Universal Multiservice Networks Mário Marques

Freire, Prosper Chemouil, Pascal Lorenz, Annie

Gravey, 2011-04-06 On behalf of the Organizing and Program Committees of the 3rd European Conference on Universal Multiservice Networks (ECUMN 2004), it is our great pleasure to introduce the proceedings of ECUMN 2004, which was held during October 25-27, 2004, in Porto, Portugal. In response to the Call for Papers, a total of 131 papers were submitted from 29 countries. Each paper was reviewed by several members of the Technical Program Committee or by external peer reviewers. After careful assessment of

the reviews, 53 papers were accepted for presentation in 13 technical sessions; half of them originated from countries outside Europe (mainly Asia). This illustrates the strong interest of this conference beyond its original geographical area. The conference program covered a variety of leading-edge research topics which are of current interest, such as wireless networks, mobile ad hoc networks, sensor networks, mobility management, optical networks, quality of service and traffic, transport protocols, real-time and multimedia, Internet technologies and applications, overlay and virtual private networks, security and privacy, and network operations and management. Together with three plenary sessions from France Télécom, Siemens, and Cisco Systems, these technical presentations - dressed the

latest research results from the international industry and academia and reported on findings on present and future multiservice networks.

The Rules of Influence William D. Crano,2012-03-27 Look out, Goliath—David has a training manual! . . . One of

the best books on social psychology ever written. ---Daniel Gilbert, New York Times bestselling author of *Stumbling on Happiness* No one doubts the power of the majority. It makes the rules and enforces them, and most of us are willing to go along with it, most of the time. But what happens when you're not? What about when the issue is so important to you that you're willing to take on the naysayers? It doesn't matter if you're trying to sell a new product or service, persuade colleagues to try out a new business plan, start a revolution, or simply convince your family where to go for dinner. In all of these cases you're going up against the majority, and more often than not your efforts are going to come up short. Or at least that was the case before Dr. William Crano—an expert in the field of influence—applied the science of persuasion to those moments when you find yourself outnumbered and overmatched. By doing so, he has discovered proven strategies, such as working from the inside and changing the game from subjective preferences to objective decisions, and distilled these strategies and more into an extraordinary collection of rules that radically affect the likelihood of success. *The Rules of Influence*—the most powerful guide to being persuasive even under the most inhospitable conditions—gives you the tools to overcome overwhelming odds and take back control in every situation.
