. Dyson, 2016 Freeman Dyson has designed nuclear reactors and bomb-powered spacecraft; he has studied the origins of life and the possibilities for the long-term future; he showed quantum mechanics to be consistent with electrodynamics and started cosmological eschatology; he has won international recognition for his work in science and for his work in reconciling science to religion; he has advised generals and congressional committees. An STS (Science, Technology, Society) curriculum or discussion group that engages topics such as nuclear policies, genetic technologies, environmental sustainability, the role of religion in a scientific society, and a hard look towards the future, would count itself privileged to include Professor Dyson as a class participant and mentor. In this book, STS topics are not discussed as objectified abstractions, but through personal stories. The reader is invited to observe Dyson's influence on a generation of young people as they wrestle with issues of science, technology, society, life in general and our place in the universe. The book is filled with personal anecdotes, student questions and responses, honest doubts and passions--

John Wesley in America Geordan Hammond, 2014-05-23 Why did John Wesley leave the halls of academia at Oxford to become a Church of England missionary in the newly established colony of Georgia? Was his ministry in America a success or failure? These questions—which have engaged numerous biographers of Wesley—have often been approached from the vantage point of later developments in Methodism. Geordan Hammond presents the first book-length study of Wesley's experience in America, providing an innovative contribution to debates about the significance of a formative period of Wesley's life. *John Wesley in America* addresses Wesley's Georgia mission in fresh perspective by interpreting it in its immediate context. In order to re-evaluate this period of Wesley's life, Hammond carefully considers Wesley's writings and those of his contemporaries. The Georgia mission, for Wesley, was a laboratory for implementing his views of primitive Christianity. The ideal of restoring the doctrine, discipline, and practice of the early church in the pristine Georgia wilderness was the prime motivating factor in Wesley's decision to embark for Georgia and in his clerical practice in the colony. Understanding the centrality of primitive Christianity to Wesley's thinking and pastoral methods is essential to comprehending his experience in America. Wesley's conception of primitive Christianity was rooted in his embrace of patristic scholarship at Oxford. The most direct influence, however, was the High Church ecclesiology of the Usager Nonjurors who inspired him with their commitment to the restoration of the primitive church.

A Critical Pedagogy of Resistance James D. Kirylo, 2013-11-04 The diverse range of critical pedagogues presented in this book comes from a variety of backgrounds with respect to race, gender, and ethnicity, from various geographic places and eras, and from an array of complex political, historical, religious, theological, social, cultural, and educational circumstances which necessitated their leadership and resistance. How each pedagogue uniquely lives in that tension of dealing with pain and struggle, while concurrently fostering a pedagogy that is humanizing, is deeply influenced by their individual autobiographical lens of reality, the conceptual thought that enlightened them, the circumstances that surrounded them, and the conviction that drove them. To be sure, people of justice, people who resist, are framed by a vision that embraces an inclusive, tolerant, more loving community that passionately calls for a more democratic citizenship. That is just what the 34 critical pedagogues represented in this text heroically do. Through the highlighting of their lives and work, this book is not only an excellent resource to serve as a springboard to engage us in dialogue about pivotal issues and concerns related to justice, equality, and opportunity, but also to prompt us to further explore deeper into the lives and thought of some extraordinary people. *A Critical Pedagogy of Resistance: 34 Pedagogues We Need to Know* is an ambitious undertaking. Kirylo's narrative enterprise, which seeks to chronicle the lives of transformative pedagogues, is a project whose time has come. This text is an excellent resource for all those interested in the aesthetic that, as Kierkegaard believed, exercised power for the common good. Luis Mirón

Performing Identity/performing Culture Greg Dimitriadis, Michelle Bae-Dimitriadis, 2009 *Performing Identity/Performing Culture: Hip Hop as Text, Pedagogy, and Lived Practice* is the first book-length ethnography of young people and their uses of hip hop culture. Originally published in 2001, this second edition is newly revised, expanded, and updated to reflect contemporary currents in hip hop culture and critical scholarship, as well as the epochal social, cultural, and economic shifts of the last decade. Drawing together historical work on hip hop and rap music as well as four years of research at a local community center, Greg Dimitriadis argues here that contemporary youth are fashioning notions of self and community outside of school in ways educators have largely ignored. His studies are broad-ranging: how two teenagers constructed notions of a Southern tradition through their use of Southern rap artists like Eightball & MJG and Three 6 Mafia; how young people constructed notions of history through viewing the film *Panther*, a film they connected to hip hop culture more broadly; and how young people dealt with the life and death of hip hop icon Tupac Shakur, constructing resurrection myths that still resonate and circulate today.

Introduction to Political Psychology Martha L. Cottam, Elena Mastors, Thomas Preston, Beth Dietz, 2015-08-14 This comprehensive, user-friendly introductory textbook to political psychology explores the psychological origins of political behavior. The authors introduce readers to a broad range of theories, concepts, and case studies of political activity to illustrate that behavior. The book examines many patterns of political behaviors, including leadership, group behavior, voting, media effects, race, ethnicity, nationalism, social movements, terrorism, war, and genocide. It explores some of the most horrific things people do to each other, as well as how to prevent and resolve conflict – and how to recover from it. The book contains numerous features to enhance understanding, including text boxes highlighting current and historical events to help students see the connection between the world around them and the concepts they are learning. Different research methodologies used in the discipline are employed, such as experimentation and content analysis. The third edition of the book has two new chapters, one on the media, and one on social

movements. This accessible and engaging introductory textbook is suitable as a primary text on a range of upper-level courses in political psychology, political behavior, and related fields, including policymaking.

Understanding Origins Francisco J. Varela, J.P. Dupuy, 2013-03-09 The main intention of this book is to bring together contributions from biology, cognitive science, and the humanities for a joint exploration of some of the main contemporary notions dealing with the understanding of origins in life, mind and society. The question of origin is inseparable from a web of hypotheses that both shape and explain us. Although origin invites examination, it always seems to elude our grasp. Notions have always been produced to interpret the genesis of life, mind, and the social order, and these notions have all remained unstable in the face of theoretical and empirical challenges. In any given period, the central ideas on origin have had a mutual resonance frequently overlooked by specialists engaged in their own particular fields. As a consequence, this book should be of interest to a wide audience. In particular, for all those engaged in the social sciences and the philosophy of science, it is a unique document, since bridges to the natural sciences in a mutually illuminating way are hard to find. Whether as a primary source or as inspirational reading, we feel this book has a place in every library. The material comes from an international meeting held in September 13-16, 1987 at Stanford University, organized by F. Varela and J.-P. Dupuy at the request of the Program of Interdisciplinary Research of Stanford University. We are grateful to Rene Girard, the Program Director, for making it possible with the help of the Mellon Foundation.

Raising Standards in Literacy Greg Brooks, Ros Fisher, Maureen Lewis, 2003-09-02 Raising Standards in Literacy represents the best current thinking and research about literacy. The book is the outcome of a high-profile series of seminars on raising standards in literacy, and includes contributions from an impressive group of international researchers and policymakers. By offering a rich and unique mix of contemporary perspectives on literacy education, this book provides an invaluable source of study and insight into the latest research and developments in the teaching of literacy. It includes sections on: * how research into literacy teaching can inform new approaches found in England, the USA and Australia * the ways in which literacy education is developing in England, the USA and Australia * the issues involved in assessing progress in literacy and the validity of research claims made about standards of attainment. The book celebrates the apparent success of current literacy initiatives at the same time as raising questions about the feasibility and relevance of such initiatives to the literacy co-ordinators and consultants and for all those undertaking further study or research in literacy education.

Complex Systems Modeling and Simulation in Economics and Finance Shu-Heng Chen, Ying-Fang Kao, Ragupathy Venkatachalam, Ye-Rong Du, 2018-11-20 This title brings together frontier research on complex economic systems, heterogeneous interacting agents, bounded rationality, and nonlinear dynamics in economics. The book contains the proceedings of the CEF2015 (21st Computing in Economics in Finance), held 20-22 June 2015 in Taipei, Taiwan, and addresses some of the important driving forces for various emergent properties in economies, when viewed as complex systems. The breakthroughs reported in this book are a result of an interdisciplinary approach and simulation remains the unifying theme for these papers as they deal with a wide range of topics in economics. The text is a valuable addition to the efforts in promoting the complex systems view in economic science. The computational experiments reported in the book are both transparent and replicable. Complex System Modeling and Simulation in Economics and Finance is useful for graduate courses of complex systems, with particular focus on economics and finance. At the same time it serves as a good overview for researchers who are interested in the topic.

Understanding Difficulties in Literacy Development Janet Soler, Felicity Fletcher-Campbell, Gavin Reid, 2009-08-24 Based on current research, debates and concerns, this Reader adopts a cross disciplinary approach to understanding and working with those who experience difficulties with literacy. It provides a broad view of difficulties in literacy and related educational and curriculum learning issues across a range of ages, phases and settings. The Reader first considers questions of literacy, before going on to look at literacy development in relation to: Issues and concepts in public reading debates Literacy curriculum policy contexts Community, family, society and individual identity Social justice and equity issues and learning disabilities This Reader is relevant to all postgraduate students of Literacy, as well as educators, professionals and policy makers.

Caribbean Political Economy at the Crossroads D. Marshall, 1998-09-23 There are a variety of crisis symptoms confronting the Commonwealth Caribbean as the 21st century dawns. Global changes are quickly rendering the region's traditional economic platform obsolete. This book suggests however that the expanding NAFTA or the hemispheric turn towards bloc formation can offer a way out for the Caribbean. Politics must be brought back into the regionalisation process, for each island government is witnessing the narrowing of the range of its state power by powerful TNCs, international financial institutions, Washington interests, and corporate-backed WTO commissions.

The Chinese Recorder Index Kathleen L. Lodwick, 1986 The Chinese Recorder Index is the only complete index and research guide to the Chinese Recorder and Missionary Recorder. The core of this monumental work is three separate indexes: p li The Persons Index includes every individual who is mentioned at least four times over the run of the journal. Index entries for each person are keyed to indicate the location of such biographical information as his or her title, denominational affiliation, dates and locations of service in China, and names of spouse and children, as well as any articles he or she contributed to the Recorder. /lip li The Missions and Organizations Index includes references to mission locations, personnel, finances, converts made, attacks sustained, and other data, and to hospitals, schools, opium refuges, and orphanages. /lip li The Subject Index includes references to the many topics covered in the Recorder. /lip Following these indexes are lists that provide quick reference to specific information, such as persons and missions by location, women, and medical doctors.
