Windows 10: Special Edition, 2nd Edition Mike McGrath,

Cancel Cable: How Internet Pirates Get Free Stuff Chris Fehily, 2013-10-19 Neighbors with hand-labeled DVD collections. Teenagers with 5000-song iPods. Entire countries sharing the same copy of Windows. Who are these people? They're file sharers and they account for a third of worldwide internet traffic. Their swag is anything that can be digitized and copied. But file-sharing networks aren't only for pirates. Musicians and writers use them to gauge their popularity. Artists and filmmakers use them to boost recognition. Government employees use them to secretly download WikiLeaks archives. TV producers use them to confirm audience measurements. Politicians and judges use them to make policy and rulings. Traders and marketers use them to spot trends. - Learn how BitTorrent and peer-to-peer networks work. - Set up a BitTorrent client and find files to download. - Open, play, read, or run what you download. - Know the risks of file sharing and avoid fakes, scams, and viruses. Reviews A remarkably calm look at the technical, social, economic and cultural issues arising from file-sharing, and it's also a damned practical guide to navigating the strange world of file-sharing technology. - Cory Doctorow, boingboing.net Chris Fehily won't exactly call [middle-class consumers] suckers, but he will show them -- as well as college students, crackers, digital anarchists and others -- the Pirate Way. - J.D. Lasica, socialmedia.biz An

essential primer on file sharing for those not in the know. - Leo M, Brain Scratch Contents 1. The Terrain 2. Understanding BitTorrent 3. File Types 4. Malware 5. Archives 6. Securing IM and P2P Applications for the Enterprise Marcus Sachs, Paul Piccard, 2005-12-12 This book is for system administrators and security professionals who need to bring now ubiquitous IM and P2P applications under their control. Many businesses are now taking advantage of the speed and efficiency offered by both IM and P2P applications, yet are completely ill-equipped to deal with the management and security ramifications. These companies are now finding out the hard way that these applications which have infiltrated their networks are now the prime targets for malicious network traffic. This book will provide specific information for IT professionals to protect themselves from these vulnerabilities at both the network and application layers by identifying and blocking this malicious traffic. * A recent study by the Yankee group ranked managing and securing IM and P2P applications as the #3 priority for IT managers in 2004 * The recently updated SANS/FBI top 10 list of vulnerabilities for computers running Microsoft Windows contained both P2P and IM applications for the first time * The recently released Symantec Threat Assessment report for the first half of 2004 showed that 19 of the top 50 virus threats targeted IM or P2P applications. Despite the prevalence of IM and P2P applications on corporate networks and the risks they pose, there are no other books covering these topics

Critical Theory and Social Media Thomas Allmer, 2015-04-10 Social media platforms such as Facebook, YouTube, and Twitter are enormously popular: they are continuously ranked among the most frequently accessed websites worldwide. However there are as yet few studies which combine critical theoretical and empirical research in the context of digital and social media. The aim of this book is to study the constraints and emancipatory potentials of new media and to assess to what extent digital and social media can contribute to strengthen the idea of the communication and network commons, and a commons-based information society. Based on a critical theory and political economy approach, this book explores: the foundational concepts of a critical theory of media, technology, and society users' knowledge, attitudes, and practices towards the antagonistic character and the potentials and risks of social media whether technological and/or social changes are required in order to bring about real social media and human liberation. Critical Theory and Social Media examines both academic discourse on, and users' responses to, new media, making it a valuable tool for international scholars and students of sociology, media and communication studies, social theory, new media, and information society studies. Its clear and interesting insights into corporate practices of the global new media sector will mean that it appeals to

critical social media users around the world.

Passive and Active Measurement Arvind Krishnamurthy, Bernhard Plattner, 2010-04-01 The 2010 edition of the Passive and Active Measurement Conference was the 11th of a series of successful events. Since 2000, the Passive and Active Measurement (PAM) conference has provided a forum for presenting and discussing innovative and early work in the area of Internet measurements. PAM has a tradition of being a workshop-like conference with lively discussion and active participation from all attendees. This event focuses on research and practical applications of network measurement and analysis techniques. This year's conference was held at ETH Zurich, Switzerland. PAM 2010 attracted 79 submissions. Each paper was carefully reviewed by at least three members of the Technical Program Committee. The reviewing process led to the acceptance of 23 papers. The papers were arranged in nine sessions covering the following areas: routing, transport protocols, mobile devices, topology, measurement infrastructure, characterizing network usage, analysis techniques, traffic analysis, and the Web. We are very grateful to Endace Ltd. (New Zealand), Cisco Systems Inc. (USA), armasuisse (Switzerland) and the COST Action TMA whose sponsoring allowed us to keep registration costs low and to offer several travel grants to PhD students. We are also grateful to ETH Zurich for sponsoring PAM as a host.

Passive and Active Measurement Nina Taft, Fabio Ricciato, 2012-03-09 This book constitutes the refereed proceedings of the 13th International Conference on Passive and Active Measurement, PAM 2012, held in Vienna, Austria, in March 2012. The 25 revised full papers presented were carefully reviewed and selected from 83 submissions. The papers were arranged into eight sessions traffic evolution and analysis, large scale monitoring, evaluation methodology, malicious behavior, new measurement initiatives, reassessing tools and methods, perspectives on internet structure and services, and application protocols.
